HPE Hybrid Cloud Solutions Sample Questions (Q11-Q16):

NEW QUESTION # 11
A customer wants a new server for a database workload.
What are the most important factors to consider? (Select two.)

- A. processor speed
- B. form factor
- C. amount of memory installed
- D. support level
- E. power supply wattage

Answer: A,C

Explanation:
Understanding the Requirements:
The customer needs a new server specifically for a database workload.
Database workloads typically require high performance and adequate memory to handle large amounts of data efficiently.
Factors to Consider:
A: Processor Speed: The speed of the processor is crucial for database performance. Faster processors can handle more transactions per second and process queries more quickly.
B: Support Level: While important for ongoing maintenance and troubleshooting, it is not directly related to the performance of the database workload.
C: Amount of Memory Installed: Memory (RAM) is critical for database operations. More memory allows for larger caches, faster query responses, and better overall performance.
D: Form Factor: Important for physical deployment considerations (e.g., rack vs. tower), but not a primary factor for database performance.
E: Power Supply Wattage: Ensuring sufficient power is essential, but it is generally a baseline requirement rather than a primary performance factor.
Why Processor Speed and Amount of Memory Installed are the Correct Answers:
Processor Speed: Directly affects the computational power available to process database transactions and queries.
Amount of Memory Installed: Directly impacts the ability of the server to store and access data quickly, enhancing database performance by reducing the need to access slower disk storage.

These considerations ensure that the server is equipped to handle the demands of a database workload, providing the necessary performance and responsiveness.

NEW QUESTION # 12
your customer has an existing MSA 2060 with 20 SAS drives. They want to enhance the performance by adding SSD drives in the four remaining slots What mandatory option must be sold with the four SSD drives?

- A. HPE Advanced Data services suite license
- B. HPE MSA Health Check Tool
- C. HPE Data Services Cloud Console subscription
- D. HPE PointNext Advisory & professional services

Answer: A

Explanation:
According to HPE, this license enables advanced features such as performance tiering and RAID tier affinity for HPE MSA 2060 storage arrays1. These features can help enhance the performance of SSD drives by automatically moving hot data to faster drives and keeping data on the same RAID group1.

NEW QUESTION # 13

Which management tool helps HPE customers simplify the management of HPE ProLiant-based NAS solutions?

- A. HPE GreenLake Compute Ops Manager
- B. HPE StoreEasy Management Console
- C. HPE Storage Management Utility v4
- D. HPEOneView

Answer: B

Explanation:
HPE StoreEasy Management Console: This tool is designed specifically for managing HPE StoreEasy NAS solutions. It provides a user-friendly interface for managing storage, shares, quotas, and other NAS-specific features, making it easier for customers to manage their HPE ProLiant-based NAS solutions.

NEW QUESTION # 14
Your customer wants a new server tor a File & print workload.
What are the most important factors to consider?(Select two.)

- A. storage capacity
- B. transfer rate
- C. form factor
- D. support level
- E. power supply wattage

Answer: A,C

Explanation:
Explanation
This is because a file and print workload requires a server that can store and share large amounts of data with multiple users and devices. Therefore, the server should have enough storage capacity to meet the current and future data needs of the customer. The form factor of the server also matters because it determines how much space the server occupies and how easy it is to install and maintain. Depending on the customer's preferences and constraints, they may choose a tower, rack or blade server.

NEW QUESTION # 15
How does HPE ProLiant support hybrid cloud environments?

- A. By providing high-performance servers for on-premises and cloud-based workloads
- B. By offering a range of cloud management and orchestration tools
- C. By providing cloud-based infrastructure services

Answer: A

Explanation:
HPE ProLiant provides organizations with a range of high-performance servers that are optimized for both on-premises and cloud-based workloads. It enables organizations to build and manage hybrid cloud environments more effectively by providing advanced management, security, and automation capabilities. HPE ProLiant also supports integration with other HPE and third-party tools, making it easier for organizations to manage their hybrid cloud environments more effectively.
