Our company has successfully created ourselves famous brands in the past years, and all of the PEGACPRSA22V1 valid study guide materials from our company have been authenticated by the international authoritative institutes and cater for the demands of all customers at the same time. We are attested that the quality of the PEGACPRSA22V1 Test Prep from our company have won great faith and favor of customers. We persist in keeping creating the best helpful and most suitable PEGACPRSA22V1 study practice question for all customers.

The PEGACPRSA22V1 Certification Exam is a challenging and comprehensive exam that requires a deep understanding of Pega Robotics System Architect. Certified Pega Robotics System Architect 22 certification is highly valued in the industry, as it demonstrates the candidate's expertise in RPA and their ability to design and implement Pega Robotics solutions. Certified Pega Robotics System Architect 22 certification is ideal for professionals who are involved in the development and implementation of Pega Robotics solutions in their organizations.

Free PDF PEGACPRSA22V1 PDF Dumps Files & Leading Offer in Qualification Exams & Authorized Learning PEGACPRSA22V1 Materials

Our PEGACPRSA22V1 Test Braindumps boost high hit rate and can stimulate the exam to let you have a good preparation for the exam. Our PEGACPRSA22V1 prep torrent boost the timing function and the content is easy to be understood and has been simplified the important information. Our PEGACPRSA22V1 test braindumps convey more important information with less amount of answers and questions and thus make the learning relaxed and efficient. If you fail in the exam we will refund you immediately. All Certified Pega Robotics System Architect 22 exam torrent does a lot of help for you to pass the exam easily and successfully.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q59-Q64):

NEW QUESTION # 59

You are designing an attended project for a banking customer. This project requires you to add new customers from an application to a combo box in a custom user surface.

Which steps do you take to gain access to the methods of the combo box items within an automation?

- A. Open the Globals tab, filter for the method that you want to access, and then drag the method to the design surface.
- B. Select the combo box in the Palette tab of an automation, and then filter for the method that you want to access in the properties grid.
- C. Select the combo box in a design form of the user interface to open the Select action window.
- **D. Drag the combo box to the automation surface to open the Select action dialog box, and then filter for the method that you want to access.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

When working with UI controls such as combo boxes in a custom user interface (Windows form or User Interaction form), you can expose their methods and events by dragging the control from the Palette or Object Explorer to the automation design surface. According to the Pega Robotics System Design and Implementation Guide, section "Accessing Control Methods and Properties in Automations":

"To access a control's methods or events in an automation, drag the control (such as a combo box or text box) from the Object Explorer or Palette to the automation surface.

The Select Action dialog box appears, allowing you to filter and choose the specific method or event (for example, AddItem, RemoveItem, or Clear)." Detailed Reasoning:

* A. Drag the combo box to the automation surface... - Correct. This opens the Select Action dialog, exposing all available methods and events for that control.

* B. Open the Globals tab... - Incorrect. The combo box methods are not global; they belong to a specific UI form.

* C. Select the combo box in a design form... - Incorrect. This action edits UI layout, not automation logic.

* D. Select the combo box in the Palette tab... - Incorrect. The properties grid shows attributes, not callable methods.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Using Control Methods and Events in Automations section (Pega Robotics 19.1 and later).

NEW QUESTION # 60

Runtime produces an error when debugging a solution. The error message references that a control does not have the necessary value to complete an activity. The control depends upon the completion of a second activity in another project to provide its value.

Which two debugging options provide a benefit when referencing threads for issue resolution? (Choose two.)

- **A. Use the Automation Playback**
- **B. Add studio execution log entries**
- C. Dissert a log file for propagating data
- D. Insert Try and Catch components to an automation

Answer: A,B

NEW QUESTION # 61

In which two ways do the two publishers, Log4Net and File Publisher, differ? (Choose two.)

- A. Log4Net can append new data to the log file.
- **B. Log4Net can provide a minimum number of log files to retain.**
- **C. Log4Net can set the log file size.**
- D. Log4Net can change the directory location of the log file.

Answer: B,C

Explanation:

NEW QUESTION # 62

You are debugging a project with several automations. You are particular about one specific value in a procedure automation and want to monitor the value while debugging.

Which debugging window do you use during the debugging process?

- A. Breakpoints
- **B. Threads**
- C. Automation Watches
- D. Locals

Answer: B

NEW QUESTION # 63

You are deploying a robotic project to Pega Robot Manager. Which file stores the Pega Robot Manager server settings?

- A. PegaRuntimeConfig.xml
- **B. CommonConfig.xml**
- C. PegaConfig.xml
- D. PegaStudioConfig.xml

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

When deploying robotic solutions to Pega Robot Manager, the connection and authentication details - such as Robot Manager server URL, authentication mode, and registration configuration - are stored in the file CommonConfig.xml.

This configuration file is shared between both Pega Robot Studio and Pega Robot Runtime, ensuring that both use consistent connectivity settings.

According to the Pega Robotics System Design and Implementation Guide, section "Pega Robot Manager Integration and Configuration Files":

"The CommonConfig.xml file contains shared configuration information that is used by both Pega Robot Studio and Pega Robot Runtime.

It includes global settings such as:

- * Connection information for Pega Robot Manager (URL, ports, authentication)
- * Deployment configuration values
- * Environment registration and runtime connectivity settings.

PegaRuntimeConfig.xml and PegaStudioConfig.xml are used for local settings only, while CommonConfig.xml stores the Robot Manager connection configuration used during deployment." Detailed Reasoning:

- * A. PegaStudioConfig.xml - Used for developer-specific configuration within Robot Studio, not for deployment or server settings.
- * **B. CommonConfig.xml - Correct.** This file contains the Robot Manager connectivity configuration and shared settings.
- * C. PegaRuntimeConfig.xml - Controls runtime behavior on client machines, not Robot Manager connections.
- * D. PegaConfig.xml - Not a valid configuration file in Pega Robotics.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Pega Robot Manager Configuration and CommonConfig.xml Overview section (Pega Robotics 19.1 and later).

NEW QUESTION # 64

.....

We provide the Pegasystems PEGACPRSA22V1 exam questions in a variety of formats, including a web-based practice test, desktop practice exam software, and downloadable PDF files. SureTorrent provides proprietary preparation guides for the certification exam offered by the Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) exam dumps. In addition to containing numerous questions similar to the Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) exam, the Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) exam questions are a great way to prepare for the Pegasystems PEGACPRSA22V1 exam dumps.
