Our study materials with high quality and high pass rate in order to help you get out of your harassment. So, act now! Use our Workday-Pro-HCM-Reporting Quiz prep.

## Workday Pro HCM Reporting Certification Exam Sample Questions (Q11-Q16):

### NEW QUESTION # 11

A recruiter is running a dashboard and no data is appearing in the Top New Applications by Job Profile worklet tile. What could be the cause of the issue?

- A. The recruiter does not have access to the Top New Applications by Job Profile report.
- **B. The recruiter has constrained access to the report's data source or data source filter.**
- C. The dashboard configuration does not include Top New Applications by Job Profile as a required worklet.
- D. The recruiter does not have access to the domain securing the dashboard.

**Answer: B**

Explanation:

If a recruiter sees an empty dashboard tile, the most likely cause is constrained security access. Even though the dashboard is properly configured and the worklet is enabled, Workday's security framework ensures that report results vary by user depending on their role and assigned constraints.

From the Workday Reporting binder: "Report results differ between users if security constraints apply. Constrained security groups grant access only to a subset of data... Unconstrained security groups grant users access to all target instances of a securable item". In this scenario, the recruiter likely has constrained access to only their supervisory organization or region. As a result, the "Top New Applications by Job Profile" report returns no records in the worklet tile.

Other options are less likely: if the recruiter lacked access to the report entirely, the tile would not appear; required vs. optional dashboard configuration would not impact existing data visibility; and domain-level security applies to report access, not data filtering.

Therefore, the correct answer is C. The recruiter has constrained access to the report's data source or data source filter.

### NEW QUESTION # 12

You want to view benefit cost by benefit enrollment for the current year compared to the prior year to evaluate increases or decreases in plan enrollment, displaying formatted cost and count variance calculations.

What type of report would allow you to do this?

- A. Matrix Report
- **B. Trending Report**
- C. Composite Report
- D. Advanced Report

**Answer: B**

Explanation:

To evaluate year-over-year changes in benefit costs and enrollments, you need historical data comparisons over time. The Trending Report type is designed for exactly this use case, leveraging data sources like Trended Workers to display snapshots at periodic intervals and calculate variances between time periods.

From the Workday binder: "Trending reports allow you to track changes to worker data across time. These reports support analysis of headcount, demographics, benefit enrollments, and cost variances year-over-year or month-over-month." Advanced and Matrix reports provide strong analysis capabilities, but they are based on current or related effective-dated data, not time-series snapshots. Composite reports combine multiple subreports but do not inherently manage trending data or variance calculations across years. Therefore, the only correct option for year-over-year benefit enrollment and cost variance is D. Trending Report.

### NEW QUESTION # 13

A Hire event has an Effective Date of 09/02/2023.

What would be the Record Date of the Hire event on the Trended Workers object?

- A. 9/2/2023
- B. 9/1/2023
- C. 10/31/2023
- **D. 9/30/2023**

**Answer: D**

**Explanation:**

In Workday trending reports, the Record Date for a transaction is not always the same as the event's Effective Date. Instead, trending data is captured based on the periodicity of the trended workers configuration, most commonly set to the end of each month. For Hire events, the Effective Date is when the change takes effect in the system, but the trended data is stored using the month-end Record Date.

From the Workday binder: "Trended Workers captures snapshots of worker data at periodic intervals (e.g., monthly, quarterly). A transaction such as a hire or termination is recorded in trending as of the last day of the period in which the effective date occurs." In this scenario, the Hire Effective Date of 09/02/2023 falls in September. The Record Date is therefore the last day of September, 09/30/2023, not the effective date itself.

Thus, the correct answer is C. 9/30/2023.

**NEW QUESTION # 14**

A compensation analyst wants to provide C-level executives with a readable and easily accessible display of annual average base pay for workers by region.

What would be an effective option for this case?

- A. A dashboard, because we need information from a collection of reports, organized by region.
- B. A worklet, we only need information from a single report.
- C. A dashboard, because we only need information from a single report.
- D. A worklet, because we need information from a collection of reports, organized by region.

**Answer: A**

**Explanation:**

Workday dashboards allow organizations to present multiple reports together in a consolidated, highly visual, and interactive format. For C-level executives, who require a comprehensive and regional view of annual average base pay, dashboards are preferred over individual reports or worklets because they enable grouping and comparison across multiple data sets.

From the Workday binder: "Dashboards provide an interface to view charts and sheets all in one place. This enables managers and executives to analyze key metrics and trends so they can make better decisions." By organizing reports by region within a dashboard, executives can quickly compare averages, identify trends, and take strategic action without needing to navigate multiple reports.

Worklets are lightweight tiles often used for single reports or quick tasks on the Home page. However, this scenario requires an organized collection of reports, making D. A dashboard, because we need information from a collection of reports, organized by region the correct answer.

**NEW QUESTION # 15**

An HR analyst has many visualizations in different discovery boards that use the Workers for HCM Reporting data source on the Worker primary business object. The analyst wants to drill into one of the visualizations by Worker. Upon drilling, the analyst notices that Worker is not a listed Drill By field option. They want to drill by Worker without editing the Drill By list of the other visualizations.

How would the analyst configure this?

- A. Add Worker as a Drill By field from the Maintain Field Lists for Discovery Boards report.
- B. Create a control from a sheet filter and filter the data by Worker from the Control Panel.
- C. Drag and drop the Worker field in one of the dimensions of this visualization in the Builder Panel.
- D. Override the Drill By field list and add Worker in the Configuration Panel for this visualization.

**Answer: D**

**Explanation:**

In Discovery Boards, drill behavior is defined in the Drill By field list. To add Worker as a drillable option in just one visualization, the analyst can override the Drill By list in the Configuration Panel of that visualization. This allows Worker to appear as a drill dimension without altering the defaults applied across other visualizations.

From the Workday documentation: "You can override Drill By field lists in the visualization configuration panel. This enables drill customization on a per-visualization basis without impacting other discovery boards." The other options are less appropriate: Maintain Field Lists changes the default for all boards; adding Worker as a dimension affects grouping, not drilling; and sheet filter controls allow filtering but do not add drill options.

Thus, the correct choice is D. Override the Drill By field list and add Worker in the Configuration Panel for this visualization.

## NEW QUESTION # 16

.....

If you fail to get success in the Workday Workday-Pro-HCM-Reporting test, you can claim your money back according to some terms and conditions. If you want to practice offline, use our Workday Workday-Pro-HCM-Reporting desktop practice test software. Windows computers support this software. The Workday-Pro-HCM-Reporting web-based practice exam is compatible with all browsers and operating systems.
