

## Pass Your Microsoft MB-700 Exam with Excellent New MB-700 Exam Notes Certainly

The Desktop Microsoft MB-700 Practice Exam Software contains real Microsoft MB-700 exam questions. This provides you with a realistic experience of being in an Microsoft MB-700 examination setting. This feature assists you in becoming familiar with the layout of the Microsoft MB-700 test and enhances your ability to do well on Microsoft Dynamics 365: Finance and Operations Apps Solution Architect (MB-700) examination.

### Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Sample Questions (Q189-Q194):

#### NEW QUESTION # 189

A company plans to implement Dynamics 365 Supply Chain Management.

You are a solution architect and need to prepare a Solution Blueprint document for this implementation.

You need to classify the requirements by type.

What is the classification for each requirement? To answer, drag the appropriate classifications to the correct requirements. Each classification may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

**Classifications**

- Functional
- Non-functional

**Answer Area**

Requirement	Classification
Evaluate system performance.	Classification
Convert a quote to a sales order.	Classification
Update an environment.	Classification

#### Answer:

Explanation:

**Classifications**

- Functional
- Non-functional

**Answer Area**

Requirement	Classification
Evaluate system performance.	Non-functional
Convert a quote to a sales order.	Functional
Update an environment.	Non-functional

Explanation:

Box 1: Non-functional

Requirements are commonly referred to as either functional or non-functional. Functional requirements describe what the solution needs to do or its behaviors, and non-functional requirements commonly describe non-behavior aspects of the solution such as performance requirements.

The following examples are of well-composed non-functional requirements:

Average screen load time for internal users that are not mobile will be less than three seconds.

External portal must be able to handle 100 concurrent users who are performing case submission.

Any credit card number that is used cannot be stored in Common Data Service environment.

Box 2: Functional

Example functional requirements

The following scenarios describe simple examples of functional requirements:

As a sales user, I need to be able to close an opportunity as lost and then capture why it was lost so that we can improve our sales tactics in the future.

As a sales manager, I need to be able to approve a discount on a quote so that I can reduce the total price and give a discount to the customer.

As a staff accountant, I want to be prevented from closing a batch that has pending items so that I do not have to reopen it later.

Box 3: Non-functional

Examples of common non-functional requirement types include:

Availability

Compliance/regulatory

\* -> Data retention/residency

Performance (response time, and so on)

Privacy

Recovery time

Security

Scalability
