

# CAS-005 Certification - Exam CAS-005 Passing Score

BONUS!!! Download part of PDF4Test CAS-005 dumps for free: <https://drive.google.com/open?id=1ocpjnYMW8ZPOqhAqi9cUgEVbmMIWR21P>

Our CAS-005 latest preparation materials provide users with three different versions, including a PDF version, a software version, and an online version. Although involved three versions of the CAS-005 teaching content is the same, but for all types of users can realize their own needs, whether it is which version of CAS-005 Learning Materials, believe that can give the user a better CAS-005 learning experience. Below, I would like to introduce you to the main advantages of our research materials, and I'm sure you won't want to miss it.

To develop a new study system needs to spend a lot of manpower and financial resources, first of all, essential, of course, is the most intuitive skill learning materials, to some extent this greatly affected the overall quality of the learning materials. Our CompTIA SecurityX Certification Exam study training dumps do our best to find all the valuable reference books, then, the product we hired experts will carefully analyzing and summarizing the related materials, such as: CompTIA CAS-005 exam, eventually form a complete set of the review system. Experts before starting the compilation of " the CAS-005 Latest Questions ", has put all the contents of the knowledge point build a clear framework in mind, though it needs a long wait, but product experts and not give up, but always adhere to the effort, in the end, they finished all the compilation. So, you're lucky enough to meet our CAS-005 test guide l, and it's all the work of the experts. If you want to pass the qualifying exam with high quality, choose our products. We are absolutely responsible for you. Don't hesitate!

## **Realistic CAS-005 Certification - 100% Pass CompTIA Exam CompTIA SecurityX Certification Exam Passing Score**

Taking these mock exams is important because it tells you where you stand. People who are confident about their knowledge and expertise can take these CAS-005 practice tests and check their scores to know where they lack. This is good practice to be a pro and clear your CompTIA SecurityX Certification Exam (CAS-005) exam with amazing scores. PDF4Test practice tests simulate the real CAS-005 exam questions environment.

## **CompTIA SecurityX Certification Exam Sample Questions (Q459-Q464):**

### NEW QUESTION # 459

A systems administrator at a web-hosting provider has been tasked with renewing the public certificates of all customer sites. Which of the following would best support multiple domain names while minimizing the amount of certificates needed?

- A. SAN
- B. OCSP
- C. CRL
- D. CA

**Answer: A**

Explanation:

SAN (Subject Alternative Name) is an extension to SSL/TLS certificates that allows a single certificate to secure multiple domain names. This method is ideal for situations where you want to secure several domains or subdomains with one certificate, reducing the complexity and number of certificates needed. SAN certificates are commonly used to support multiple domain names under a single SSL certificate, making them the best choice for the given scenario.

### NEW QUESTION # 460

A security architect is troubleshooting an issue with an OIDC implementation. The architect reviews the following configuration and errors:

Error: Invalid authentication request code

Which of the following is the most likely cause of the error?

- A. The encoding of the URL parameters on the proxy system is failing.
- B. Introspection is not enabled within the OIDC code implementation.
- C. The redirect-url parameter is not in the allowed list of redirect hosts in the configuration.
- D. OAuth 2.0 was unable to verify the lack of an interception attack.
- E. The state parameter is being reused within the authentication challenge.

**Answer: C**

### NEW QUESTION # 461

Audit findings indicate several user endpoints are not utilizing full disk encryption. During the remediation process, a compliance analyst reviews the testing details for the endpoints and notes the endpoint device configuration does not support full disk encryption. Which of the following is the most likely reason the device must be replaced?

- A. The HSM does not support sealing storage.
- B. The HSM is outdated and no longer supported by the manufacturer.
- C. The HSM is vulnerable to common exploits and a firmware upgrade is needed.
- D. The vTPM was not properly initialized and is corrupt.
- E. The motherboard was not configured with a TPM from the OEM supplier.

**Answer: E**

Explanation:

The most likely reason the device must be replaced is that the motherboard was not configured with a TPM (Trusted Platform Module) from the OEM (Original Equipment Manufacturer) supplier.

Why TPM is Necessary for Full Disk Encryption:

Hardware-Based Security: TPM provides a hardware-based mechanism to store encryption keys securely, which is essential for full disk encryption.

Compatibility: Full disk encryption solutions, such as BitLocker, require TPM to ensure that the encryption keys are securely stored and managed.

Integrity Checks: TPM enables system integrity checks during boot, ensuring that the device has not been tampered with.

Other options do not directly address the requirement for TPM in supporting full disk encryption:

A. The HSM is outdated: While HSM (Hardware Security Module) is important for security, it is not typically used for full disk encryption.

B. The vTPM was not properly initialized: vTPM (virtual TPM) is less common and not typically a reason for requiring hardware replacement.

C. The HSM is vulnerable to common exploits: This would require a firmware upgrade, not replacement of the device.

E. The HSM does not support sealing storage: Sealing storage is relevant but not the primary reason for requiring TPM for full disk encryption.

#### NEW QUESTION # 462

After a cybersecurity incident, a security analyst was able to collect a binary that the attacker used on the compromised server. Then the analyst ran the following command:

Which of the following options describes what the analyst is trying to do?

- A. To extract IoCs from the binary used on the attack
- B. To reconstruct the timeline of commands executed by the binary
- C. To debug the binary to analyze low-level instructions
- D. To replicate the attack in a secure environment

**Answer: A**

Explanation:

The command strings binary.exe is used to extract human-readable strings from a binary file. This can help the security analyst find indicators of compromise (IoCs), such as IP addresses (e.g., <http://192.168.1.2/?=cmd.exe>), file paths, and potentially malicious domain names or commands embedded in the binary. This process aids in identifying critical information that can be used for further investigation or remediation of the attack.

#### NEW QUESTION # 463

##### SIMULATION

You are a security analyst tasked with interpreting an Nmap scan output from company's privileged network.

The company's hardening guidelines indicate the following:

There should be one primary server or service per device.

Only default ports should be used.

Non-secure protocols should be disabled.

##### INSTRUCTIONS

Using the Nmap output, identify the devices on the network and their roles, and any open ports that should be closed.

For each device found by Nmap, add a device entry to the Devices Discovered list, with the following information:

The IP address of the device

The primary server or service of the device (Note that each IP should be associated with one service/port only) The protocol(s) that should be disabled based on the hardening guidelines (Note that multiple ports may need to be closed to comply with the hardening guidelines) If at any time you would like to bring back the initial state of the SIMULATION, please click the Reset All button.

**Answer:**

Explanation:

See explanation below

Explanation:

10.1.45.65 SFTP Server Disable 8080

10.1.45.66 Email Server Disable 415 and 443

10.1.45.67 Web Server Disable 21, 80

10.1.45.68 UTM Appliance Disable 21

#### NEW QUESTION # 464

.....

The goal of a CompTIA CAS-005 mock exam is to test exam readiness. PDF4Test's online CompTIA SecurityX Certification Exam CAS-005 practice test can be accessed online through all major browsers such as Chrome, Firefox, Safari, and Edge. You can also download and install the offline version of CompTIA SecurityX Certification Exam CAS-005 Practice Exam software on Windows-based PCs only. You can prepare for the CompTIA SecurityX Certification Exam exam without an internet connection
