At QuestionsTube, you can read SC-100 free demo questions in pdf file, so you can check the questions and answers before deciding to download the Microsoft SC-100 practice questions. These free demo questions are parts of the SC-100 exam questions. Download and read them carefully, you will find that the SC-100 test questions of QuestionsTube will be your great learning materials online. Share some SC-100 exam online questions below.

1. You have a Microsoft 365 E5 subscription.

BTW, DOWNLOAD part of TestPassed SC-100 dumps from Cloud Storage: https://drive.google.com/open?id=1R5DKS65F4l8XW7bn_sX7KcVZpvZZ2mN8

It's not easy for most people to get the SC-100 guide torrent, but I believe that you can easily and efficiently obtain qualification SC-100 certificates as long as you choose our products. After you choose our study materials, you can master the examination point from the SC-100 Guide question. Then, you will have enough confidence to pass your exam. As for the safe environment and effective product, why don't you have a try for our SC-100 question torrent, never let you down!

Microsoft SC-100 Exam covers various topics related to cybersecurity architecture, such as threat modeling, security baselines, security protocols, and security solutions. SC-100 exam requires a thorough understanding of the principles and concepts of cybersecurity architecture and the ability to apply this knowledge to real-world scenarios. SC-100 exam is available in multiple languages and can be taken online or in-person at a testing center.

Microsoft SC-100 (Microsoft Cybersecurity Architect) exam is a certification exam designed for individuals who want to demonstrate their expertise in cybersecurity architecture. SC-100 Exam is intended for professionals who have experience in designing and implementing secure solutions using Microsoft technologies such as Azure, Microsoft 365, and Windows 10. SC-100 exam measures the candidate's ability to identify and assess security risks, design and implement secure solutions, and monitor and respond to security threats.

Free PDF Quiz 2026 Microsoft SC-100: Microsoft Cybersecurity Architect Latest Instant Access

If you are worried about that if you fail to pass the exam and will waste your money, if you choose us, there is no need for you to worry about this. We ensure that if you fail to pass your exam by using SC-100 exam materials of us, we will give you full refund, and no other questions will be asked. Besides, we offer you free update for one year, that is to say, there is no need for you to spend extra money on updating. The update version for SC-100 Exam Braindumps will be sent to you automatically. You just need to check your mail and change your learning methods in accordance with new changes.

Microsoft Cybersecurity Architect Sample Questions (Q209-Q214):

NEW QUESTION # 209

You are designing the encryption standards for data at rest for an Azure resource. You need to provide recommendations to ensure that the data at rest is encrypted by using AES-256 keys. The solution must support rotating the encryption keys monthly.

Solution: For blob containers in Azure Storage, you recommend encryption that uses customer-managed keys (CMKs).

Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION # 210

You have an Azure subscription.

You plan to implement Azure Synapse Analytics SQL dedicated pools and SQL serverless pools.

You need to recommend a solution to provide additional encryption-at-rest security for each type of pool. The solution must use customer-managed keys, whenever possible.

What should you recommend for each pool type? To answer, drag the appropriate recommendations to the correct pool types.

Each recommendation may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer Area

Serverless SQL pool: Azure Storage infrastructure encryption and Microsoft-managed keys
Azure Storage infrastructure encryption and customer-managed keys
Transparent Data Encryption (TDE) and customer-managed keys
Transparent Data Encryption (TDE) and Microsoft-managed keys

Dedicated SQL pool: Transparent Data Encryption (TDE) and customer-managed keys
Azure Storage infrastructure encryption and Microsoft-managed keys
Transparent Data Encryption (TDE) and Microsoft-managed keys

Microsoft

Answer:

Explanation:

Answer Area

Serverless SQL pool:

Dedicated SQL pool:

Explanation:

Answer Area

Serverless SQL pool:

Dedicated SQL pool:

NEW QUESTION # 211

You have a Microsoft 365 subscription and an Azure subscription. Microsoft 365 Defender and Microsoft Defender for Cloud are enabled.

The Azure subscription contains 50 virtual machines. Each virtual machine runs different applications on Windows Server 2019.

You need to recommend a solution to ensure that only authorized applications can run on the virtual machines.

If an unauthorized application attempts to run or be installed, the application must be blocked automatically until an administrator authorizes the application.

Which security control should you recommend?

- A. app discovery anomaly detection policies in Microsoft Defender for Cloud Apps
- B. app protection policies in Microsoft Endpoint Manager
- C. adaptive application controls in Defender for Cloud
- D. Azure Security Benchmark compliance controls in Defender for Cloud

Answer: C

Explanation:

Explanation

NEW QUESTION # 212

Hotspot Question

You have multiple on-premises Hyper-V hosts that contain virtual machines. The virtual machines run Windows Server 2022.

You have an Azure subscription.

You need to recommend a solution to collect Security event logs from the virtual machines by using Microsoft Sentinel. The Solution must meet the following requirements:

- Leverage the Windows Security Events via AMA data connector.
- Ensure that only specific events are collected.
- Minimize costs.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one port.

Answer Area

In Azure, deploy:

- Azure Monitor data collection endpoints
- Azure Monitor data collection rules (DCRs)
- Microsoft Defender for Cloud data collection settings

On the virtual machines, install:

- The Azure Connected Machine agent for Azure Arc-enabled servers
- The Log Analytics agent
- The VM insights Map Dependency agent on Windows

Answer:

Explanation:

The screenshot shows the 'Answer Area' with the following selections:

- In Azure, deploy:** Azure Monitor data collection rules (DCRs)
- On the virtual machines, install:** The Azure Connected Machine agent for Azure Arc-enabled servers

Explanation:

Box 1: Azure Monitor data collection rules (DCRs)

In Azure, deploy

Windows Security Events via AMA connector for Microsoft Sentinel

You can stream all security events from the Windows machines connected to your Microsoft Sentinel workspace using the Windows agent. This connection enables you to view dashboards, create custom alerts, and improve investigation. This gives you more insight into your organization's network and improves your security operation capabilities.

Connector attributes

Connector attribute	Description
Log Analytics table(s)	SecurityEvent
Data collection rules support	Azure Monitor Agent DCR
Supported by	Microsoft Corporation

Create a data collection rule

You can define a data collection rule to send data from multiple machines to multiple Log Analytics workspaces, including workspaces in a different region or tenant. Create the data collection rule in the same region as your Log Analytics workspace. You can send Windows event and Syslog data to Azure Monitor Logs only. You can send performance counters to both Azure Monitor Metrics and Azure Monitor Logs.

Box 2: The Azure Connected Machine agent for Azure Arc-enabled servers

On the virtual machines, install

The Azure Connected Machine agent enables you to manage your Windows and Linux machines hosted outside of Azure on your corporate network or other cloud providers.

NEW QUESTION # 213

You have an Azure subscription that contains the Azure Virtual Machine Scale Sets shown in the following table.

Name	Configuration
VMSS1	<ul style="list-style-type: none">Orchestration mode: FlexibleImage type: Windows Server virtual machine platform image
VMSS2	<ul style="list-style-type: none">Orchestration mode: UniformImage type: Windows Server virtual machine custom image
VMSS3	<ul style="list-style-type: none">Orchestration mode: FlexibleImage type: Linux virtual machine platform image
VMSS4	<ul style="list-style-type: none">Orchestration mode: UniformImage type: Linux virtual machine custom image

You are evaluating Azure Update Manager and automatic virtual machine guest patching. Which virtual machine scale sets will automatic guest patching support?

- A. VMSS1 and VMSS3 only
- B. VMSS2 and VMSS4 only
- C. VMSS2 only
- D. VMSS1, VMSS2, VMSS3, and VMSS4
- E. VMSS1 only

Answer: A

Explanation:

* VMSS1 - Yes

Standard Windows virtual machine platform images are supported.

Flexible orchestration mode is supported.

Note: Enabling Automatic Guest Patching on single-instance VMs or Virtual Machine Scale Sets in Flexible orchestration mode allows the Azure platform to update your fleet in phases.

* VMSS2 - No

Custom images are not supported.

* VMSS3 - Yes

Standard Linux virtual machine platform images are supported.

Flexible orchestration mode is supported.

* VMSS4 - No

Custom images are not supported.

Note:

Automatic VM guest patching, on-demand patch assessment and on-demand patch installation are supported only on VMs created from images with the exact combination of publisher, offer and sku from the below supported OS images list. Custom images or any other publisher, offer, sku combinations aren't supported. More images are added periodically.
