

# 2026 VMware High-quality Pass4sure 2V0-16.25 Pass Guide

What's more, part of that Prep4away 2V0-16.25 dumps now are free: [https://drive.google.com/open?id=1a1Km7xd37TufxJ\\_nA27kibZRKYvkCsh2](https://drive.google.com/open?id=1a1Km7xd37TufxJ_nA27kibZRKYvkCsh2)

This document of 2V0-16.25 exam questions is very convenient. Furthermore, the VMware 2V0-16.25 PDF questions collection is printable which enables you to study without any smart device. This can be helpful since many applicants prefer off-screen study. All these features of VMware 2V0-16.25 Pdf Format are just to facilitate your preparation for the 2V0-16.25 examination.

The data that come up with our customers who have bought our 2V0-16.25 actual exam and provided their scores show that our high pass rate is 98% to 100%. This is hard to find and compare with in the market. And numerous enthusiastic feedbacks from our worthy clients give high praises not only on our 2V0-16.25 study torrent, but also on our sincere and helpful 24 hours customer services on 2V0-16.25 exam questions online. All of these prove that we are the first-class vendor in this career and have authority to ensure your success in your first try on 2V0-16.25 exam.

## 2V0-16.25 Valid Exam Vce, 2V0-16.25 Practice Test Engine

Are you planning to attempt the VMware vSphere Foundation 9.0 Administrator (2V0-16.25) exam of the 2V0-16.25 certification? The first hurdle you face while preparing for the VMware vSphere Foundation 9.0 Administrator (2V0-16.25) exam is not finding the trusted brand of accurate and updated 2V0-16.25 exam questions. If you don't want to face this issue then you are at the trusted Prep4away is offering actual and Latest 2V0-16.25 Exam Questions that ensure your success in the VMware vSphere Foundation 9.0 Administrator (2V0-16.25) certification exam on your maiden attempt.

## VMware vSphere Foundation 9.0 Administrator Sample Questions (Q44-Q49):

### NEW QUESTION # 44

An administrator has been tasked with creating a custom alert for an object in VMware Cloud Foundation (VCF) Operations. When creating the alert, the administrator completes the following:

- \* A new symptom definition.
- \* A new alert definition.
- \* Select the Object type.

What additional step must the administrator take to complete the stated objective and ensure the alert is triggered?

- A. Create an instance of the Rest Notification Plugin.
- B. Enable the alert in an Active Policy.

- C. Create and enable a super metric for read latency in the Active Policy.
- D. Create a new Payload Template.

**Answer: B**

Explanation:

When creating a custom alert in VCF Operations, the final required step is:

\* Enable the alert in an Active Policy, so it applies to the target objects.

Without policy activation, the alert exists but will never trigger.

Other options:

- \* A. Super metric# Only required if monitoring a custom metric, not for standard alerts.
- \* B. REST Notification Plugin# Used for outbound integration, not triggering alerts.
- \* C. Payload Template# Used in notifications, not in core alert configuration.

**NEW QUESTION # 45**

Which of the following statements describes hardware abstraction in VMware server virtualization?

- A. Encrypting all data processed by a virtual machine on the operating system level.
- B. Allowing virtual machines to be live migrated between physical servers with Intel and AMD processors.
- C. Isolating memory access from the operating system and applications running in a virtual machine.
- D. **Allowing virtual machines (VMs) to use hardware resources without being tied to specific physical devices.**

**Answer: D**

Explanation:

Hardware abstraction in VMware virtualization:

\* The hypervisor abstracts physical resources(CPU, memory, storage, networking) and presents them to VMs as standardized virtual hardware.

\* This allows VMs to run independently of underlying physical devices, enabling features like vMotion and hardware independence.

Other options:

- \* A. Encrypting data# Security feature, not abstraction.
- \* B. Isolating memory access# Memory protection, not full abstraction.
- \* C. Live migration between Intel and AMD# Possible with compatibility modes, but not a direct definition of abstraction.

**NEW QUESTION # 46**

An administrator is tasked to implement a new iSCSI storage for a new cluster.

The following information was provided to the administrator:

- \* iSCSI storage controller IPs are all in the same subnet.
- \* Multipathing should be used.
- \* Storage supports Asymmetric Logical Unit Access (ALUA).
- \* Should be configured for high performance.

Which are the four required steps to configure this on an ESX host? (Choose four.)

- A. Set Path Selection Policy (PSP) to Most Recently Used (MRU).
- B. **Configure two bound VMkernel ports.**
- C. **Configure 1 vSwitch with 2 Uplinks.**
- D. **Add iSCSI software adapter.**
- E. Configure 2 vSwitch with 1 Uplink.
- F. Add NVMe over TCP software adapter.
- G. **Set Path Selection Policy (PSP) to Round Robin (RR).**
- H. Configure two unbound VMkernel ports.

**Answer: B,C,D,G**

Explanation:

For iSCSI multipathing with ALUA and high performance in ESXi:

- \* 1 vSwitch with 2 Uplinks# Standard design for redundancy and multipathing. (B)
- \* Add iSCSI software adapter# Required to connect to storage. (E)
- \* Configure two bound VMkernel ports# Ensures multipathing (one per uplink). (G)
- \* Set PSP to Round Robin (RR)# Optimizes I/O balancing across multiple paths. (F) Other options:
  - \* A. 2 vSwitches with 1 Uplink each# Not recommended, complicates multipathing.
  - \* C. NVMe over TCP# Not relevant, storage is iSCSI.
  - \* D. MRU policy# Legacy, not high performance.
  - \* H. Unbound VMkernel ports# Used for software iSCSI port binding, but "bound" VMkernel ports are required for multipathing.

### NEW QUESTION # 47

An administrator is tasked to configure shared storage for a VMware vSphere Foundation (VVF) cluster at a remote location.

The following is available at the remote location:

- \* Two ESX servers.
- \* Two 1GbE network cards per ESX.
- \* One sixteen port 1GbE Switch.
- \* One NVMe per ESX for the Operating System.
- \* One storage system supporting network and fiber channel capabilities.

What storage protocol must the administrator use at the remote location?

- A. vSAN
- B. Local Storage
- **C. NFS**
- D. Fiber Channel

**Answer: C**

Explanation:

The scenario:

- \* Remote site with 2 ESXi servers, 1GbE networking only.
- \* Storage system supports both network (NAS/iSCSI/NFS) and Fiber Channel.
- \* Fiber Channel is not feasible (no FC switches/HBAs).
- \* vSAN requires more than 2 nodes (minimum 3 for standard vSAN, 2+Witness for 2-node), not mentioned here.

The most suitable solution:

- \* Use NFS storage over 1GbE. (D)
- \* Provides shared storage accessible to both ESXi hosts.

Other options:

- \* A. vSAN# Needs 3+ nodes or a witness, not supported in this config.
- \* B. Local storage# Not shared, fails HA/DRS requirements.
- \* C. Fiber Channel# Requires HBAs and FC switch, not available.

### NEW QUESTION # 48

In VMware Cloud Foundation (VCF) Operations for Logs, where does an administrator visualize the value range of a field?

- A. Click the pencil in the Manage Fields pane.
- B. Click on the field in the Field Table.
- **C. Click on the field in the Events table.**
- D. Click on the field in Manage Fields.

**Answer: C**

Explanation:

In VCF Operations for Logs, administrators can analyze logs using queries, fields, and charts. A key feature is the ability to view the value range of a specific field.

- \* When a log query is executed, results appear in the Events table.
- \* Each field shown in the Events table is interactive.
- \* By clicking on a field in the Events table, administrators can drill down into the data to visualize its value distribution (range), typically in the form of a histogram or grouped data set.

This provides insight into what values are present and how frequently they occur, which is useful for troubleshooting, anomaly detection, and refining queries.

Why not the other options?

- \* A. Click the pencil in the Manage Fields pane# Used to edit or extract fields, not visualize ranges.
- \* C. Click on the field in Manage Fields# Displays field definitions and settings, not real-time value ranges.
- \* D. Click on the field in the Field Table# The Field Table lists defined fields but does not provide value range visualization.
