

# Valid LEED-AP-Homes Exam Overview Offer You The Best Authorized Test Dumps | LEED AP Homes (Residential) Exam

BONUS!!! Download part of BraindumpQuiz LEED-AP-Homes dumps for free: [https://drive.google.com/open?id=18OYRZ1ssc1bt8bmBg\\_siHhYR5m6l\\_OIc](https://drive.google.com/open?id=18OYRZ1ssc1bt8bmBg_siHhYR5m6l_OIc)

It is known to us that our LEED-AP-Homes study materials have been keeping a high pass rate all the time. There is no doubt that it must be due to the high quality of our study materials. It is a matter of common sense that pass rate is the most important standard to testify the LEED-AP-Homes study materials. The high pass rate of our study materials means that our products are very effective and useful for all people to pass their exam and get the related certification. So if you buy the LEED-AP-Homes Study Materials from our company, you will get the certification in a shorter time.

## USGBC LEED-AP-Homes Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Materials &amp; Resources: This section of the exam measures the skills of a Sustainability Specialist. It emphasizes the selection and management of eco-friendly materials, efficient usage of resources, and implementation of waste reduction strategies to support green residential construction.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Location &amp; Transportation: This section of the exam measures the skills of an Environmental Planner. It focuses on how homes integrate with their surroundings and connect to transportation networks, emphasizing sustainable siting strategies aligned with urban planning practices.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Regional Priority Credits: This section of the exam measures the skills of a Regional Performance Advisor. It covers specific environmental credits that reflect local priorities, enabling tailored certification strategies that align with regional ecosystems or regulatory contexts.</li></ul>

# LEED-AP-Homes Authorized Test Dumps | Accurate LEED-AP-Homes Answers

These USGBC LEED-AP-Homes exam questions have a high chance of coming in the actual LEED-AP-Homes test. You have to memorize these LEED-AP-Homes questions and you will pass the USGBC LEED-AP-Homes test with brilliant results. The price of USGBC LEED-AP-Homes updated exam dumps is affordable.

## USGBC LEED AP Homes (Residential) Exam Sample Questions (Q88-Q93):

### NEW QUESTION # 88

Energy simulation software used for ENERGY STAR Homes certification is approved by the:

- A. Environmental Protection Agency (EPA)
- B. Department of Energy (DOE)
- C. Residential Energy Services Network (RESNET)
- D. U.S. Green Building Council (USGBC)

**Answer: C**

Explanation:

The LEED for Homes Rating System (v4) integrates ENERGY STAR Homes certification as part of the Energy and Atmosphere (EA) category, specifically for the EA Prerequisite: Minimum Energy Performance and EA Credit: Annual Energy Use. ENERGY STAR Homes certification requires energy simulation software to model the home's performance, and this software must be approved by a specific authority.

According to the LEED Reference Guide for Homes Design and Construction (v4):

EA Prerequisite: Minimum Energy Performance

Projects pursuing ENERGY STAR for Homes certification must use energy simulation software accredited by the Residential Energy Services Network (RESNET) to demonstrate compliance with ENERGY STAR performance requirements.

Source: LEED Reference Guide for Homes Design and Construction, v4, Energy and Atmosphere Prerequisite: Minimum Energy Performance, p. 112.

The Residential Energy Services Network (RESNET) is the organization responsible for accrediting energy modeling software used for ENERGY STAR Homes certification, such as REM/Rate or Ekotrope. RESNET establishes standards for Home Energy Rating Systems (HERS) and ensures software accuracy for energy performance calculations.

The LEED v4.1 Residential BD+C rating system aligns with this:

EA Prerequisite: Energy Performance

ENERGY STAR Homes certification requires the use of RESNET-accredited energy modeling tools to verify performance targets, such as HERS index scores.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

While the Environmental Protection Agency (EPA) oversees the ENERGY STAR program, it does not directly approve the simulation software; that responsibility lies with RESNET.

Why not the other options?

Reference: LEED Reference Guide for Homes Design and Construction, v4, EA Prerequisite: Minimum Energy Performance, p. 112.

B). U.S. Green Building Council (USGBC): The USGBC administers LEED but does not approve ENERGY STAR software. It references ENERGY STAR requirements in LEED credits. Reference: LEED Reference Guide for Homes Design and Construction, v4, EA Prerequisite: Minimum Energy Performance, p. 112.

C). Environmental Protection Agency (EPA): The EPA manages ENERGY STAR but delegates software accreditation to RESNET for consistency in HERS ratings. Reference: ENERGY STAR Residential New Construction Program Requirements, accessed via [www.energystar.gov](http://www.energystar.gov).

The LEED AP Homes Candidate Handbook emphasizes EA prerequisites and credits, including ENERGY STAR integration, and references the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of RESNET's role.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Energy and Atmosphere Prerequisite: Minimum Energy Performance, p. 112.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org>)

/resources/leed-homes-design-and-construction-v4).

RESNET Standards, accessed via [www.resnet.us](http://www.resnet.us), confirming software accreditation.

### NEW QUESTION # 89

The primary purpose of the Thermal Enclosure Checklist is to:

- A. Perform preliminary air infiltration testing prior to HERS rater inspection
- **B. Inspect continuity of air barriers and quality of insulation installation**
- C. Evaluate site appropriateness for ground-source heat pump installation
- D. Inspect continuity of ductwork and quality of duct insulation

**Answer: B**

Explanation:

The LEED for Homes Rating System (v4) includes the Thermal Enclosure System Checklist as part of the Energy and Atmosphere (EA) Prerequisite: Minimum Energy Performance, ensuring the building envelope meets energy efficiency standards.

According to the LEED Reference Guide for Homes Design and Construction (v4):

EA Prerequisite: Minimum Energy Performance

The Thermal Enclosure System Checklist verifies the continuity of air barriers and the quality of insulation installation to minimize heat loss and air leakage, ensuring energy efficiency. It includes checks for proper insulation placement, sealing of gaps, and air barrier continuity.

Source: LEED Reference Guide for Homes Design and Construction, v4, Energy and Atmosphere Prerequisite: Minimum Energy Performance, p. 112.

The LEED v4.1 Residential BD+C Rating system confirms:

EA Prerequisite: Energy Performance

The primary purpose of the Thermal Enclosure Checklist is to inspect the continuity of air barriers and the quality of insulation installation to achieve a high-performance building envelope.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The correct answer is inspect continuity of air barriers and quality of insulation installation (Option B), as this is the primary purpose of the checklist.

Why not the other options?

Reference: LEED Reference Guide for Homes Design and Construction, v4, EA Credit: Heating and Cooling Distribution Systems, p. 126.

C). Evaluate site appropriateness for ground-source heat pump installation: This is unrelated to the checklist, which focuses on the building envelope. Reference: LEED Reference Guide for Homes Design and Construction, v4, EA Prerequisite: Minimum Energy Performance, p. 112.

D). Perform preliminary air infiltration testing prior to HERS rater inspection: Air infiltration testing (e.

g., blower door) is separate from the checklist, which is a visual inspection. Reference: LEED Reference Guide for Homes Design and Construction, v4, EA Credit: Air Infiltration, p. 124.

The LEED AP Homes Candidate Handbook emphasizes EA prerequisites, including the Thermal Enclosure Checklist, and references the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of air barrier and insulation inspection.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Energy and Atmosphere Prerequisite: Minimum Energy Performance, p. 112.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming checklist purpose.

### NEW QUESTION # 90

How does the size of a home affect LEED for Homes credits?

- A. Smaller homes are awarded credit in the Materials and Resources category because they use fewer materials
- B. Smaller homes are awarded credit in the Water Efficiency category because they use less water

- C. Smaller homes are awarded credit in the Energy and Atmosphere category because they use less energy
- D. Larger homes are awarded credit in the Energy and Atmosphere category because they save more energy

**Answer: C**

Explanation:

The LEED for Homes Rating System (v4) incorporates a Home Size Adjustment that adjusts the point threshold for certification based on the home's conditioned floor area and number of bedrooms, recognizing that smaller homes inherently use fewer resources and energy.

According to the LEED Reference Guide for Homes Design and Construction (v4):

Home Size Adjustment

Smaller homes require fewer points to achieve certification due to their lower energy and resource use, particularly in the Energy and Atmosphere (EA) category. The adjustment rewards smaller homes for their reduced energy consumption, as reflected in credits like EA Credit: Annual Energy Use, where smaller homes typically achieve lower HERS Index scores due to lower energy demand.

Source: LEED Reference Guide for Homes Design and Construction, v4, Introduction, p. 24; Energy and Atmosphere Credit: Annual Energy Use, p. 116.

The LEED v4.1 Residential BD+C rating system confirms:

Home Size Adjustment

Smaller homes benefit from a lower point threshold for certification, reflecting their inherently lower energy use, which aligns with EA Credit: Annual Energy Use by requiring less energy to achieve efficiency targets.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via LEED Online.

The correct answer is smaller homes are awarded credit in the Energy and Atmosphere category because they use less energy (Option D), as smaller homes have lower energy demands, making it easier to achieve energy efficiency credits.

Why not the other options?

Reference: LEED Reference Guide for Homes Design and Construction, v4, WE Credit: Indoor Water Use, p. 96.

B). Smaller homes are awarded credit in the Materials and Resources category because they use fewer materials: While smaller homes use fewer materials, no specific MR credit rewards this; the Home Size Adjustment affects overall points, not MR credits. Reference: LEED Reference Guide for Homes Design and Construction, v4, MR Credit: Environmentally Preferable Products, p. 160.

C). Larger homes are awarded credit in the Energy and Atmosphere category because they save more energy: Larger homes require more points due to higher energy use, not an advantage in EA credits.

Reference: LEED Reference Guide for Homes Design and Construction, v4, Introduction, p. 24.

The LEED AP Homes Candidate Handbook emphasizes the Home Size Adjustment and EA credits, and references the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of energy efficiency for smaller homes.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Introduction, p. 24; Energy and Atmosphere Credit: Annual Energy Use, p. 116.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming home size adjustment effects.

## NEW QUESTION # 91

What is the intent of Innovation Prerequisite: Preliminary Rating?

- A. To maximize opportunities for integrative, cost-effective adoption of green design and construction strategies
- B. To define the credits that can be achieved most cost-effectively
- C. To encourage exceptional performance for current credits and promote innovative performance in pioneering areas
- D. To define the mandatory certification level at the beginning and declare it to all parties

**Answer: A**

Explanation:

The LEED for Homes Rating System (v4) includes the Innovation (IN) Prerequisite: Preliminary Rating, which requires the project team to conduct an early assessment to identify achievable credits and set sustainability goals.

According to the LEED Reference Guide for Homes Design and Construction (v4):

IN Prerequisite: Preliminary Rating

The intent is to maximize opportunities for integrative, cost-effective adoption of green design and construction strategies by establishing a preliminary rating early in the design process. This involves identifying potential credits and setting performance goals with the project team.

Source: LEED Reference Guide for Homes Design and Construction, v4, Innovation Prerequisite:

Preliminary Rating, p. 186.

The LEED v4.1 Residential BD+C rating system confirms:

IN Prerequisite: Preliminary Rating

The goal is to foster an integrative process that identifies cost-effective green strategies and aligns the project team on sustainability objectives from the outset.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The correct answer is to maximize opportunities for integrative, cost-effective adoption of green design and construction strategies (Option C), as this reflects the prerequisite's focus on early planning for sustainability.

Why not the other options?

Reference: LEED Reference Guide for Homes Design and Construction, v4, IN Prerequisite: Preliminary Rating, p. 186.

B). To define the mandatory certification level at the beginning and declare it to all parties: The prerequisite does not mandate a certification level; it sets goals for credits. Reference: LEED Reference Guide for Homes Design and Construction, v4, IN Prerequisite: Preliminary Rating, p. 186.

D). To encourage exceptional performance for current credits and promote innovative performance in pioneering areas: This is the intent of IN Credit: Innovation, not the prerequisite. Reference: LEED Reference Guide for Homes Design and Construction, v4, IN Credit: Innovation, p. 190.

The LEED AP Homes Candidate Handbook emphasizes IN prerequisites, including Preliminary Rating, and references the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of integrative planning.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Innovation Prerequisite:

Preliminary Rating, p. 186.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming preliminary rating intent.

## NEW QUESTION # 92

Which member of the verification team conducts field inspections of LEED prerequisites and credits?

- A. LEED for Homes Provider
- B. LEED for Homes QAD
- C. LEED Green Rater
- D. Energy Rater

**Answer: C**

Explanation:

The LEED for Homes Rating System (v4) requires third-party verification for prerequisites and credits, with specific roles defined for the verification team. The LEED Green Rater is responsible for conducting field inspections to verify compliance.

According to the LEED Reference Guide for Homes Design and Construction (v4):

Verification Process

The LEED Green Rater, a trained professional certified by the Green Building Certification Institute (GBCI), conducts field inspections to verify compliance with LEED for Homes prerequisites and credits, including energy, water, and indoor environmental quality measures.

Source: LEED Reference Guide for Homes Design and Construction, v4, Introduction, p. 28.

The LEED v4.1 Residential BD+C rating system confirms:

Verification Process

The LEED Green Rater performs on-site inspections to ensure that the project meets all prerequisites and targeted credits, documenting compliance for certification.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The correct answer is LEED Green Rater (Option D), as this team member is responsible for field inspections of LEED prerequisites and credits.

Why not the other options?

Reference: LEED Reference Guide for Homes Design and Construction, v4, EA Prerequisite: Minimum Energy Performance, p. 112.

B). LEED for Homes Provider: The Provider oversees the certification process and coordinates verification but does not conduct field inspections. Reference: LEED Reference Guide for Homes Design and Construction, v4, Introduction, p. 28.

C). LEED for Homes QAD: The Quality Assurance Designee (QAD) reviews documentation for quality control, not field inspections. Reference: LEED Reference Guide for Homes Design and Construction, v4, Introduction, p. 28.

The LEED AP Homes Candidate Handbook emphasizes the verification process, including the role of the Green Rater, and references the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of the Green Rater's role.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Introduction, p. 28.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming verification roles.

## NEW QUESTION # 93

.....

It is widely accepted that where there is a will, there is a way; so to speak, a man who has a settled purpose will surely succeed. To obtain the LEED-AP-Homes certificate is a wonderful and rapid way to advance your position in your career. In order to reach this goal of passing the LEED-AP-Homes exam, you need more external assistance to help yourself. We have engaged in this career for more than ten years and with our LEED-AP-Homes Exam Questions, you will not only get aid to gain your dreaming LEED-AP-Homes certification, but also you can enjoy the first-class service online.
