Salesforce Certified Marketing Cloud Administrator Exam Sample Questions (Q70-Q75):

NEW QUESTION # 70

Northern Trail Outfitters is preparing to send a promotional email. The audience file was loaded into a data extension but does not display for Marketing Cloud admin scheduling the send.

What should the admin confirm to resolve the issue?

- A. The data extension contains a Salesforce ID
- B. The Data extension is marked as Sendable and Testable
- **C. The data extension is marked as Sendable**
- D. The data extension is linked using the Contact Key

Answer: C

Explanation:

Explanation

To resolve the issue of not being able to see the audience file in the data extension when scheduling the send, the admin should confirm that the data extension is marked as Sendable. A sendable data extension is one that has an email address field and a subscriber key field that can be used for sending emails. If the data extension is not marked as sendable, it will not appear as an option when selecting an audience for an email send. The other options are incorrect because:

* The data extension contains a Salesforce ID. This is not a requirement for sending emails from a data extension. A Salesforce ID is only needed if NTO wants to use Marketing Cloud Connect to sync data between Marketing Cloud and Salesforce CRM.

* The Data extension is marked as Sendable and Testable. This is not a valid option for marking a data extension. A data extension can only be marked as sendable or non-sendable; there is no testable option.

* The data extension is linked using the Contact Key. This is not a requirement for sending emails from a data extension. The Contact Key is only needed if NTO wants to use Contact Builder to link data across different sources and channels.

NEW QUESTION # 71

A Marketing Cloud admin at a bank is asked to avoid storing sensitive data in the cloud. This data will only be sent to Marketing cloud to execute a send.

Which feature would the admin use to meet this requirement?

- A. Distributed Marketing Sends.
- **B. Tokenized Sending**
- C. List Sending
- D. Field Level Encryption.

Answer: B

Explanation:

To avoid storing sensitive data in the cloud, the admin should use Tokenized Sending. This feature allows Marketing Cloud to send emails without storing sensitive data such as credit card numbers or social security numbers. Instead, Marketing Cloud uses tokens that are replaced with actual data at send time by an external system

NEW QUESTION # 72

What is Setup Assistant?

- A. Support service allowing the outsourcing of repetitive admin tasks
- B. A dashboard containing key metrics for the business unit

- C. A search within Help and Training limited to configuration documents
- D. A prioritized account configuration checklist

Answer: D

Explanation:

Setup Assistant in Salesforce Marketing Cloud:

* **Functionality:** Setup Assistant acts as a prioritized checklist designed to guide administrators through the configuration of their Marketing Cloud account. It outlines essential steps in a logical and structured order to ensure a complete and efficient setup process.

* **Usage:** Administrators can access Setup Assistant from the Setup menu in Marketing Cloud, where they can follow the step-by-step instructions to configure various components of their account, such as sending domains, data management, and more.

NEW QUESTION # 73

Which three options determine when a contact could enter a journey?

Choose 3 answers.

- A. Re-entry at any time
- B. Re-entry by date
- C. Re-entry by attribute
- D. No re-entry
- E. Re-entry only after exiting

Answer: A,D,E

Explanation:

Explanation

Re-entry at any time, no re-entry, and re-entry only after exiting are the options that determine when a contact could enter a journey. These options are available in the journey settings and control how often a contact can enter the same journey based on their previous entry or exit status. Re-entry by attribute and re-entry by date are not valid options for journey re-entry.

NEW QUESTION # 74

A Marketing Cloud admin wants to ensure email sends exclude their testing prefix of [PREVIEW] in the subject line when deploying from Email Studio.

What should the admin do to prevent the prefix from deploying in live sends?

- A. Add [PREVIEW] to the subject line validation list
- B. Wrap the subject line with AMPscript
- C. Use Proof instead of [PREVIEW]
- D. Require several campaign approvals

Answer: A
