Holding a CompTIA A+ Certification Exam: Core 1 220-1101 Certification in a certain field definitely shows that one have a good

command of the 220-1101 knowledge and professional skills in the related field. However, it is universally accepted that the majority of the candidates for the CompTIA A+ Certification Exam: Core 1 exam are those who do not have enough spare time and are not able to study in the most efficient way.

CompTIA 220-1101 exam is designed for individuals who are interested in starting a career in the IT industry as technical support specialists, field service technicians, or IT support technicians. 220-1101 exam covers a wide range of topics such as PC hardware and peripherals, mobile device hardware and software, network connectivity issues, and security threats and vulnerabilities. It is a comprehensive exam that tests the candidate's knowledge and skills in various IT domains.

CompTIA A+ Certification Exam: Core 1 (220-1101) is one of the most widely recognized IT certification exams in the industry. It is designed to test the knowledge and skills of entry-level IT professionals in areas such as hardware, networking, mobile devices, security, and troubleshooting. 220-1101 Exam is the first of two required exams for the CompTIA A+ certification and is intended for individuals who are interested in pursuing a career in IT support.

CompTIA A+ Certification Exam: Core 1 Sample Questions (Q802-Q807):

NEW QUESTION # 802

A technician is replacing all RJ45 cables in a customer environment. Which of the following are the BEST tools to execute the task? (Select TWO).

- A. Crimper
- B. Cable tester
- C. Coaxial cable
- D. Screwdriver
- E. Optical fiber tester
- F. Scissors

Answer: A,B

Explanation:

Explanation

A cable tester and a crimper are the best tools to execute the task of replacing all RJ45 cables in a customer environment. A cable tester can be used to check the continuity and quality of a cable, and a crimper can be used to attach RJ45 connectors to the ends of a cable. An optical fiber tester is a tool that can be used to test fiber optic cables, which are not RJ45 cables. Scissors are not a tool for replacing cables, but for cutting them.

A coaxial cable is a type of cable that has a single copper conductor at its center, which is not an RJ45 cable either. A screwdriver is not a tool for replacing cables, but for fastening or loosening screws.

NEW QUESTION # 803

Joe, a customer, just purchased a new smartphone. He would like to be able to transfer information from one device to another without a physical connection. Using the same feature, he also wants to be able to make purchases on the phone.

Which of the following settings should Joe enable on the phone?

- A. Tethering
- B. Hotspot
- C. Bluetooth
- D. NFC

Answer: D

NEW QUESTION # 804

A customer built a computer for gaming, sourcing individual components and then assembling the system.

The OS starts up, but within a few minutes the machine locks up. The customer brought the computer to a technician to diagnose the issue.

Answer:

Explanation:

Explanation:

correct answer is "Overclocking" and "Reduce CPU Clock speed" CPU is at 4.5 Ghz when normal is 3.2 Ghz. Overclocking too much can cause freezes, and this is a gaming computer so the user probably took it too far.

NEW QUESTION # 805

A customer reports that access to the network fileshare has become much slower than usual, but local applications do not seem to have trouble. The technician checks the download bandwidth and finds no issues. Which of the following should the technician check NEXT?

- A. Customer use of two-factor authentication
- **B. Level of network utilization**
- C. Amount of local drive space
- D. RAID array drive health

Answer: B

Explanation:

The technician should check the level of network utilization to determine if there is an excessive amount of traffic that may be causing the slow access to the network fileshare. This can be done using network monitoring tools to track the amount of data being transmitted on the network. Reference: CompTIA A+ Certification Exam Objectives 1001, 2.9

NEW QUESTION # 806

A company would like to take advantage of the cost savings of cloud computing by only paying for the resources used. Which of the following will BEST address this need?

- A. High availability
- B. Shared resources
- **C. Metered utilization**
- D. Rapid elasticity

Answer: C

Explanation:

Metered utilization is a cloud feature that allows cloud providers to charge customers based on their actual consumption of resources, such as CPU time, storage space, bandwidth, or transactions. This enables customers to pay only for the resources they use, rather than a fixed or flat rate, which can reduce costs and increase efficiency. Metered utilization can also provide more transparency and accountability for both cloud providers and customers, as they can track and monitor their resource usage and billing. Reference:
