

New 305-300 Exam Preview Free PDF | Efficient Reliable 305-300 Exam Book: LPIC-3 Exam 305: Virtualization and Containerization

SECTION A: OPEN QUESTIONS [43]

ANSWER THE QUESTIONS IN THE SPACES PROVIDED. PROVIDE ALL THE RELEVANT EQUATIONS. SHOW ALL YOUR WORKINGS.

QUESTION 1 [8]

Use the following information to answer questions 1.1 to 1.3.

Produce Glaze Ltd

	Sept 24 Final	Sept 23 Final	Sept 22 Final
Profit attributable (Rm)	750	500	850
Return to shareholders (%)	40.50	40.00	38.50
Share Price (c)	12 000	10 500	9 500

Spring Fresh Ltd

	Sept 24 Final	Feb 23 Final	Feb 22 Final
Profit attributable (Rm)	1 000	1 500	880
Return to shareholders (%)	25.50	30.50	32.50
Share Price (c)	5 800	4 500	4 800

1.1 Which company ranks first in terms of profit maximisation for the year 2024? Motivate your answer. (2) 2

Spring Fresh Ltd, with a profit maximisation of 1000 Rm.

1.2 Which company ranks first in terms of rate of return maximisation for the year 2024? Motivate your answer. (2)

Produce Glaze Ltd, with a return maximisation of 40.50%.

1.3 Which company ranks first in terms of the maximisation of shareholders' wealth (i.e. share price maximisation) over the last 12-month period? Motivate your answer by also including calculations. (4) 1

Spring Fresh Ltd ranks first in terms of maximization of shareholders.

Nowadays, using electronic 305-300 exam materials to prepare for the exam has become more and more popular, so now, you really should not be restricted to paper materials any more, our electronic Lpi 305-300 preparation dumps will surprise you with their effectiveness and usefulness. I can assure you that you will pass the exam as well as getting the related 305-300 Certification under the guidance of our 305-300 training materials as easy as pie.

LPIC-3 Exam 305 is one of the specialized exams in the Linux Professional Institute Certification (LPIC) program. It is designed to test the knowledge and skills of professionals in the field of virtualization and containerization technology. 305-300 exam aims to certify the candidates' proficiency in managing and implementing virtualization and containerization solutions on Linux systems.

The LPIC-3 Exam 305 is a highly specialized exam that focuses on virtualization and containerization technologies. It is designed for IT professionals who want to test their knowledge and skills in this specialized field. Passing 305-300 Exam will ensure that you have a competitive edge in today's job market and open new opportunities for your career growth.

Reliable 305-300 Exam Book - 305-300 Exam Tutorials

Do you want to find a job that really fulfills your ambitions? That's because you haven't found an opportunity to improve your ability to lay a solid foundation for a good career. Our 305-300 quiz torrent can help you get out of trouble regain confidence and embrace a better life. Our 305-300 Exam Question can help you learn effectively and ultimately obtain the authority certification of Lpi, which will fully prove your ability and let you stand out in the labor market. We have the confidence and ability to make you finally have rich rewards.

Lpi LPIC-3 Exam 305: Virtualization and Containerization Sample Questions (Q124-Q129):

NEW QUESTION # 124

Which of the following types of guest systems does Xen support? (Choose two.)

- A. Foreign architecture guests (FA)
- B. Paravirtualized guests (PVI)
- C. Container virtualized guests
- D. Fully virtualized guests
- E. Emulated guests

Answer: B,D

NEW QUESTION # 125

Which sub-command of xl changes the media inside a virtual CD-ROM drive of a Xen guest domain? (Specify ONLY the sub-command without any path or parameters.)

Solution:

block-attach - or - xl cd-insert - or - cd-eject - or - xl cd-eject - or - cd-insert - or - xl block-attach - or - block-detach - or - xl block-detach Determine whether the given solution is correct?

- A. Correct
- B. Incorrect

Answer: B

Explanation:

According to official Xen xl toolstack documentation, the correct sub-commands used to change media in a virtual CD-ROM drive are cd-insert and cd-eject. These commands are specifically designed for inserting or ejecting ISO media from a Xen guest's virtual CD-ROM device.

While commands such as block-attach and block-detach are valid xl sub-commands, they are used for attaching and detaching block devices in general and are not specific to CD-ROM media operations. The provided solution lists multiple commands, including incorrect and unrelated ones, rather than specifying the correct sub-command precisely.

Because the solution does not accurately and exclusively identify the correct xl sub-command, it is considered incorrect. Therefore, the correct determination is B.

NEW QUESTION # 126

Which of the following network interface types are valid in an LXD container configuration? (Choose three.)

- A. ipsec
- B. wifi
- C. physical
- D. bridged
- E. macvlan

Answer: C,D,E

Explanation:

Explanation

LXD supports the following network interface types in an LXD container configuration1:

* `macvlan`: Creates a virtual interface on the host with a unique MAC address and attaches it to an existing physical interface. This allows the container to have direct access to the physical network, but prevents communication with the host and other containers on the same host².

* `bridged`: Connects the container to an existing bridge interface on the host. This allows the container to communicate with the host and other containers on the same bridge, as well as the external network if the bridge is connected to a physical interface³.

* `physical`: Passes an existing physical interface on the host to the container. This allows the container to have exclusive access to the physical network, but removes the interface from the host⁴.

The other network interface types, `ipsec` and `wifi`, are not valid in an LXD container configuration. `Ipsec` is a protocol for secure communication over IP networks, not a network interface type. `Wifi` is a wireless technology for connecting devices to a network, not a network interface type. * `Macvlan` network - Canonical LXD documentation

* Bridge network - Canonical LXD documentation

* Physical network - Canonical LXD documentation

NEW QUESTION # 127

Which file in `acgroupdirectory` contains the list of processes belonging to `thisgroup`?

- A. `subjects`
- B. `pids`
- C. `procs`
- D. `members`
- E. `casks`

Answer: C

NEW QUESTION # 128

Which of the following commands executes a command in a running LXC container?

- A. `lxc-enter`
- B. `lxc-run`
- C. `lxc-batch`
- D. `lxc-eval`
- E. `lxc-attach`

Answer: E

Explanation:

Explanation

The command `lxc-attach` is used to execute a command in a running LXC container. It allows the user to start a process inside the container and attach to its standard input, output, and error streams¹. For example, the command `lxc-attach -n mycontainer -- ls -lh /home` will list all the files and directories in the `/home` directory of the container named `mycontainer1`. The other options are not valid LXC commands. The command `lxc-batch` does not exist. The command `lxc-run` is an alias for `lxc-start`, which is used to start a container, not to execute a command in it². The command `lxc-enter` is also an alias for `lxc-attach`, but it is deprecated and should not be used³. The command `lxc-eval` is also not a valid LXC command. References:

* 2: `lxc-start`: start a container. - SysTutorials.

* 3: `lxc-attach`: start a process inside a running container. - SysTutorials.

NEW QUESTION # 129

.....

Our company can guarantee that our 305-300 actual questions are the most reliable. Having gone through about 10 years' development, we still pay effort to develop high quality 305-300 study materials and be patient with all of our customers, therefore you can trust us completely. In addition, you may wonder if our 305-300 Study Materials become outdated. Our 305-300 actual questions are updated in a high speed. And you will enjoy the 305-300 test guide freely for one year, which can save your time and money. We will send you the latest 305-300 study materials through your email.
