The ATlassian ACP-620 certification will further demonstrate your expertise in your profession and remove any room for ambiguity on the hiring committee's part. People need to increase their level by getting the ATlassian ACP-620 Certification. You can choose flexible timings for the learning ATlassian ACP-620 exam questions online and practice with ATlassian ACP-620 exam dumps any time.

ATLASSIAN ACP-620 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Reporting: This section of the exam measures the skills of an Agile Reporting Analyst and covers using Jira's search, dashboard, and agile report capabilities to deliver actionable insights. It involves writing JQL queries for advanced filters, selecting appropriate gadgets for dashboards, and interpreting agile reports, such as burndown and cumulative flow diagrams, to guide data-driven decisions.
Topic 2	<ul style="list-style-type: none">Project Creation: This section of the exam measures the skills of a Jira Cloud Project Administrator and covers how to set up new projects that best fit a team's needs. It requires understanding when to choose company-managed versus team-managed projects, configuring project details and permissions, and recommending appropriate issue type schemes and project templates to meet specific business requirements.
Topic 3	<ul style="list-style-type: none">Managing Projects: This section of the exam measures the skills of a Jira Project Manager and addresses the ongoing administration of project settings. It includes assigning roles and permissions, managing versions, components, and custom fields, and configuring automatic issue assignment and field layouts to keep projects organized and aligned with governance policies.
Topic 4	<ul style="list-style-type: none">Automation: This section of the exam measures the skills of a Jira Automation Engineer and examines how to leverage Jira's automation features to update issues, send notifications, and enforce business rules. It requires creating, testing, and troubleshooting automation rules—using triggers, conditions, actions, and smart values—to streamline repetitive tasks and reduce manual effort.
Topic 5	<ul style="list-style-type: none">Board Configuration: This section of the exam measures the skills of a Scrum Master and focuses on creating and tailoring Scrum, Kanban, or Kanban-with-backlog boards to support team workflows. It covers translating requirements into filters, arranging columns and swimlanes to match processes, and troubleshooting board and filter setups to ensure accurate tracking of work items.

ATLASSIAN ACP-620 Exam is a valuable investment for professionals looking to boost their career in project management. Managing Jira Cloud Projects certification program validates their skills and knowledge in managing Jira Cloud Projects, which is a highly sought-after skill in today's job market. It is also an opportunity for professionals to keep up-to-date with the latest developments in project management and learn new techniques to manage projects more efficiently.

ATLASSIAN ACP-620 exam consists of 60 multiple-choice questions that need to be completed within 2 hours. ACP-620 exam is conducted online and can be taken at any time. The passing score for the exam is 65%, and the candidate will receive their certification immediately after passing the exam. Managing Jira Cloud Projects certification is valid for two years, after which the candidate will need to renew their certification by taking a renewal exam.

Free PDF Quiz ACP-620 - Managing Jira Cloud Projects Fantastic Vce Exam

Many people choose to sign up for the ATlassian ACP-620 certification examinations in order to advance their knowledge and abilities. We offer updated and actual ATlassian ACP-620 Dumps questions that will be enough to get ready for the ATlassian ACP-620 test. Our ATlassian ACP-620 questions are 100% genuine and will certainly appear in the next ATlassian ACP-620 test.

ATLASSIAN Managing Jira Cloud Projects Sample Questions (Q48-Q53):

NEW QUESTION # 48

You want to configure a Kanban board so that issues disappear from the Done column as soon as they are dragged into it. But you need to see Done issues in reports.

How can you achieve this behavior?

- A. modify a quick filter
- B. modify workflow status names
- C. modify the board filter
- **D. modify the board sub-filter**
- E. modify the unmapped statuses

Answer: D

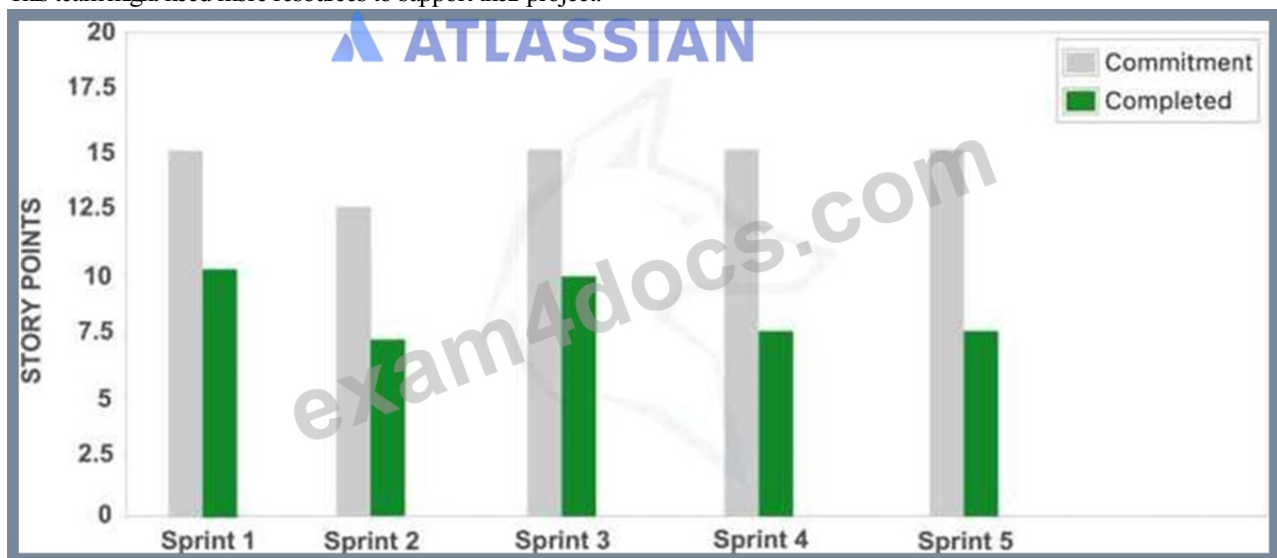

Explanation:

Modifying the board sub-filter allows you to exclude Done issues from the board view after they are moved to that status, while still keeping them in Jira and visible in reports. This way, they disappear from the board immediately but remain part of historical and reporting data.

NEW QUESTION # 49

According to the chart below, which of the following are true? (Choose three.)

This team might need more resources to support their project.

- **A. Sprint 3 and Sprint 5 start with 15 story points.**
- B. The team completed all issues in Sprint 3.
- C. Sprint 4 starts and ends with the same story points.
- **D. The team has 5 unresolved story points in Sprint 1.**
- **E. The scrum master successfully measures the team's capability.**

Answer: A,D,E

Explanation:

The chart shows that the team regularly failed to complete their committed story points.

The relevant parties (Manager, scrum master, etc) should evaluate their team's capability before deciding total story points for each sprint.

This chart helps users to execute their sprint planning efficiently.

All sprints start with 15 story points except Sprint 2.

Sprint 1 and Sprint 3 end with 10 story points. Sprint 2, Sprint 4, and Sprint 5 end with 7.5 story points.

NEW QUESTION # 50

Nash's team has 10 completed issues in the current active sprint.

As a project administrator, what is the minimum permission Nash needs to complete the sprint? (Choose two.)

- **A. Manage Sprints**
- **B. Browse Projects**
- C. Schedule Issues
- D. Edit Issues
- E. Transition Issues
- F. Move Issues

Answer: A,B

NEW QUESTION # 51

Your company-managed kanban project has a total of six statuses in the workflows. Which statement about the kanban board is true?

- A. The board must have at least six columns.
- B. The board can include only statuses that are in even/ workflow.
- **C. The board can have multiple in Progress statuses, from different workflows, mapped to the same column.**
- D. The board must have the backlog and epic panel enabled.

Answer: C

Explanation:

In a company-managed Kanban project, the board can have multiple In Progress statuses from different workflows mapped to the same column. This allows teams to visually group similar types of work even if the statuses come from different issue types or workflows. It provides flexibility without requiring one column per status.

NEW QUESTION # 52

Which of the following are the best scenarios to use Components more than Custom Field? (Choose two.)

- **A. The project administrator will manage the new field.**
- B. The user can only select a single option from the new field.
- C. The Jira administrator will manage the new field.
- D. All Jira projects can add this new field to their issue screen.
- **E. The assignee must be automatically populated based on the selected value.**

Answer: A,E

NEW QUESTION # 53

.....

By doing this you can stay competitive and updated in the market. There are other several Managing Jira Cloud Projects (ACP-620) certification exam benefits that you can gain after passing the Managing Jira Cloud Projects (ACP-620) exam.
