## **Understanding functional and technical aspects of Physical Security Professional Security Principles and Practices**

The following will be discussed in **ASIS PSP exam dumps**:

- Security industry norms (e.g., ASIS/ISO)
- Continuous evaluation and improvement measures
- Enterprise Security Risk Management (ESRM)
- Cross-useful authoritative coordinated effort

- Security hypothesis, procedures, and cycles (e.g., man-made consciousness, IoT)
- Principles of preparation, association, and control

## ASIS Physical Security Professional Exam Sample Questions (Q303-Q308):

### NEW QUESTION # 303

Which of the following is NOT the category of contingency planning program?

- A. those that impact the processes
- B. those that impact the business infrastructure
- C. those that impact the people
- D. those that impact the reputation of the business

**Answer: D**

Explanation:

Contingency planning traditionally focuses on:

Infrastructure (A)

People (B)

Processes (C)

While reputation is a concern in broader risk management and public relations, it is not considered a direct category of contingency planning programs, which deal more with operational continuity than brand management.

### NEW QUESTION # 304

What is the authorized physical invasion of property or remaining on property after permission has been rescinded?

- A. Prosecution
- B. None of the above
- C. Verdict
- D. Trespass

**Answer: D**

### NEW QUESTION # 305

A hybrid system is a combination of:

- A. Proprietary & Contract security
- B. Standard & Security acts
- C. Security consultants & services
- D. Security & Control

**Answer: A**

### NEW QUESTION # 306

The systems that utilized in communities that have a municipal alarm system are called:

- A. Warning system
- B. Auxiliary system
- C. Alert system
- D. Main system

**Answer: B**

Explanation:

Auxiliary systems are fire alarm systems that are connected directly to a municipal fire alarm system, such as those operated by a

local fire department. These systems provide immediate notification to the authorities in the event of an alarm activation and are commonly found in buildings located within cities with centralized emergency response networks.

Warning system (A), Main system (C), and Alert system (D) are not formal classifications of municipal- linked fire alarm systems.

### NEW QUESTION # 307

When developing a maintenance plan and the associated service levels, a system owner should place the greatest emphasis for support on equipment that:

- A. Requires preventative maintenance to function properly
- B. Has been in service for the longest time
- C. Would take the longest time to fix should it fail
- **D. Would have the greatest impact on the overall system should it fail**

**Answer: D**

Explanation:

In developing a maintenance plan, priority should be given to components whose failure would significantly affect the system's performance or create a major security gap. This is a risk-based approach, ensuring that critical equipment is maintained for maximum system reliability and protection.

A and C are valid considerations but not as crucial as impact.

D addresses maintenance requirements but not prioritization.
