GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q43-Q48):

NEW QUESTION # 43
Who updates work remaining during the Sprint? (Choose the best answer)

- A. Product Owner
- B. Developers
- C. Senior Executives
- D. Scrum Master

Answer: B

Explanation:
The Developers own the Sprint Backlog and update it as work progresses. TheScrum Guidestates: "The Sprint Backlog is a plan by and for the Developers... As new work is required, the Developers add it to the Sprint Backlog. As work is performed or completed, the estimated remaining work is updated."
* A:The Scrum Master facilitates, not updates.
* B:Correct-the Developers manage it.

NEW QUESTION # 44
True or False: Scrum mandates the use of burndown charts.

- A. True
- B. False

Answer: B

Explanation:
Scrum does not mandate specific tools like burndown charts; it focuses on outcomes (e.g., a "Done" Increment) rather than prescriptive practices. TheScrum Guidementions progress tracking as optional:
"Various practices exist to forecast progress, like burn-downs, burn-ups, or cumulative flows. While proven useful, these do not replace the importance of empiricism."
* A:False-burndown charts are optional.

NEW QUESTION # 45
What happens if the Product Owner delegates the ordering of the Product Backlog? (Choose the best answer)

- A. The burndown chart is updated
- B. Additional testers are added in the next Sprint
- C. A risk of not creating a potentially shippable product occurs
- D. The User Story is moved to the next Sprint

Answer: C

Explanation:
The Product Owner is accountable for ordering the Product Backlog to maximize value. TheScrum Guide allows delegation of tasks but not accountability: "The Product Owner may do the above work, or may delegate the responsibility to others. Regardless, the Product Owner remains accountable." Delegating ordering risks misprioritization, potentially leading to an Increment that doesn't meet value goals or releasability.
* A, B, D:These are unrelated consequences.

NEW QUESTION # 46

The Sprint Goal is a result of Sprint Planning, as is the Sprint Backlog. True or False?

- A. True
- B. False

Answer: A

Explanation:
The Sprint Goal and the Sprint Backlog are both outcomes of Sprint Planning, making this statement true.
According to theScrumGuide, Sprint Planning is an event where the ScrumTeamcollaborates to define the work to be performed during the Sprint. The Sprint Goal is a single objective set for the Sprint, providing focus and coherence to the work selected. It is crafted collaboratively by the Product Owner, Developers, and ScrumMaster during Sprint Planning. Simultaneously, the Sprint Backlog is created, consisting of the Product Backlog items selected for the Sprint plus a plan to deliver them, aligned with the Sprint Goal. The ScrumGuidestates: "Sprint Planning initiates the Sprint by laying out the work to be performed... This resulting plan is created by the collaborative work of the entire ScrumTeam." Thus, both the Sprint Goal and Sprint Backlog emerge from this event, confirming option A as correct.

NEW QUESTION # 47

The time-box for a Daily Scrum is? (Choose the best answer)

- A. 15 minutes.
- B. 4 hours.
- C. 15 minutes for a 4-week Sprint. For shorter Sprints it is usually shorter.
- D. The same time of day every day.
- E. Two minutes per person.

Answer: A

Explanation:
TheScrumGuidedefines the Daily Scrum as a 15-minute time-boxed event: "The Daily Scrum is a 15-minute event for the Developers of the ScrumTeam." This duration is fixed regardless of Sprint length, ensuring consistency and focus on synchronizing work and identifying impediments. Option A refers to a scheduling practice, not the time-box. Option B is arbitrary and not Scrum-defined. Option C is far too long and contradicts theScrumGuide. Option E incorrectly suggests variability based on Sprint length, which isn't supported-15 minutes is the standard. Thus, D is the correct answer.
