

High-quality JN0-232 Exam Score—Authoritative Reliable Mock Test Providers for JN0-232: Security, Associate (JNCIA-SEC)

P.S. Free & New JN0-232 dumps are available on Google Drive shared by RealExamFree: <https://drive.google.com/open?id=17vgOYNJ1TaNaLvsYSPiaBlaUMUa-itKB>

In order to help customers solve problems, our company always insist on putting them first and providing valued service. We deeply believe that our JN0-232 question torrent will help you pass the exam and get your certification successfully in a short time. Maybe you cannot wait to understand our JN0-232 Guide questions; we can promise that our products have a higher quality when compared with other study materials. At the moment I am willing to show our JN0-232 guide torrents to you, and I can make a bet that you will be fond of our products if you understand it.

To help you get to know the exam questions and knowledge of the JN0-232 practice exam successfully and smoothly, our experts just pick up the necessary and essential content in to our JN0-232 test guide with unequivocal content rather than trivia knowledge that exam do not test at all. To make you understand the content more efficient, our experts add charts, diagrams and examples in to JN0-232 Exam Questions to speed up you pace of gaining success. So these JN0-232 latest dumps will be a turning point in your life. And on your way to success, they can offer titanic help to make your review more relaxing and effective. Moreover, the passing certificate and all benefits coming along are not surreal dreams anymore.

Reliable JN0-232 Mock Test & Related JN0-232 Exams

When choosing our JN0-232 practice materials, we offer a whole package of both practice materials and considerate services. We provide our time-saved, high efficient JN0-232 actual exam containing both functions into one. There is a whole profession of experts who work out the details of our JN0-232 Study Guide. So all points of questions are wholly based on the real exam and we won the acclaim from all over the world.

Juniper Security, Associate (JNCIA-SEC) Sample Questions (Q52-Q57):

NEW QUESTION # 52

Click the Exhibit button.

Referring to the exhibit, which two statements are correct? (Choose two.)

- A. The NextGen Web Filtering type is being used.
- B. The SRX firewall does not have an SSL proxy configuration.
- C. This is a custom Web filtering block message.
- D. The URL matches a predefined Web filtering category.

Answer: A,D

Explanation:

From the exhibit:

* The user attempted to access <https://www.wikipedia.org>.

* The block page indicates:

* CATEGORY: NG_Reference

* REASON: BY_PRE_DEFINED

* The header states: "Juniper Web Filtering has been set to block this site." Analysis of options:

* Option A: Correct. The log shows "REASON: BY_PRE_DEFINED," which means the site was blocked because it matched a predefined category in the Web filtering database.

* Option B: Correct. The category "NG_Reference" indicates that the NextGen (Enhanced/Cloud-based) Web Filtering type is being used.

* Option C: Incorrect. The exhibit does not provide any information about SSL proxy configuration; it only shows that the HTTPS site was blocked.

* Option D: Incorrect. The block page shown is the standard Juniper default block page, not a custom message.

Correct Statements: The URL matches a predefined Web filtering category, and the NextGen Web Filtering type is being used.

NEW QUESTION # 53

What are two system-defined zones created on the SRX Series Firewalls? (Choose two.)

- A. null
- B. management
- C. DMZ
- D. junos-host

Answer: A,D

Explanation:

On SRX Series Firewalls, Junos OS automatically creates system-defined zones that have special functions:

* Null zone (Option A): A predefined discard zone. By default, all interfaces belong to the null zone until assigned to a user-defined zone. Traffic destined to the null zone is dropped.

* Junos-host zone (Option B): A predefined functional zone that allows security policies to control traffic directed to the SRX device itself (management traffic, such as SSH, HTTP, SNMP).

* Management zone (Option C): There is a predefined management functional zone, but it is not called "management" as a system-defined security zone.

* DMZ (Option D): A DMZ zone must be explicitly created by the administrator, it is not system-defined.

Correct Zones: null, junos-host

Reference:Juniper Networks -Security Zones and Functional Zones, Junos OS Security Fundamentals.

NEW QUESTION # 54

Which two statements are true about the NextGen Web Filtering (NGWF) feature on an SRX Series device?
(Choose two.)

- A. The NGWF feature consults your local lists before consulting the Juniper cloud.
- B. The NGWF feature consults the Juniper cloud before consulting your local lists.
- C. The NGWF feature requires a license.
- D. The NGWF feature does not require a license.

Answer: A,C

Explanation:

* License Requirement (Option B):NextGen Web Filtering (NGWF) is a licensed feature on SRX devices. Without a license, the service cannot operate.

* Local vs. Cloud Lists (Option C):NGWF checkslocal block/allow lists first. If the URL does not match locally, the request is then checked against the Juniper cloud database.

* Option A:Incorrect, since the cloud is only consulted if the URL is not in the local list.

* Option D:Incorrect, as NGWF requires a valid subscription/license.

Correct Statements:NGWF requires a license, and it checks local lists before cloud lookup.

NEW QUESTION # 55

When does screening occur in the flow module?

- A. during route lookup
- B. during policy lookup
- C. after session lookup
- D. before session lookup

Answer: D

Explanation:

In Juniper SRX flow-based packet processing, theflow moduleis responsible for security functions such as screening, session management, NAT, and policy enforcement. The processing order is critical:

* Screens are applied before any session lookup.This ensures that packets are inspected for anomalies, floods, or protocol violations before consuming resources for session management. Examples ofthese screens include TCP SYN flood protection, ICMP flood protection, and port scanning protection.

* After screening, thesession lookupoccurs. At this point, the firewall checks whether the packet belongs to an existing session in the session table. If a matching session is found, the packet bypasses policy evaluation and is forwarded according to the session state.

* If no existing session is found, the packet continues throughroute lookup, NAT processing, and security policy evaluationbefore a new session is created.

Thus,screening occurs before the session lookup, protecting the system early in the flow process. This design ensures efficiency by dropping malicious or malformed traffic before allocating session resources.

NEW QUESTION # 56

Which two statements about the null zone on an SRX Series Firewall are correct? (Choose two.)

- A. A logical interface configured in a security zone removes it from the null zone.
- B. Traffic rejected by the security policy is sent to the null zone for logging.
- C. The null zone can be configured to accept traffic to or from the SRX Series Firewall.
- D. Transit interfaces are assigned to the null zone by default.

Answer: A,D

Explanation:

* Default assignment: All logical interfaces are placed in the null zone by default until explicitly assigned to a user-defined security zone (Option A is correct).

* Removal from null zone: Once an interface is assigned to a security zone, it is removed from the null zone (Option D is correct).

* No traffic acceptance: The null zone is a discard zone; it cannot be configured to accept any traffic (Option C is incorrect).

* Policy behavior: Traffic rejected by a security policy is dropped according to the policy action. It is not forwarded to the null zone for logging (Option B is incorrect).

Correct Statements: A and D

Reference: Juniper Networks - Security Zones and the Null Zone, Junos OS Security Fundamentals.

NEW QUESTION # 57

.....

In this rapid rhythm society, the competitions among talents are growing with each passing day, some job might ask more than one's academic knowledge it might also require the professional Juniper certification and so on. It can't be denied that professional certification is an efficient way for employees to show their personal Security, Associate (JNCIA-SEC) abilities. In order to get more chances, more and more people tend to add shining points, for example a certification to their resumes. What you need to do first is to choose a right JN0-232 Exam Material, which will save your time and money in the preparation of the JN0-232 exam. Our JN0-232 latest questions is one of the most wonderful reviewing Security, Associate (JNCIA-SEC) study training dumps in our industry, so choose us, and together we will make a brighter future.

Reliable JN0-232 Mock Test: <https://www.realexamfree.com/JN0-232-real-exam-dumps.html>

The JN0-232 exam questions are so scientific and reasonable that you can easily remember everything of the JN0-232 exam. With the top-notch and updated Juniper JN0-232 test questions you can pass your Security, Associate (JNCIA-SEC) JN0-232 exam successfully, the most functions of our Reliable JN0-232 Mock Test - Security, Associate (JNCIA-SEC) exam dumps are to help customers save more time, and make customers relaxed, Juniper JN0-232 Exam Score Passwords are case-sensitive, so you should ensure that Caps Lock is not enabled when you enter your user name and password.
