PL-200 Prüfungsübungen - PL-200 Online Test

Sie haben einen großen Traum. Sie können viele Materialien zur Vorbereitung finden. Unsere Fragenkataloge zur Microsoft PL-200 Zertifizierungsprüfung können Ihren Traum verwirklichen. Die Fragen und Antworten zur Microsoft PL-200 Zertifizierungsprüfung von ZertPruefung werden von den erfahrungsreichen IT-Fachleuten bearbeitet. Mit unseren Produkten können Sie alle Probleme versuchen. Wir würden Ihnen versprechen, dass die Kandidaten die realen Antworten 100% bekommen.

Microsoft Power Platform Functional Consultant PL-200 Prüfungsfragen mit Lösungen (Q160-Q165):

160. Frage

A company has a sales application that is supported by an Azure SQL database. You are developing a Power Apps app for use by customer service agents.

The app must reference customer data from the sales application. Data in the sales application is constantly changing and must not be replicated in Microsoft Dataverse. Some customer data is considered sensitive. You must protect data for specific fields when users view data in the app.

You need to configure table creation for the app.

How should you configure the app? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Dataverse table type to create for the referenced customer data.	☐ Create a virtual table. ☐ Create an activity table. ☐ Create a user-owned table. ☐ Create an organization-owned table.
Protect sensitive customer data for specific fields.	☐ Create an alternate key. ☐ Create a secured column. ☐ Implement input method editor (IME) mode. ☐ Set the value of the visible property of the fields to false.

Antwort:

Begründung:

Requirement	Action
Dataverse table type to create for the referenced customer data.	☒ Create a virtual table. ☒ Create an activity table. ☐ Create a user-owned table. ☐ Create an organization-owned table.
Protect sensitive customer data for specific fields.	☒ Create an alternate key. ☒ Create a secured column. ☐ Implement input method editor (IME) mode. ☐ Set the value of the visible property of the fields to false.

Explanation:

Requirement	Action
Dataverse table type to create for the referenced customer data.	☒ Create a virtual table.
Protect sensitive customer data for specific fields.	☒ Create a secured column.

161. Frage

A guest asks about the start time of a specific scheduled event and wants to know what the snow conditions will be like during their stay.

You need to determine how to design the chat solution to answer those questions.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Scenario	Action
Identify and reference the company event a guest mentions.	▼ - Load the response into a variable - Use smart matching to load an entity into a topic - Load the extracted topic into a variable
Identify attributes for snow conditions.	▼ - Create a custom entity - Create a new topic - Create a new variable - Create an escalation

Antwort:

162. Frage

You need to create a system chart for the Account entity.

The chart must display a count of accounts grouped by owner and then display the accounts by Address 1: State/Province for each owner. You begin to configure chart options as shown in the image below.

Power Apps

File Home

Save Save & Close Save as

Column - Bar - Area - Line - Pie - Funnel Charts Tag Doughnut

Bottom X Rule - Clear Rules Top X Rule - Top/Bottom Rules

Working on solution: Default Solution

View used for chart preview

Active Accounts

Accounts by Owner and Address 1: State/Province

Legend Entries (Series)

☐ Select Field Aggregate

+ Add a series

Horizontal (Category) Axis Labels

Select Field X

Select Field X

+ Add a category

Description

How should you complete the configuration? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point. The chart must display a count of accounts grouped by owner, and then display the accounts by Address 1 to State/Province for each owner.

Component	Selection
Legend Entries (Series): Select Field	▼ Account Address 1: State/Province Owner
Legend Entries (Series): Aggregate	▼ Avg Count:All Sum
Horizontal (Category) Axis Labels: Select Fields	
First grouping field	▼ Account Address 1: State/Province Owner
Second grouping field	▼ Account Address 1: State/Province Owner

Microsoft

Antwort:

Owner

163. Frage

You need to implement the requirement for the VP of sales.
What should you do?

- A. Use a test account with a base security role with QV security added.
- B. Add the System Administrator security role to your user account.
- C. Add QV security to your user account.
- D. Use a test account with only QV security added.

Antwort: A

Begründung:

A VP of sales requires a test environment to demonstrate to potential clients the security policies that are included in their initial offering.

Currently, testing the new QV functionality outside the development environment is not possible due to corporate security policies requiring the same security role across all environments.

Note: One of the security best practices in Dynamics 365 is to use the base security role as a baseline and apply that role to all Users. The base security role will include all the common/basic permissions that are required to have access to the system.

To set up the base security role for the first time
create a new empty security role.

add the minimum privileges required to access the system.

add the privileges required for the basic functionalities.

test the role with the test user account.

add the permissions to the entities that all users can access (e.g. reference data).

Topic 2, Alpine SKi House

Background

Alpine SKi House is a boutique mountain resort that offers year-round spa and outdoor activities such as snow sports, hiking, mountain biking, and more. The resort has been family owned and operated for more than 50 years. The company has been able to remain profitable while not needing to adopt new technologies.

General

Booking at the resort have decreased. The company has decided to focus on creating a tailored, first-class experience for guest. The company also plans to target corporate meetings and events.

The company recently purchased a chatbot named FAQbot from AppSoure. The chatbot uses the resort's existing FAQs

Communication

- * Communication between staff members is primarily conducted through email and SMS text messages.
- * Conversations between staff members and guest often lost.
- * Conference calls are used for all group meeting

Event Registration

- * Corporate customers can reserve a meeting room at the resort to host meetings. The meetings will include lunch and choice of either an inside-spa experience or a seasonally appropriate outdoor activity.
- * Event registration is conducted three weeks prior to start of the event. It is assumed that all event attendees will attend the meeting

Check-in process

- * Guests wait in lines to check in and obtain name badges. At this time, guests can specify any dietary restrictions and select their activity preference. This can result in long wait times and crowding at the front desk.
- * For health and compliance reasons, guests must answer a series of questions with a yes or no answer during check-in. The front desk will ask and record these answers for the resort's records.

Marketing

At the check-in counter, the guests can drop their business cards into a bowl for a chance to win an all-inclusive weekend stay at the resort. The resort uses the business card information to send announcements about promotions and upcoming events.

Resort policies and event inquiries

- * A guest can call or send an email to the event coordinator at the resort to get information about hotel policies, snow conditions, or to pre-select their after-meeting event;
- * Guests can also go to the website to view the extensive list of frequently asked questions (FAQ) compiled over the years. Many of the answers to the FAQ's are out of date.

General

Alpine Ski House does not employ technical staff and does not have the budget to hire an external firm to develop solutions. There are two team members who are proficient at Microsoft Excel formulas. Any solution created must use the capabilities of current team members.

All solutions must be simple to use, easy to maintain, and represent the brand of the resort.

You must implement the following solutions:

- * a centrally managed communication solution
- * a customer service solution
- * a resort portal
- * a chat solution
- * a check-in solution

Communication

- * Communication between team members must be centrally managed and unified in Microsoft Teams.
- * When the company confirms an event they, must provide a list of guest's names and email addresses.
- * You must send guests a welcome email that includes a unique registration number for authentication with the resort's portal.
- * Guests must receive a separate email to verify proof of ownership for their registration.

Event attendance

- * Guests must create an account and sign into a resort portal to confirm their attendance to an event and pre-select an after-meeting event
- * Prior to the event, guests must be able to identify any personal dietary restrictions.

Check-in processes

- * Check-in processes must be self-service. Each screen must ask for specific data from the guest. The check-in solution will use some data that is stored in Microsoft Excel.
- * The check-in solution must continue to function if there are internet issues. If the self-service kiosks are not available, staff must be able to use the check-in solution from within their communication solution.
- * The check-in solution must have a screen where the guest will select either yes or no to health and wellness questions.
- * Guests must physically interact with each answer before proceeding to the next screen. Guests must be able to confirm any dietary restrictions they may have entered from the portal or add new ones at this time.
- * Data must be entered in each screen before users move on to the next screen.

Marketing

- * To eliminate the handling of business cards, the check-in solution must be able to translate the contents of the business cards into Alpine Ski House's marketing system.
- * The solution must not require any effort or manual entry from the guest to prevent any mistyped information and to make it more appealing to the guest to participate.

Hotel policies and event inquiries

The portal must allow the guest to ask questions about hotel policies, event information, weather reports, and current weather condition at the resort.

Chat solution

The chat solution must specifically address the following key words. No additional key words will be added until a later implementation phase:

- * Snow reports
- * Weather conditions
- * Start time
- * End time
- * Event date
- * Outdoor activities
- * Indoor activities
- * Most popular

The chat solution must be available always and not require staff to answer all of the questions. If a question does require a staff member's attention, the solution must determine which staff member is best to assist the customer with the question.

The information in the FAQ on the legacy website must be used in the chat solution but retyping all the data from the website should not be required. If guests ask about topics that are not listed in the FAQ, the chat solution must identify the issue and escalate to a staff member.

Team members must be able to ask their own questions through a centrally managed communication solution instead of using the guest portal. Team members must be able to access the same FAQ across multiple solutions.

Issue

Guest1 inquires about snow conditions several times each day of their stay.

164. Frage

You need to address the executive's concerns regarding unnecessary data access.

Which security changes should you make? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Concern – Unnecessary user access to client data during verification

Security Measure –

Assign records to the user doing the verification and change table security to basic.

Assign records to a service account and share the record with the team member doing the verification.

Assign records to a service account and add the team member doing the verification by using an access team.

Concern – Unnecessary user access to client data after the request is completed

Security Measure –

Assign records to the QV team when the service request is completed.

Assign records to a service account when the service request is completed.

Assign records to the team member doing the verification when the service request is completed.

Antwort:

Begründung:

Answer Area

Concern – Unnecessary user access to client data during verification

Security Measure –

Assign records to the user doing the verification and change table security to basic.
Assign records to a service account and share the record with the team member doing the verification.
Assign records to a service account and add the team member doing the verification by using an access team.

Concern – Unnecessary user access to client data after the request is completed

Security Measure –

Assign records to the QV team when the service request is completed.
Assign records to a service account when the service request is completed.
Assign records to the team member doing the verification when the service request is completed.

Explanation

Box 1: Assign records to a service account and add the team member doing the verification by using an access team.

When to use access teams

- * The teams are dynamically formed and dissolved. This typically happens if the clear criteria for defining the teams, such as established territory, product, or volume aren't provided.
- * The team members require different access rights on the records. You can share a record with several access teams, each team providing different access rights on the record. For example, one team is granted the Read access right on the account and another team, the Read, Write and Share access rights on the same account.
- * A unique set of users requires access to a single record without having an ownership of the record.

Box 2: Assign records to the QV team when the service request is completed.

Issues: More employees than are required can access individual client information and continue to have access after a service request is completed.

Management has decided to create a new qualification verification (QV) role to help ensure that clients get the most accurate results. This role examines completed work to ensure that nothing is missed.

- * When users go on vacation, all their outstanding Service Request records are assigned to a substitute employee. The substitute employees are unable to see all the qualifications related to their service requests.

165. Frage

.....

Wollen Sie durch die Microsoft PL-200 Zertifizierungsprüfung Ihre Position in der heutigen konkurrenzfähigen IT-Branche und Ihre beruflichen Fähigkeiten verstärken? Dann müssen Sie mit breiten fachlichen Kenntnissen ausgerüstet sein. Und es ist nicht so einfach, die Microsoft PL-200 Zertifizierungsprüfung zu bestehen. Vielleicht ist die Microsoft PL-200 Zertifizierungsprüfung ein Sprungbrett, um im IT-Bereich befördert zu werden. Aber man braucht doch nicht, sich mit so viel Zeit und Energie für die Prüfung verwenden. Sie können unsere ZertPruefung Produkte wählen, die speziellen Schulungsunterlagen für die IT-Zertifizierungsprüfungen bieten.

PL-200 Prüfungsübungen: https://www.zertpruefung.ch/PL-200_exam.html

Mit dem Bestehen der PL-200-Zertifikation erhalten Sie nicht nur ein Stück Papier, sondern auch den Nachweis ihrer eigenen Fähigkeiten. Die Übungen von ZertPruefung PL-200 Prüfungsübungen sind den echten Prüfungen sehr ähnlich, Mithilfe der Unterstützung der technischen Programme unserer PL-200 Übungswerkstatt, bieten wir qualitative Übungen und einen zuverlässigen Service für unsere Kunden an. In den letzten Jahren ist die Bestehensquote von unserer PL-200 Prüfung Dump auf 99% gestiegen und sinkt nie wieder.

Rauchen Sie, um die Knechtschaft Ihres Körpers loszuwerden, Hier ist es viel zu finster, Mit dem Bestehen der PL-200-Zertifikation erhalten Sie nicht nur ein Stück Papier, sondern auch den Nachweis ihrer eigenen Fähigkeiten.

PL-200 Braindumpsit Dumps PDF & Microsoft PL-200 Braindumpsit IT-Zertifizierung - Testking Examen Dumps

Die Übungen von ZertPrüfung sind den echten Prüfungen sehr ähnlich, Mithilfe der Unterstützung der technischen Programme unserer PL-200 Übungswerkstatt, bieten wir qualitative Übungen und einen zuverlässigen Service für unsere Kunden an.

In den letzten Jahren ist die Bestehensquote von unserer PL-200 Prüfung Dump auf 99% gestiegen und sinkt nie wieder, Wir erwarten Ihre Anerkennung.
