## SCA-C01 Guaranteed Success, SCA-C01 Exam Book

What SCA-C01 study materials can give you is far more than just a piece of information. First of all, SCA-C01 study materials can save you time and money. As a saying goes, to sensible men, every day is a day of reckoning. Every minute SCA-C01 study material saves for you may make you a huge profit. Secondly, SCA-C01 Study Materials will also help you to master a lot of very useful professional knowledge in the process of helping you pass the exam. The SCA-C01 study materials are valuable, but knowledge is priceless.

Tableau SCA-C01 exam is a computer-based exam that consists of multiple-choice questions. SCA-C01 exam is administered by Pearson VUE and can be taken at any Pearson VUE testing center worldwide. SCA-C01 exam is timed and candidates are required to complete it within a set time limit. SCA-C01 exam covers a range of topics including installation and configuration, data

sources and security, server administration, and content management.

Tableau SCA-C01 is a certification exam designed to validate the skills and knowledge of individuals who want to become certified Tableau Server administrators. Tableau is a powerful data visualization and analysis tool used by organizations of all sizes to gain insights into their data. The Tableau Server platform allows users to share and collaborate on data visualizations, making it an essential tool for businesses that rely on data-driven insights.

Tableau SCA-C01 Certification is a valuable credential that provides numerous benefits to both individuals and organizations. It validates the candidate's skills and expertise in Tableau Server administration, making them stand out in the job market. For organizations, having Tableau Server certified professionals ensures that they have a skilled workforce capable of managing and securing analytics content effectively. Moreover, it helps in increasing the overall productivity and efficiency of the organization's analytics team.

## Tableau Server Certified Associate Exam Sample Questions (Q68-Q73):

### NEW QUESTION # 68

Which of the following types of logos and headers can be customized with the TSM command, `tsm customize`? (Select all)

- A. Window tab logo
- B. Header logo
- C. Server name
- D. Sign-in logo

**Answer: B,C,D**

Explanation:

Explanation

### NEW QUESTION # 71

To which site role can you associate the Viewer user-based license level?

- A. Creator
- B. Explorer (can publish)
- **C. Viewer**
- D. Explorer

**Answer: C**

Explanation:

Tableau Server uses a role-based licensing model with three primary license levels: Creator, Explorer, and Viewer. Each license level corresponds to specific site roles that define what users can do on the server.

Viewer License: This is the most restrictive license, allowing users to view and interact with published content (e.g., dashboards and visualizations) but not to create or publish new content.

Site Role: The Viewer license can only be associated with the Viewer site role. This role restricts users to viewing capabilities, aligning with the license's purpose.

Option A (Creator): Incorrect. The Creator license is for users who can create, edit, and publish content using Tableau Desktop and the web interface. It corresponds to the Creator site role, not Viewer.

Option B (Explorer (can publish)): Incorrect. This is a variation of the Explorer license, which allows users to edit and publish content within limits. It's more permissive than Viewer.

Option C (Viewer): Correct. The Viewer site role matches the Viewer license level perfectly.

Option D (Explorer): Incorrect. The Explorer license allows users to explore data and create content in the web interface, exceeding the Viewer license's capabilities.

### NEW QUESTION # 72

What process enables you to access Tableau Services Manager (TSM) over HTTPS?

- A. Administration Agent
- B. Coordination Service
- **C. Administration Controller**
- D. License Manager

**Answer: C**

Explanation:

TSM is Tableau Server's management layer, accessible via CLI or web UI (port 8850). HTTPS secures this access-let's identify the responsible process:

\* TSM Architecture:

\* Administration Controller: Core TSM process, running on the initial node, handling configuration, UI, and CLI commands.

\* HTTPS: Enabled by default on port 8850 with a self-signed certificate (configurable to custom certs).

\* Option B (Administration Controller): Correct.

\* Details: Hosts the TSM web UI (<https://<server>:8850>) and processes CLI requests. It manages the HTTPS listener, serving the interface securely.

\* Why: It's the central hub for TSM operations, including secure access.

\* Option A (License Manager): Incorrect.

\* Why: Validates licenses, not responsible for HTTPS or UI access.

\* Option C (Administration Agent): Incorrect.

\* Why: Runs on additional nodes in multi-node setups to relay commands to the Controller-no direct HTTPS role.

\* Option D (Coordination Service): Incorrect.

\* Why: ZooKeeper manages cluster state, not TSM's web interface or HTTPS.

Why This Matters: Secure TSM access protects server administration-Administration Controller is the linchpin.

### NEW QUESTION # 73

.....

With the rapid development of IT technology, the questions in the IT certification exam are also changing. Therefore, PDF4Test also

keeps updating test questions and answers. And if you purchase PDF4Test Tableau SCA-C01 Practice Test materials, we will provide you with free updates for a year. As long as the questions updates, PDF4Test will immediately send the latest questions and answers to you which guarantees that you can get the latest materials at any time. PDF4Test can not only help you pass the test, but also help you learn the latest knowledge. Never pass up a good chance to have the substantial materials.
