What's more, part of that DumpsQuestion C-CPI-2506 dumps now are free: <https://drive.google.com/open?id=12fqvkoTDFVYZJEkEB4wB37o7OLZtu83>

Our C-CPI-2506 study prep has a pass rate of 98% to 100% because of the high test hit rate. So our C-CPI-2506 study materials are not only effective but also useful. As we all know, time is very important to everyone. Some candidates are very busy with their own work and families. It is very difficult to take time out to review the C-CPI-2506 Exam. But if you use C-CPI-2506 exam materials, you will learn very little time and have a high pass rate. Our C-CPI-2506 study materials are worthy of your trust.

SAP C-CPI-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 2	<ul style="list-style-type: none"> Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 3	<ul style="list-style-type: none"> SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.
Topic 4	<ul style="list-style-type: none"> SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

selection can only regret. DumpsQuestion's SAP C-CPI-2506 exam training materials are necessary to every IT person. With this materials, all of the problems about the SAP C-CPI-2506 will be solved. DumpsQuestion's SAP C-CPI-2506 exam training materials have wide coverage, and update speed. This is the most comprehensive training materials. With it, all the IT certifications need not fear, because you will pass the exam.

SAP Certified Associate - Integration Developer Sample Questions (Q56-Q61):

NEW QUESTION # 56

You call the following URL in your browser: [https://sapes5.sapdevcenter.com/sap/opu/odata/iwbep/GWSAMPLE_BASIC/ProductSet\('HT-1000'\)/ToSalesOrderLineItems](https://sapes5.sapdevcenter.com/sap/opu/odata/iwbep/GWSAMPLE_BASIC/ProductSet('HT-1000')/ToSalesOrderLineItems). What file type is displayed?

- A. Java
- **B. XML**
- C. HTML
- D. PHP

Answer: B

Explanation:

The URL shown is an OData service endpoint exposed from the SAP ES5 Gateway demo system:

[https://sapes5.sapdevcenter.com/sap/opu/odata/iwbep/GWSAMPLE_BASIC/ProductSet\('HT-1000'\)/ToSalesOrderLineItems](https://sapes5.sapdevcenter.com/sap/opu/odata/iwbep/GWSAMPLE_BASIC/ProductSet('HT-1000')/ToSalesOrderLineItems)

OData services in SAP Gateway return XML responses by default when called in a browser, unless otherwise specified by request headers (like JSON format).

The structure follows AtomPub/Atom XML representation, showing entity details and navigation properties.

Therefore, the file type displayed in the browser is XML, not HTML, Java, or PHP.

NEW QUESTION # 57

In the SAP Integration Suite, where can you change the virtual host name?

- A. Design APIs
- **B. Settings APIs**
- C. Configure ? APIs
- D. Discover - APIs

Answer: B

Explanation:

In the SAP Integration Suite, you can change the virtual host name in the Settings APIs. The Settings APIs allow you to configure various aspects of your API provider, such as the virtual host name, the base path, the authentication method, and the CORS settings. NEW QUESTION # 58

You want to access individual entities of an HTTP call over XPath. What must you do if no namespace mapping exists?

- A. Remove the XML prolog.
- **B. Remove the namespaces.**
- C. Convert the namespaces to JSON.
- D. Convert the namespaces to XML

Answer: B

Explanation:

If no namespace mapping exists, you must remove the namespaces to access individual entities of an HTTP call over XPath.

Namespaces are prefixes that identify the source or context of an XML element or attribute. If the namespaces are not mapped to a URI, they can cause errors or conflicts when using XPath expressions. Therefore, you must remove the namespaces before applying XPath queries.

NEW QUESTION # 59

On which standards is OData based?

- A. HTTP, AtomPub, and JSON
- B. TCP, AtomPub, and JSON
- C. SOAP, AtomPub, and JSON

Answer: A

Explanation:

OData (Open Data Protocol) is a REST-based protocol standardized by OASIS and adopted widely in SAP systems.

It builds on HTTP as the communication protocol.

It uses AtomPub (Atom Publishing Protocol) and JSON as payload representation formats.

SOAP is not used for OData; instead, OData relies on REST principles.

TCP is the underlying transport layer, but OData is explicitly defined over HTTP.

Thus, the correct basis for OData is HTTP, AtomPub, and JSON.

NEW QUESTION # 60

What does the messaging model of the Apache Camel Data Model consist of?

- A. Header, Exchange ID, in-message
- B. Header, body, properties
- C. Header, body, attachment
- D. Header, properties, attachment

Answer: C

Explanation:

The messaging model of the Apache Camel Data Model consists of three parts: header, body, and attachment. The header contains information related to the message, such as addressing, routing, or metadata. The body contains the payload or the content of the message. The attachment contains optional data that can be attached to the message, such as files or images. The Apache Camel Data Model is used by SAP Integration Suite to process messages of any format using various components and data formats.
