## Scaled Agile SAFe-Agilist Actual Dump & Test SAFe-Agilist Free

The SAFe 6 Agilist - Leading SAFe (SA) (6.0) (SAFe-Agilist) exam questions are the real, valid, and updated SAFe-Agilist Exam Questions that are specifically designed for quick and complete SAFe-Agilist exam preparation. With Dumpkiller SAFe 6 Agilist - Leading SAFe (SA) (6.0) (SAFe-Agilist) practice test questions you can start Scaled Agile SAFe-Agilist exam preparation immediately.

To prepare for the SAFe Agilist certification exam, candidates can attend the Leading SAFe course, which is a two-day course that covers all the topics that are covered in the exam. SAFe-Agilist course is designed to provide candidates with a comprehensive understanding of Agile and Lean-Agile principles and practices, as well as practical guidance on how to implement them within their organizations. SAFe-Agilist course is delivered by experienced Agile practitioners who have a deep understanding of Agile methodologies and have successfully implemented them within their organizations.

## Scaled Agile SAFe 6 Agilist - Leading SAFe (SA) (6.0) Sample Questions (Q57-Q62):

### NEW QUESTION # 57

Which of the following forms the foundation of SAFe?

- A. Change Management

- B. Emotional intelligence
- **C. Mindset, Values and Principles**
- D. Relentless improvement

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In SAFe 6.0, the foundation of SAFe is explicitly described as the combination of the Lean-Agile Mindset, SAFe Core Values, and the SAFe Principles ("Mindset, Values, and Principles"). These foundational elements guide behavior and decision-making across portfolios, large solutions, ARTs, and teams.

\* Lean-Agile Mindset: the SAFe House of Lean (Respect for People and Culture, Flow, Innovation, Relentless Improvement) plus the Agile Manifesto values and principles.

\* SAFe Core Values: the cultural cornerstones that guide how SAFe is applied in practice.

\* SAFe Principles: the ten Lean-Agile principles that inform roles, events, and practices across SAFe.

Therefore, "Mindset, Values and Principles" is the correct choice and is how SAFe frames its foundation.

## NEW QUESTION # 58

What connects Portfolios to the Enterprise strategy?

- **A. Strategic Themes**
- B. Features
- C. Solution Intent
- D. Enterprise Goals

**Answer: A**

Explanation:

Strategic Themes are highlighted in the workbook as:

"Differentiating business objectives that... Connect the portfolio to the Enterprise strategy." They provide context for budgeting and vision alignment across the organization.

## NEW QUESTION # 59

What is one of the Agile Release Train events?

- A. Product Owner sync
- B. Solution Demo
- C. Backlog refinement
- **D. Iteration Retrospective**

**Answer: D**

Explanation:

Explanation

According to the SAFe Agilist 6.0 domain of Develop on Cadence, Release on Demand, an Agile Release Train (ART) is a long-lived team of Agile Teams that delivers value in a regular and predictable manner<sup>1</sup>. An ART has a set of events that occur every Program Increment (PI), which is a fixed timebox of 8 to 12 weeks<sup>2</sup>.

These events are:

PI Planning - A two-day event where all members of the ART collaborate to align on a shared vision, identify dependencies, and plan the work for the next PI<sup>3</sup>.

PI System Demo - A demonstration of the new functionality delivered by the ART in the current PI, integrated with other solutions where applicable<sup>4</sup>.

Inspect and Adapt (I&A) - A one-day event where the ART reflects on the current PI and identifies improvement actions for the next PI<sup>5</sup>.

Innovation and Planning (IP) Iteration - A two-week iteration that occurs at the end of every PI, where the ART reserves time for innovation, planning, and continuous improvement.

In addition to these PI events, an ART also has iteration events that occur every two weeks, which are:

Iteration Planning - A meeting where each Agile Team plans the work for the current iteration, based on the PI objectives and team

backlog.

Iteration Review - A meeting where each Agile Team demonstrates the working software they have built in the current iteration and collects feedback from stakeholders.

Iteration Retrospective - A meeting where each Agile Team inspects their processes and practices in the current iteration and identifies improvement actions for the next iteration.

Scrum of Scrums (SoS) - A meeting where representatives from each Agile Team coordinate and collaborate on cross-team dependencies and impediments.

Product Owner Sync (PO Sync) - A meeting where Product Owners from each Agile Team align on backlog priorities and dependencies.

Therefore, out of the three options given, only Iteration Retrospective is one of the ART events. Backlog refinement is not an official event in SAFe, but rather an ongoing activity that occurs throughout the PI.

Product Owner sync is not an iteration event, but rather a PI event that occurs every two weeks.

### NEW QUESTION # 60

What is one output of enterprise strategy formulation?

- A. Portfolio Budgets
- B. Portfolio Canvas
- **C. Portfolio Vision**
- D. Portfolio Governance

**Answer: C**

Explanation:

The SAFe Workbook outlines the elements of enterprise strategy formulation and emphasizes:

"Enterprise Strategy Formulation includes Vision, Mission, Core Values, Business Drivers, Competitive Environment, Financial Goals, and Distinctive Competence." Among these, Portfolio Vision is identified as a direct outcome that aligns the portfolio with strategy.

### NEW QUESTION # 61

Which statement is true about a Value Stream that successfully uses DevOps?

- A. It has objective measurements with automation
- **B. It has a closed loop process of learning**
- C. It has a lower threshold of defects approved to production
- D. It has a technology stack without legacy code

**Answer: B**

### NEW QUESTION # 62

.....
