

# DevOps-Foundation Exam Simulator Fee & Exam DevOps-Foundation Consultant

BONUS!!! Download part of Exam4PDF DevOps-Foundation dumps for free: [https://drive.google.com/open?id=1\\_\\_5b6mstH3M9XmbQALJHYnSTCHXy-FHm](https://drive.google.com/open?id=1__5b6mstH3M9XmbQALJHYnSTCHXy-FHm)

To achieve this objective the Exam4PDF is offering some important and easy-to-use features in Exam4PDF DevOps-Foundation practice test questions. The first feature of Exam4PDF DevOps-Foundation exam questions is its availability of PeopleCert DevOps Foundation v3.6 Exam DevOps-Foundation exam questions in three formats. These formats hold a high demand in the market and are recommended for instant PeopleCert DevOps-Foundation exam preparation. The name of these three Exam4PDF DevOps-Foundation exam questions formats is PDF dumps file, desktop practice test software, and web-based practice test software. All these Exam4PDF DevOps-Foundation Exam Questions formats are easy to use and compatible with all devices, operating systems, and the latest browsers. Choose any Exam4PDF DevOps-Foundation exam questions format that suits your budget and fulfills your PeopleCert DevOps Foundation v3.6 Exam DevOps-Foundation exam preparation need and start preparing today.

The PeopleCert DevOps Foundation v3.6 Exam (DevOps-Foundation) certification exam is one of the hottest and most industrial-recognized credentials that has been inspiring beginners and experienced professionals since its beginning. With the PeopleCert DevOps Foundation v3.6 Exam (DevOps-Foundation) certification exam successful candidates can gain a range of benefits which include career advancement, higher earning potential, industrial recognition of skills and job security, and more career personal and professional growth.

## Updated Peoplecert DevOps-Foundation Exam Questions in PDF Document

Our experts group collects the latest academic and scientific research results and traces the newest industry progress in the update of the DevOps-Foundation study materials. Then the expert team processes them elaborately and compiles them into the test bank. Our system will timely and periodically send the latest update of the DevOps-Foundation Study Materials to our clients. So the clients can enjoy the results of the latest innovation and achieve more learning resources. The credits belong to our diligent and dedicated professional innovation team and our experts.

### Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI</li> <li>CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.</li> </ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Measurement, Metrics, and Reporting:</b> This section of the exam measures the skills of DevOps engineers and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and AIOps in reporting and decision-making.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Exploring DevOps:</b> This section of the exam measures the skills of DevOps engineers and covers the foundations of DevOps, including its emergence as a critical discipline in the digital era. It introduces learners to the basic purpose, evolution, and significance of DevOps in modern software and infrastructure environments.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Business and Technology Frameworks:</b> This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Culture, Behaviours, Operating Models:</b> This section of the exam measures the skills of DevOps engineers and covers how to assess and evolve organisational culture in relation to DevOps transformation. It includes concepts such as Cultural Debt, Behavioural Models, and Organisational Maturity, helping professionals understand team dynamics and readiness for change.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• <b>Key DevOps Practices:</b> This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• <b>Sharing, Shadowing and Evolving:</b> This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.</li> </ul>

## Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q81-Q86):

### NEW QUESTION # 81

An organization is architecting a DevOps toolchain that includes products from both open source and proprietary software providers.

Which of the following is necessary for applications within the toolchain to connect efficiently and effectively?

- A. Microservices
- **B. Application Programming Interfaces**
- C. Open source applications
- D. Containers

**Answer: B**

Explanation:

A DevOps toolchain is an integrated set of tools that supports the entire software delivery lifecycle—planning, coding, building, testing, releasing, deploying, operating, and monitoring. Regardless of whether tools are open source or proprietary, their ability to work together depends on Application Programming Interfaces (APIs).

APIs define how different software components communicate and exchange data. In a DevOps context, APIs enable:

- \* Automation by allowing tools to trigger actions in other tools
- \* Data flow between systems (e.g., CI pipelines updating ticketing systems)
- \* Integration across heterogeneous environments

A (open source applications) is about licensing, not integration. B (containers) package and run applications consistently but do not inherently integrate tools. D (microservices) is an architectural style for applications, not the integration mechanism between delivery tools.

Therefore, C-APIs—are essential for efficient, effective toolchain integration.

### NEW QUESTION # 82

Which of the following of Continuous Delivery does NOT contribute positively to SDO Performance?

- A. Trunk-based development
- B. Cloud
- C. Heavyweight Change Process
- D. Culture of psychological safety

**Answer: C**

Explanation:

High-performing organizations use Continuous Delivery practices to improve Software Delivery and Operational (SDO) performance.

\* B: Psychological safety encourages open communication, incident reporting, and learning from failures.

\* C: Trunk-based development reduces integration issues and supports continuous integration/delivery.

\* D: Cloud technologies provide scalable, on-demand environments that speed up delivery and testing.

On the other hand, A-a heavyweight change process-slows down delivery, increases lead time, and often fails to improve change success rates. Research cited in Accelerateshows that manual, centralized change approvals correlate with lower performance, while automated, peer-reviewed changes produce better reliability and faster delivery.

References:

PeopleCert DevOps Foundation v3.6 - Continuous Delivery and Change Management Accelerate- Change Approval Process Findings  
The DevOps Handbook- Deployment Pipeline Best Practices

### NEW QUESTION # 83

Why are Lean tools and practices critical to DevOps?

- A. They help ensure that teams are organized into collaborative communities
- B. They help identify waste and assist in the creation of improvement practices
- C. They help developers identify requirements for minimum viable products and services
- D. They help ensure that core (soft) skills were taught to software developers

**Answer: B**

Explanation:

Lean tools and practices are foundational to DevOps because they help organizations systematically identify and eliminate waste, optimize value delivery, and continuously improve processes.

\* Lean thinking focuses on value stream mapping, reducing delays, bottlenecks, over-processing, handoffs, rework, and unnecessary tasks-core to making DevOps successful.

\* Option D, "They help identify waste and assist in the creation of improvement practices," perfectly captures this focus.

Extract-style reference:

"Lean enables teams to identify value and non-value-added activities and to use continuous improvement techniques such as Kaizen, value stream mapping, and removing waste."

-DevOps Handbook

PeopleCert DevOps Foundation v3.6: Lean tools like Value Stream Mapping, 5S, and Kaizen are cited as critical enablers for optimizing the flow and improving IT and business alignment.

### NEW QUESTION # 84

What makes the concept of learning through immersion particularly useful in a DevOps culture?

- A. People learn from subject matter experts
- B. People learn from their failures in a safe environment
- C. People learn by doing
- D. All of the Above

**Answer: D**

Explanation:

Learning through immersion is powerful in DevOps because:

- \* People learn by doing (A)
- \* People learn from subject matter experts (B)
- \* People learn from failures in a safe environment (C)
- \* All of the above (D) are true

DevOps encourages hands-on, real-world, collaborative, and safe-to-fail learning environments.

Extract-style reference:

"Immersive learning, including hands-on labs, peer interactions, and blameless retrospectives, is vital to building DevOps capabilities."

-DevOps Handbook, Accelerate

PeopleCert DevOps Foundation v3.6: Calls for learning culture, blamelessness, and experimentation.

### NEW QUESTION # 85

What is NOT a feature of Safety Culture?

- A. Blameless post-mortems
- B. Valuing incidents
- C. Giving thanks for learning opportunities
- **D. Creating Single Points of Failures (SPOFs)**

**Answer: D**

Explanation:

Creating Single Points of Failure (SPOFs) is not a feature of Safety Culture—in fact, it's the opposite.

\* Safety Culture in DevOps promotes blameless post-mortems, valuing incidents as learning opportunities, and thanking contributors for uncovering weaknesses.

\* SPOFs increase risk and discourage experimentation.

Extract-style reference:

"Safety Culture is built on blamelessness, psychological safety, and learning from failure, not punishment.

SPOFs are an anti-pattern that increases fragility."

-The DevOps Handbook

PeopleCert DevOps Foundation v3.6: Stresses the importance of a safe, collaborative environment for innovation.

### NEW QUESTION # 86

.....

There are three different versions provided by our company. Every version is very convenient and practical. The three different versions of our DevOps-Foundation study torrent have different function. Now I am willing to show you the special function of the PDF version of DevOps-Foundation test torrent. If you prefer to read paper materials rather than learning on computers, the PDF version of our DevOps-Foundation Guide Torrent must be the best choice for you. Because the study materials on the PDF version are printable, you can download our DevOps-Foundation study torrent by the PDF version and print it on papers.
