We have online and offline chat service for HPE6-A88 exam materials, if you have any questions, you can have a conversation with them.

HPE Aruba Networking ClearPass Exam Sample Questions (Q94-Q99):

NEW QUESTION # 94

An IT administrator is managing a network with ClearPass and notices that one of the devices is sending multiple health checks throughout the day via different networks (wired, wireless, and VPN). How does OnGuard handle the license usage for this device?

- A. OnGuard debits one license per day for the device regardless of the number of health checks or networks used.
- B. OnGuard debits a license for each network the device connects to throughout the day.
- C. OnGuard debits a separate license for each health check sent by the device.

Answer: A

Explanation:

OnGuard licensing is device-based and time-bound. A single device consumes one license per day, regardless of how many health checks it performs or how many different networks it connects to during that period.

NEW QUESTION # 95

A network administrator wants to ensure that users see their company's logo when accessing the guest network. They have already uploaded the logo as a JPEG file into the Content Manager.

What is the next step they should take to display this logo on the custom web pages?

- A. Apply a skin that includes the uploaded logo to the web pages.
- B. Edit the ClearPass Guest configuration to include the logo in the default template.
- C. Enable public access for the uploaded logo file.

Answer: A

Explanation:

After uploading the company logo to the Content Manager, the administrator must apply a skin that includes the uploaded logo to the guest web pages. Skins define the visual appearance of ClearPass Guest portals, and applying one with the logo ensures the branding appears consistently across all guest-facing pages.

NEW QUESTION # 96

A network administrator notices that a client device leaves the network and returns after ten minutes. Upon reconnecting, the device's posture token is unknown. What is the most likely reason for this behavior?

- A. The endpoint profile information was permanently deleted from ClearPass.
- B. The agent failed to send any updates to ClearPass during the ten-minute period.
- C. The posture token expired due to inactivity beyond the five-minute threshold.

Answer: C

Explanation:

Posture tokens in ClearPass are time-bound and expire after a defined inactivity period. If the client disconnects longer than the allowed validity window, the token expires and is no longer recognized when the device reconnects, resulting in an unknown posture state.

NEW QUESTION # 97

Which component of ClearPass provides visibility into who accessed the network, when, and from which device?

Response:

- A. Insight
- B. Guest Portal
- C. Access Tracker
- D. Onboard

Answer: C

NEW QUESTION # 98

An organization wants to enhance its network security by integrating external systems to provide rich context to its authorization logic. They plan to use ClearPass Policy Manager for this purpose. Which feature of the Policy Manager will be most beneficial for integrating with these external systems?

- A. Self-service device onboarding with built-in certificate authority
- **B. Configuring external context servers and context server actions through APIs or HTTP/REST calls**
- C. Guest access with extensive customization and sponsor-based approvals

Answer: B

Explanation:

ClearPass is designed as an open platform. The External Context Server feature allows ClearPass to exchange data with third-party security systems like Firewalls (Palo Alto, Check Point), EMM/MDM (Intune, AirWatch), and SIEMs (Splunk). By using REST APIs or XML/JSON over HTTP, ClearPass can send

"Context Server Actions" (like telling a firewall to quarantine a user) or receive data to be used as attributes in authorization policies.

NEW QUESTION # 99

.....

Many candidates like APP test engine of HPE6-A88 exam braindumps because it seem very powerful. If you are interested in this version, you can purchase it. This version provides only the questions and answers of HPE6-A88 exam braindumps but also some functions easy to practice and master.
