NEW QUESTION # 49

What are the key fields used to define a delivery document in SAP Extended Warehouse Management customizing? Note: There are 2 correct answers to this question.

- A. Document category
- B. Item category
- C. Document type
- D. Item type

Answer: A,C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

A delivery document in EWM is defined by its document type and category. Option A ("Document type") is correct as it specifies the delivery's purpose (e.g., "INB" for inbound), configured in SPRO: SCM Extended Warehouse Management > Delivery Processing > Document Types. Option D ("Document category") is correct because it classifies the document (e.g., "F" for inbound, "O" for outbound), linking it to ERP. Item category (B) and item type (C) are relevant for items within the delivery, not the document header definition.

NEW QUESTION # 50

With SAP S/4HANA embedded EWM or EWM 9.5, you can skip certain document categories. Which document category combination is still mandatory?

- A. An outbound delivery request and an outbound delivery
- B. A production material request and a stock transfer
- C. An outbound delivery order and an outbound delivery
- D. An outbound delivery request and an outbound delivery order

Answer: C

Explanation:

Mandatory Document Categories

* Outbound Delivery Order and Outbound Delivery (D): This document flow remains mandatory as it represents the core process of shipping goods from a warehouse.

Excluded Options

* A (Outbound delivery request and delivery): This combination is part of planning but not mandatory.

* B (Production material request and stock transfer): Relevant for production processes but not a core outbound requirement.

* C (Delivery request and delivery order): Intermediate steps can be skipped in embedded EWM.
