FCP_FAZ_AN-7.4 Test Dates & FCP_FAZ_AN-7.4 Valid Test Test

In your day-to-day life, things look like same all the time, but preparing for critical FCP_FAZ_AN-7.4 practice exam is not one of those options. About the exam ahead of you this time, our FCP_FAZ_AN-7.4 study braindumps will be your indispensable choices. Before you get the official one, you can estimate our quality by downloading the free demos. You will pay just a small amount of money on our FCP_FAZ_AN-7.4 Exam Guide but harvest colossal success with potential bright future. And we have confidence that your future aims will come along with this successful exam as the beginning. So choosing FCP_FAZ_AN-7.4 actual question is choosing success.

Fortinet FCP - FortiAnalyzer 7.4 Analyst Sample Questions (Q29-Q34):

NEW QUESTION # 29
When performing a log search on a FortiAnalyzer, it is generally recommended to use the Quick Search option.
What is a valid reason for using the Full Search option, instead?

- A. You want the search to include the FortiAnalyzer's local logs.
- B. The search items you are looking for are not contained in indexed log fields.
- C. A quick search only searches data received within the last 24 hours.
- D. You want the search to include content archive data as well.

Answer: B

NEW QUESTION # 30
An administrator wants to configure timeouts for users. Regardless of the user's behavior, the timer should start as soon as the user authenticates and expire after the configured value.
Which timeout option should be configured on FortiGate?

- A. idle-timeout
- B. hard-timeout
- C. new-session
- D. soft-timeout
- E. auth-on-demand

Answer: B

NEW QUESTION # 31
How can you configure FortiAnalyzer to permit administrator logins from only specific locations?

- A. Use administrative profiles
- B. Use static routes
- C. Use trusted hosts
- D. Use secure protocols

Answer: C

NEW QUESTION # 32
FortiAnalyzer reports are dropping analytical data from 15 days ago, even though the data policy setting for analytics logs is 60 days.
What is the most likely problem?

- A. Quota enforcement is acting on analytical data before a report is complete
- B. Logs are rolling before the report is run
- C. Disk utilization for archive logs is set for 15 days
- D. CPU resources are too high

Answer: A

NEW QUESTION # 33

You created a playbook on FortiAnalyzer that uses a FortiOS connector.

When configuring the FortiGate side, which type of trigger must be used so that the actions in an automation stich are available in the FortiOS connector?

- A. FortiOS Event Log
- B. Incoming webhook
- C. Fabric Connector event
- D. FortiAnalyzer Event Handler

Answer: B

Explanation:

When using FortiAnalyzer to create playbooks that interact with FortiOS devices, anIncoming Webhook trigger is required on the FortiGate side to make the actions in an automation stitch accessible through the FortiOS connector. The incoming webhook trigger allows FortiAnalyzer to initiate actions on FortiGate by sending HTTP POST requests to specified endpoints, which in turn trigger automation stitches defined on the FortiGate.

Here's an analysis of each option:

* Option A: FortiAnalyzer Event Handler

* This is incorrect. The FortiAnalyzer Event Handler is used within FortiAnalyzer itself for handling log events and alerts, but it does not trigger automation stitches on FortiGate.

* Option B: Fabric Connector event

* This is incorrect. Fabric Connector events are related to Fortinet's Security Fabric integrations but are not specifically used to trigger FortiGate automation stitches from FortiAnalyzer.

* Option C: FortiOS Event Log

* This is incorrect. While FortiOS event logs can be used for monitoring, they are not designed to trigger automation stitches directly from FortiAnalyzer.

* Option D: Incoming webhook

* This is correct. The Incoming Webhook trigger on FortiGate enables it to receive requests from FortiAnalyzer, allowing playbooks to activate automation stitches defined on the FortiGate device. This method is commonly used to integrate actions from FortiAnalyzer to FortiGate via the FortiOS connector.

References: According to FortiOS and FortiAnalyzer documentation, when integrating FortiAnalyzer playbooks with FortiGate automation stitches, the recommended trigger type on FortiGate is anIncoming Webhook, allowing FortiAnalyzer to interact with FortiGate's automation framework through the FortiOS connector.

NEW QUESTION # 34

......

We can assure to all people that our study materials will have a higher quality and it can help all people to remain an optimistic mind when they are preparing for the FCP_FAZ_AN-7.4 exam, and then these people will not give up review for the exam. On the contrary, people who want to pass the exam will persist in studying all the time. We deeply believe that the FCP_FAZ_AN-7.4 Study Materials from our company will is most suitable and helpful for all people.
