

API-SIEE시험대비덤프최신샘플문제 - API-SIEE시험대비인증공부자료

인기자격증 C-C4H450-04인증덤프 샘플문제 시험덤프 최신자료

ITDumpsKR의 엘리트는 다년간 IT업계에 종사한 노하우로 높은 적응율을 자랑하는 SAP C-C4H450-04덤프를 연구제작하였습니다. 한국어 온라인서비스가 가능하기에 SAP C-C4H450-04덤프에 관하여 궁금한 점이 있으신 분은 구매전 문의하시면 됩니다. SAP C-C4H450-04덤프로 시험에서 좋은 성적 받고 자격증 취득하시길 바랍니다.

최신 SAP Certified Integration Associate C-C4H450-04 무료샘플문제 (Q54-Q59):

질문 #54

How can you determine if a field in the message mapping in SAP Cloud Platform Integration is an extension field?

- A. By the WSDL naming convention
- B. By the mapping functions
- C. By the used namespace
- D. By the mapping icon

정답C

질문 #55

Which transaction codes do you use to register and activate the IDoc service on SAP ERP?

- A. SICF and IDoc, respectively
- B. IDoc and RBDMIDOC, respectively
- C. SRTIDOC and SICF, respectively
- D. SICF and RBDMIDOC, respectively

정답C

질문 #56

Which of the following business functions are supported by SAP S/4HANA Settlement Management?
Note: There are 3 correct Answers to this question

- A. Calendar-based settlement
- B. Evaluated receipt settlement
- C. Advance payments
- D. Business-volume-related rebates
- E. Accrual conditions

정답A,B,C

질문 #57

Which of the following views can be maintained for a material with material type SERV (Service

Itexamdump에서 제공하는 제품들은 품질이 아주 좋으며 또 업뎃속도도 아주 빠릅니다 만약 우리가제공하는API API-SIEE인증시험관련 덤프를 구매하신다면API API-SIEE시험은 손쉽게 성공적으로 패스하실 수 있습니다.

API API-SIEE 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> • Electrical Induction Motors: Covers design and construction standards, materials of construction, and motor testing requirements for electrical induction motors.
주제 2	<ul style="list-style-type: none"> • Terms and Definitions: Covers the foundational terminology and definitions used throughout electrical source inspection work.
주제 3	<ul style="list-style-type: none"> • Motor Control Centers (Low to Medium Voltage): Covers design standards, materials, enclosure types, breakers, amp capacity, cable entry, and grounding components for MCCs.
주제 4	<ul style="list-style-type: none"> • Electrical Skid Mounted Equipment: Addresses inspection of skid-mounted assemblies including hazardous location equipment, grounding, cable systems, control wiring, and applicable codes.

주제 5	<ul style="list-style-type: none"> • Examination Methods, Tools and Equipment: Covers the inspection techniques used in the field, including dimensional, visual, electrical testing, functional testing, and coatings inspections.
주제 6	<ul style="list-style-type: none"> • Switchgear (Low & Medium Voltage): Covers design, construction, ratings, interlocks, wiring, enclosures, bus compartments, breakers, transformers, and metering for LV and MV switchgear.
주제 7	<ul style="list-style-type: none"> • Source Inspection Management Program: Addresses the organizational framework and management practices that govern source inspection programs.
주제 8	<ul style="list-style-type: none"> • Electrical Inspection Tools and Test Equipment: Covers the tools and test equipment used by inspectors to perform electrical source inspections.

API-SIEE 시험대비 인증 공부자료 - API-SIEE 시험대비

Itexamdump는 다른 회사들이 이루지 못한 Itexamdump만의 매우 특별한 이점을 가지고 있습니다. Itexamdump의 API-SIEE 덤프는 전문적인 엔지니어들의 API-SIEE 시험을 분석이후에 선택이 된 문제들이고 적지만 매우 가치 있는 질문과 답변들로 되어있는 학습가이드입니다. 고객들은 단지 Itexamdump에서 제공해드리는 API-SIEE 덤프의 질문과 답변들을 이해하고 마스터하면 첫 시험에서 고득점으로 합격을 할 것입니다.

최신 ICP Programs API-SIEE 무료 샘플문제 (Q13-Q18):

질문 # 13

Who should the Source Inspector notify if they believe that product quality may be compromised by schedule pressures?

- A. The inspection coordinator
- B. Project Manager
- C. Master Scheduler
- D. The shop QA Manager

정답: A

설명:

The correct answer is B. The inspection coordinator. In the API source inspection framework, the inspector's role is to independently observe, verify, document, and communicate quality-related concerns through the established inspection reporting chain. When schedule pressure appears likely to compromise product quality, the issue must be escalated to the inspection coordinator, because that person manages inspection execution, communication flow, and coordination between the purchaser, supplier, and inspection function. This keeps the inspector independent and ensures the concern is addressed formally rather than informally.

The other options are less appropriate. The Master Scheduler is responsible for planning and timing, not for controlling inspection escalation. The shop QA Manager belongs to the supplier's organization, so reporting directly there could weaken the inspector's independent reporting path. The Project Manager may ultimately need awareness, but the normal and correct first notification route in source inspection administration is through the inspection coordinator. This approach aligns with API source inspection practice, where quality threats, deviations, and risks are communicated through designated inspection channels so that corrective action, hold points, and surveillance priorities can be managed properly.

질문 # 14

Which statement about a WP-II motor enclosure is correct according to the guide definitions?

- A. No outside air enters the motor
- B. It is identical to TEFC construction
- C. Outside air is drawn into and passed through the motor interior for cooling
- D. It is used only for DC motors

정답: C

질문 # 15

When a deviation from specifications, drawings, codes, or standards is identified, the source inspector should FIRST treat it as:

- A. a schedule note
- B. a warranty issue
- C. a supplier observation only
- **D. a nonconformance**

정답: D

질문 # 16

According to API 541, subsequent to completion of manufacture and testing, the vendor shall revise and resubmit the previously supplied purchase data including all the following except:

- **A. rotor-balance report.**
- B. as-built data sheet.
- C. shop test data.
- D. operating manual.

정답: A

설명:

The correct answer is A. Under API 541, after manufacture and testing are complete, the vendor is required to revise and resubmit previously supplied purchase data to reflect the final delivered motor configuration and verified test results. This normally includes items such as the operating manual, the as-built data sheet, and the shop test data, because these documents are part of the final turnover package needed by the purchaser for installation, operation, maintenance, and records of compliance.

A rotor-balance report may certainly exist as part of manufacturing quality records or internal test documentation, and it can be important for vibration and mechanical integrity. However, it is not typically identified as part of the revised and resubmitted purchase data set in the same way as the operating manual, as-built data sheet, and shop test data. In source inspection practice, this distinction matters because not every internal manufacturing record becomes part of the formal purchaser data resubmittal package. Therefore, among the listed options, the item that is the exception is the rotor-balance report, making option A the verified answer.

질문 # 17

Which item is part of typical final inspection and shipping preparation for a liquid-immersed transformer?

- A. Reissue of procurement bid tabs
- **B. Verification that all FAT issues are resolved**
- C. Reclassification of the project risk register
- D. Elimination of all documentation requirements

정답: B

질문 # 18
