Gehen Sie einen entscheidenden Schritt weiter. Mit der The Open Group OGBA-101 Zertifizierung erhalten Sie einen Nachweis Ihrer besonderen Qualifikationen und eine Anerkennung für Ihr technisches Fachwissen. The Open Group bietet eine Reihe verschiedener OGBA-101 Zertifizierungsprogramme für professionelle Benutzer an. Untersuchungen haben gezeigt, dass zertifizierte Fachleute häufig mehr verdienen als ihre Kollegen ohne Zertifizierung.

## The Open Group OGBA-101 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"><li>• Development of a Business Architecture: This topic explains how a Business Architecture is developed with the TOGAF ADM.</li></ul>
Thema 2	<ul style="list-style-type: none"><li>• Introduction to TOGAF Business Architecture Foundation: This topic gives aspiring TOGAF business architects basic knowledge about the Business Architecture Foundation.</li></ul>
Thema 3	<ul style="list-style-type: none"><li>• Enterprise Architecture and the TOGAF Standard: In this topic of the OGBA-101 exam, TOGAF business architects learn about the contents of the TOGAF framework, the TOGAF Architecture Development Method (ADM), and the TOGAF Library.</li></ul>
Thema 4	<ul style="list-style-type: none"><li>• Key Terminologies: The focal point of this TOGAF Business Architecture Foundation exam topic is about key terminologies of the Business Architecture.</li></ul>
Thema 5	<ul style="list-style-type: none"><li>• TOGAF ADM: This topic of the OGBA-101 exam gives TOGAF business architects an introduction to the TOGAF ADM, its objectives, and usage.</li></ul>

## OGBA-101 Fragen Und Antworten, OGBA-101 Lernhilfe

Alle Menschen haben ihre eigenes Ziel, aber wir haben ein gleiches Ziel, dass Sie The Open Group OGBA-101 Prüfung bestehen. Dieses Ziel zu erreichen ist vielleicht nur ein kleiner Schritt für Ihre Entwicklung im IT-Gebiet. Aber es ist der ganze Wert unserer The Open Group OGBA-101 Prüfungssoftware. Wir tun alles wir können, um die Prüfungsaufgaben zu erweitern. Und die

Prüfungsunterlagen werden von unsere IT-Profis analysiert. Dadurch können Sie unbelastet und effizient benutzen. Um zu garantieren, dass die The Open Group OGBA-101 Unterlagen, die Sie benutzen, am neuesten ist, bieten wir einjährige kostenlose Aktualisierung.

## The Open Group TOGAF Business Architecture Foundation Exam OGBA-101 Prüfungsfragen mit Lösungen (Q104-Q109):

### 104. Frage

Complete the sentence. The TOGAF standard covers the development of four architecture domains. Business. Data. Technology and \_\_\_\_\_.

- A. Capability
- B. Transition
- C. Segment
- **D. Application**

**Antwort: D**

Begründung:

The TOGAF standard covers the development of four architecture domains: Business, Data, Technology, and Application. The Application Architecture domain defines the applications required to process the data and support the business functions. The TOGAF standard describes the development of four architecture domains, which are considered its pillars. These are Business, Data, Technology, and Application. The Application Architecture domain provides a blueprint for the individual application systems to be deployed, their interactions, and their relationships to the core business processes of the organization.

### 105. Frage

What is the relationship labeled Y?

- **A. Enables**
- B. Consists of
- C. Receives
- D. Creates

**Antwort: A**

Begründung:

In TOGAF, the relationship labeled "Y" as "Enables" typically refers to how one element of the architecture facilitates or supports the functioning of another element. Here's a detailed explanation:

\* Relationship Definition:

\* Enables: This relationship indicates that one component (e.g., a business capability, process, or technology) enables or supports another component to function or achieve its objectives. It shows a dependency where the presence or effectiveness of one element is necessary for the other to perform effectively.

\* Examples in TOGAF:

\* Business Capabilities and Processes: A business capability may enable specific business processes. For instance, the capability of "Customer Relationship Management" enables processes like "Customer Support" and "Sales".

\* Technology and Applications: A particular technology infrastructure may enable the operation of various business applications, ensuring they can deliver the required functionalities.

\* TOGAF ADM Phases:

\* Phase B: Business Architecture: Identifying how different business capabilities enable business processes helps in understanding the interdependencies and ensuring that all necessary capabilities are developed and supported.

\* Phase C: Information Systems Architectures: In this phase, identifying how technology enables business applications and data flows is crucial for designing a coherent and efficient architecture.

\* Importance:

\* Understanding enabling relationships helps in ensuring that all necessary components are in place and functioning correctly to support the overall architecture. It also helps in identifying critical dependencies that need to be managed during implementation.

In summary, the relationship labeled "Enables" describes how one component facilitates or supports the functioning of another, ensuring that the architecture is coherent and all dependencies are managed effectively.

### 106. Frage

What information does the Architecture Requirements Repository within the Architecture Repository hold?

- A. A set of guidelines, templates, and patterns to support the development of architecture requirements
- B. The parameters and structures to support governance of architecture requirements
- C. A log of the governance activity related to architecture requirements
- **D. The architecture requirements which have been agreed with the Architecture Board**

**Antwort: D**

Begründung:

The Architecture Requirements Repository within the TOGAF Architecture Repository holds the architecture requirements that have been agreed with the Architecture Board. Here's a detailed explanation:

\* Architecture Requirements Repository:

\* This repository is a part of the larger Architecture Repository in TOGAF, which is used to store and manage all the artifacts related to the architecture.

\* Content of the Repository:

\* Agreed Requirements: It includes the architecture requirements that have been formally reviewed and agreed upon by the Architecture Board. These requirements are essential for guiding the development and implementation of the architecture.

\* Governance and Compliance: The repository ensures that these requirements are accessible and can be used to enforce governance and compliance throughout the architecture development process.

\* TOGAF ADM Phases:

\* Phase A: Architecture Vision: Initial requirements are identified and refined.

\* Phase B, C, D: Requirements are further detailed and agreed upon.

\* Architecture Governance: Throughout these phases, the agreed requirements are stored in the repository to ensure they guide the architecture work and are adhered to.

\* Purpose and Benefits:

\* Centralized Repository: Having a centralized repository for agreed requirements ensures that all stakeholders have access to the current and approved requirements, facilitating better coordination and compliance.

\* Traceability: It provides traceability of requirements throughout the architecture development lifecycle, ensuring that all decisions and designs are aligned with agreed requirements.

In summary, the Architecture Requirements Repository holds the architecture requirements that have been agreed with the Architecture Board, providing a centralized and authoritative source for guiding architecture development and ensuring compliance.

### 107. Frage

Complete the sentence. A business model is a description of the rationale for how an organization creates, delivers, and captures

- A. strategy
- B. business function
- C. best practices
- **D. value**

**Antwort: D**

Begründung:

A business model is a description of the rationale for how an organization creates, delivers, and captures value<sup>4</sup>. Value is defined as the worth or importance of something to someone<sup>6</sup>. A business model explains what value proposition the organization offers to its customers, what revenue streams it generates from delivering the value proposition, what cost structure it incurs to create and deliver the value proposition, what key resources and activities are needed to create and deliver the value proposition, and what key partnerships are leveraged to support the value creation and delivery process<sup>4</sup>.

### 108. Frage

Consider the following graphic illustrating a method supporting the TOGAF ADM.

What does the method help identify?

- **A. Alternative Target Architectures**
- B. Solution Building Blocks
- C. Business Scenarios
- D. Architecture Solutions

## Antwort: A

### Begründung:

The graphic illustrates a method for developing alternative target architectures in Phase E of the TOGAF ADM1. The method involves identifying and evaluating candidate architectures based on criteria such as business value, cost, risk, and feasibility<sup>1</sup>. The method helps to identify the most suitable architecture solution for the enterprise.

<https://pubs.opengroup.org/togaf-standard/adm-techniques/chap10.html>

The graphic illustrates a method that supports the TOGAF ADM by identifying and evaluating alternative target architectures. The process begins with a vision, influenced by principles and requirements, leading to the consideration of alternatives. Each alternative is assessed based on different criteria, leading to the selection of the most suitable target architecture. This is consistent with the TOGAF approach of developing a set of potential architectures and then selecting the one that best meets the enterprise's needs.
