C-IBP-2502 Valid Test Guide & C-IBP-2502 Exam Sample Questions

We committed to providing you with the best possible SAP Certified Associate - SAP IBP for Supply Chain (C-IBP-2502) practice test material to succeed in the SAP C-IBP-2502 exam. With real C-IBP-2502 exam questions in PDF, customizable SAP C-IBP-2502 practice exams, free demos, and 24/7 support, you can be confident that you are getting the best possible C-IBP-2502 Exam Material for the test. Buy today and start your journey to SAP Certified Associate - SAP IBP for Supply Chain (C-IBP-2502) exam success with TestPassKing!

SAP C-IBP-2502 Exam Syllabus Topics:

Topic	Details
Topic 1	• Key Figures & Attributes: This section of the exam measures the skills of supply chain analysts and focuses on the key figures and attributes used in planning. It covers how to define and configure key figures to ensure accurate data representation and decision-making. Candidates are also tested on their ability to manage attributes that support various planning scenarios.
Topic 2	• General Configuration of a Planning Area: This section is aimed at SAP solution consultants and covers the configuration of a planning area. It includes defining key planning parameters, setting up structures, and ensuring the system is configured to meet business needs. Candidates will be tested on their ability to customize planning areas for optimal performance.
Topic 3	• Demand Planning: This section measures the skills of demand planners and focuses on the core concepts of demand planning. It includes understanding forecasting techniques, demand sensing, and demand propagation. Candidates are tested on their ability to manage demand signals and align planning with business objectives.
Topic 4	• Planning Operators & Application: JobsThis section is designed for demand planners and focuses on the configuration and execution of planning operators and application jobs. It includes an understanding of how these tools automate planning processes and improve system performance. Candidates will be tested on their ability to configure and execute jobs that support various planning functions.
Topic 5	• Solution Architecture & Data Integration: his exam section is aimed at solution architects who work with SAP data integration. It covers the fundamental concepts of integrating external data sources with SAP, ensuring seamless data flow between systems. Candidates need to understand how to maintain system architecture for optimized performance and reliability.

Topic 6	• User Interface: This section assesses the knowledge of business users in navigating and utilizing the SAP interface effectively. It covers how to interact with different features, customize views, and leverage UI functionalities for efficient planning and reporting. Candidates are expected to demonstrate proficiency in accessing and interpreting data within the system.

C-IBP-2502 Exam Sample Questions & Latest C-IBP-2502 Study Guide

Passing the C-IBP-2502 exam with least time while achieving aims effortlessly is like a huge dream for some exam candidates. Actually, it is possible with our proper C-IBP-2502 learning materials. To discern what ways are favorable for you to practice and what is essential for exam syllabus, our experts made great contributions to them. All C-IBP-2502 Practice Engine is highly interrelated with the exam. You will figure out this is great opportunity for you. Furthermore, our C-IBP-2502 training quiz is compiled by professional team with positive influence and reasonable price

SAP Certified Associate - SAP IBP for Supply Chain Sample Questions (Q31-Q36):

NEW QUESTION # 31
Manage Analytics Stories introduces advanced visualization features within SAP Integrated Business Planning for Supply Chain. What are some of the main capabilities of the stories? Note: There are 3 correct answers to this question.

- A. The story is structured around one responsive page
- B. Stories must be re-created in each SAP IBP environment
- C. Specific chart and table filters can be applied within the story
- D. Links to external URLs can be embedded in the story

Answer: B,C,D

Explanation:
The Manage Analytics Stories app in SAP IBP enables users to create interactive dashboards and visualizations. Its capabilities enhance decision-making by integrating data insights.
* Option A: Links to external URLs can be embedded in the storyThis is correct. Analytics Stories support embedding hyperlinks to external resources (e.g., documentation, websites), enhancing context, as per SAP IBP's visualization features.
* Option B: The story is structured around one responsive pageThis is incorrect. Stories can span multiple pages or tabs, not just one, allowing complex layouts. The responsive design adapts to devices, but it's not limited to a single page.
* Option C: Specific chart and table filters can be applied within the storyThis is correct. Users can apply filters to charts and tables (e.g., by Product, Time) within the story, enabling dynamic data exploration, a core capability in SAP IBP's analytics tools.
* Option D: Stories must be re-created in each SAP IBP environmentThis is correct. Analytics Stories are environment-specific (e.g., test vs. production) and cannot be transported directly. They must be recreated or exported/imported manually, per SAP IBP's architecture.
Thus, A, C, and D are main capabilities of Manage Analytics Stories, per SAP IBP's official documentation.
(Note: Original answer A, C, D matches corrected analysis.)

NEW QUESTION # 32
Model configuration allows the attributes of a master data type to be assigned as key figures. Which feature is relevant for this type of object?

- A. This type of key figure has better performance than a time-independent key figure
- B. This object usually provides a single value for a unique planning combination
- C. This object contains user-defined criteria that monitor the running of business plans
- D. This type of key figure is not usually stored and it cannot be editable

Answer: B

Explanation:

In SAP IBP, the "Attribute as Key Figure" feature allows master data attributes (e.g., Product Category) to be used as key figures, configured in the Planning Areas app, per SAP IBP's documentation.

* Option A: This type of key figure is not usually stored and it cannot be editableThis is incorrect.
Attribute key figures are stored (sourced from master data) and can be editable if configured as such, not inherently non-editable.

* Option B: This type of key figure has better performance than a time-independent key figureThis is incorrect. Performance depends on usage, not a guaranteed advantage over other time-independent key figures.

* Option C: This object usually provides a single value for a unique planning combinationThis is correct. An attribute key figure (e.g., Product Price) provides one static value per planning combination (e.g., PERPROD), a defining feature, per SAP IBP's configuration guides.

* Option D: This object contains user-defined criteria that monitor the running of business plans This is incorrect. This describes alerts or KPIs, not attribute key figures.

Thus, C is the relevant feature, per SAP IBP's official definition.

NEW QUESTION # 33

Which Supply Planning processes are part of the tactical planning level within a planning hierarchy? Note:
There are 2 correct answers to this question.

- A. Order Prioritization
- B. Stock Replenishment
- C. Balancing Supply and Demand
- D. Inventory Build and Reduction

Answer: C,D

Explanation:

In SAP IBP, the planning hierarchy includes strategic (long-term), tactical (medium-term), and operational (short-term) levels.
Tactical planning (e.g., monthly horizon) focuses on mid-term supply chain decisions.

* Option A: Order PrioritizationThis is incorrect. Order prioritization is an operational-level process, typically in SAP IBP for Response and Supply, dealing with short-term order allocation, not tactical planning.

* Option B: Stock ReplenishmentThis is incorrect. Stock replenishment is operational, focusing on short-term actions (e.g., daily/weekly restocking), not tactical mid-term planning.

* Option C: Inventory Build and ReductionThis is correct. Tactical planning involves decisions like building inventory ahead of demand peaks or reducing excess stock over months, aligning with SAP IBP's Inventory Optimization and S&OP processes at this level.

* Option D: Balancing Supply and DemandThis is correct. Balancing supply and demand over a medium-term horizon (e.g., via S&OP or supply heuristics) is a core tactical process in SAP IBP, ensuring resource alignment, per official planning hierarchy definitions.

Thus, C and D are tactical supply planning processes, per SAP IBP's planning framework.

NEW QUESTION # 34

Which prerequisites must be met to maintain data types via the SAP IBP, add-in for Microsoft Excel? Note:
There are 2 correct answers to this question.

- A. An applicable business catalog is assigned to your business role
- B. The Normalized setting is available in the Planning Area
- C. The Inquire tab is activated in Microsoft Excel
- D. Restriction types are set correctly

Answer: A,C

Explanation:

Maintaining master data types via the SAP IBP Excel add-in (e.g., adding Products, Locations) requires specific system and user setup, as per SAP IBP's Excel integration guidelines.

* Option A: The Normalized setting is available in the Planning AreaThis is incorrect. "Normalized" is not a standard setting in SAP IBP planning areas related to master data maintenance. It may refer to data normalization conceptually, but it's not a prerequisite.

* Option B: Restriction types are set correctlyThis is incorrect. "Restriction types" is not a defined term in SAP IBP for Excel-based master data maintenance. Restrictions might apply to planning filters, not data types.

* Option C: The Inquire tab is activated in Microsoft ExcelThis is correct. The Inquire tab (an Excel add-in) must be enabled to support advanced features like master data maintenance in SAP IBP's Excel UI, ensuring compatibility and functionality, per SAP's

technical requirements.
* Option D: An applicable business catalog is assigned to your business roleThis is correct. Users need a business role with a catalog (e.g., SAP_BR_PLANNER) that includes permissions for master data maintenance (e.g., via the "Manage Master Data" tile), per SAP IBP's security model.
Thus, C and D are prerequisites for maintaining data types in Excel, per SAP IBP's official setup documentation.

NEW QUESTION # 35
How do you achieve rolling aggregation with SAP IBP?

- A. Using a key figure calculation
- B. Using an appropriate period weight factor
- C. Using an attribute as a key figure
- D. Using a local member

Answer: A

Explanation:
Rolling aggregation in SAP IBP refers to calculating a cumulative or moving total across a time horizon (e.g., year-to-date sales). This is a common requirement in planning and reporting, achieved through specific configuration methods.
* Option A: Using an attribute as a key figureThis is incorrect. Attributes as key figures provide static values (e.g., Product Category), not dynamic time-based aggregations like rolling totals.
* Option B: Using an appropriate period weight factorThis is incorrect. Period weight factors adjust proportional disaggregation (e.g., splitting monthly data to weeks), not rolling aggregation across periods.
* Option C: Using a key figure calculationThis is correct. Rolling aggregation is achieved in SAP IBP via key figure calculations, such as the CUMULATE function (e.g., KF2 = CUMULATE(KF1)), which sums values from the start of the horizon to the current period. This is configured in the Planning Areas app and is a standard method for time-series calculations, per SAP IBP's official documentation on key figure calculations.
* Option D: Using a local memberThis is incorrect. Local members in the Excel add-in allow ad-hoc calculations within a planning view, but they are user-specific and not a system-configured method for rolling aggregation across the planning area.
Thus, C is the correct method for achieving rolling aggregation, aligning with SAP IBP's calculation capabilities.

NEW QUESTION # 36
......

Before the clients purchase our C-IBP-2502 study materials, they can have a free trial freely. The clients can log in our company's website and visit the pages of our products. The pages of our products lists many important information about our C-IBP-2502 study materials and they include the price, version and updated time of our products, the exam name and code, the total amount of the questions and answers, the merits of our C-IBP-2502 Study Materials and the discounts. You can have a comprehensive understanding of our C-IBP-2502 study materials after you see this information. Then you can look at the free demos and try to answer them to see the value of our C-IBP-2502 study materials and finally decide to buy them or not.
