### XSOAR-Engineer Latest Test Sample, Accurate XSOAR-Engineer Test

Many candidates do not have actual combat experience, for the qualification examination is the first time to attend, so about how to get the test XSOAR-Engineer certification didn't own a set of methods, and cost a lot of time to do something that has no value.

With our XSOAR-Engineer Exam Practice, you will feel much relax for the advantages of high-efficiency and accurate positioning on the content and formats according to the candidates' interests and hobbies. And you will be bound to pass the exam with our XSOAR-Engineer learning guide!

## Palo Alto Networks XSOAR Engineer Sample Questions (Q60-Q65):

### NEW QUESTION # 60

What happens when an integration is deprecated?

- A. The configuration settings will be lost and the integration will no longer function
- B. The integration commands in a playbook can be used, but it will fail at runtime
- C. The integration commands in a playbook can no longer be used
- D. The integration commands can be used, but it is recommended to update to the latest content pack

Answer: D

### NEW QUESTION # 61

Which two capabilities do Automation script settings include? (Choose two.)

- A. Set password protection
- B. Define 'parameters'
- C. Define 'outputs'
- D. Correlate to incident types

Answer: A,C

### NEW QUESTION # 62

Match the appropriate action to the layout type.

Answer Area

	Drag answer here	View inputs and outputs of a playbook
Work Plan	Drag answer here	Execute a command
Incident Info	Drag answer here	View Incidents 'Similarity Scale'
Related Incidents	Drag answer here	Change incident fields

Answer:

Explanation:

**Answer Area**

War Room	Execute a command	View inputs and outputs of a playbook
Work Plan	View inputs and outputs of a playbook	Execute a command
Incident Info	Change incident fields	View Incidents 'Similarity Scale'
Related Incidents	View Incidents 'Similarity Scale'	Change incident fields

**Answer Area**

War Room	Execute a command	View inputs and outputs of a playbook
Work Plan	View inputs and outputs of a playbook	Execute a command
Incident Info	Change incident fields	View Incidents 'Similarity Scale'
Related Incidents	View Incidents 'Similarity Scale'	Change incident fields

**NEW QUESTION # 63**

During configuration of the inputs of a sub-playbook in the main playbook, there is an option under the Loop tab called "For Each Input". What is this option used to?

- A. To loop the sub-playbook over all context values present in the investigation
- B. To loop the sub-playbook over all the fields marked as important
- C. To loop the sub-playbook over all incident fields for the given incident
- **D. To loop the sub-playbook over all defined sub-playbook inputs**

**Answer: D**

**NEW QUESTION # 64**

Which command adds or updates a description to an incident that can be used within widgets?  
 Which command adds or updates a description to an incident that can be used within widgets?.

- A. !Set key="description" value="This is an updated description."
- B. !setIncident description=This is an updated description.
- C. !setIncident description="This is an updated description."
- D. !Set key-"description" value- This is an updated description.

**Answer: C**

Explanation:

The !setIncident command is the documented method for updating incident fields programmatically in Cortex XSOAR. The Admin Guide states that the syntax requires proper quoting for parameters, especially when assigning descriptive text that may include spaces. The correct syntax is:

```
!setIncident description="some text"
```

This updates the built-in description field at the incident level and allows widgets, dashboards, and reports to use the updated description because XSOAR widgets can read incident fields directly. Option A uses correct syntax with quotes included.

Option B incorrectly uses !Set, which modifies context keys, not incident fields. Option C is invalid due to incorrect parameter formatting (hyphens instead of equals signs). Option D omits quotation marks, causing parsing errors in cases where the value includes spaces, verbs, or punctuation.

Thus, the only correct and fully documented method to update an incident's description so that it is available to widgets is A:

```
!setIncident description="..."
```

## NEW QUESTION # 65

.....

If you want to be employed by the bigger enterprise then you will find that they demand that we have more practical skills. Our XSOAR-Engineer exam materials can quickly improve your ability. Because the content of our XSOAR-Engineer practice questions is the latest information and knowledge of the subject in the field.
