## Epic EDI101 Bridges Interfaces Exam Questions and Answers 2024

Does every HL7 message have to be encoded with the characters 1A- & ? - answer✓✓No, the encoding characters can be any printable character.

Imagine that your message begins with MSH1A&1. How would you encode the string "Th result is positive & has a value of 2.7 x 10A3."? - answer✓✓The result is positive \T has a value of 2.7 x 10\5\3.

Why is the NTE segment special? - answer✓✓Context; its meaning depends on the segment it follows

What is the difference between receiving an empty field |I and the delete sequence ? - answer✓✓An empty field is ignored by the interface, whereas the delete character will delete information from the database, assuming the field in question supports the delete character.

Aside from HL7 Version 2, name two other standards supported in Bridges? - answer✓✓X12, FHIR, NCPDP, DICOM, and Direct.

What is Bridges? - answer✓✓Epic's interfacing messages along with the application. It consists of both the interface infrastructure to build, send, receive, and file messages along with the tools and utilities to maintain those interfaces

What are stored in the Event Queue, Data Queue, and Control Queue? - answer✓✓The Event Queue contains the information needed to build a message. Usually this is a patient ID, an encounter DAT, and the type of message to be built, amongst other information.

The Data Queue contains the text of HL7 messages and additional metadata.

The Control Queue is a to-do list of message numbers to send or file.

Are messages ever manually deleted from the Data Queue? - answer✓✓No, never. They are purged only by an automated purge job.

What are two ways that interface messages are sent and received? - answer✓✓TCP/IP with an interface engine is the most common communication method. Interconnect is used for HTTPS or other communication outside your local network.

As you know, our v practice exam has a vast market and is well praised by customers. All you have to do is to pay a small fee on our EDI101 practice materials, and then you will have a 99% chance of passing the exam and then embrace a good life. We are confident that your future goals will begin with this successful exam. So choosing our EDI101 Training Materials is a wise choice. Our EDI101practice materials will provide you with a platform of knowledge to help you achieve your dream.

Once you start to become diligent and persistent, you will be filled with enthusiasms. Nothing can defeat you as long as you are optimistic. We sincerely hope that our EDI101 study materials can become your new purpose. Our EDI101 Exam Questions can teach you much practical knowledge, which is beneficial to your career development. And with the EDI101 certification, you are bound to have a brighter future.

## Download PrepAwayPDF EPIC EDI101 Exam Dumps after Paying Affordable Charges

Maybe most of people prefer to use the computer when they are study, but we have to admit that many people want to learn buy the paper, because they think that studying on the computer too much does harm to their eyes. EDI101 test questions have the function of supporting printing in order to meet the need of customers. You can print our EDI101 Exam Question on papers after you have downloaded it successfully. It not only can help you protect your eyes, but also it will be very convenient for you to make notes. We believe that you will like our EDI101 exam prep.

## EPIC CEE: Bridges Interfaces Application Essentials Exam (2026 Version) Sample Questions (Q14-Q19):

### NEW QUESTION # 14

Which interfaces can perform Patient Validation? (Select the most complete answer)

- A. Incoming results interfaces
- B. All outgoing patient-based interfaces
- C. Only incoming interfaces that can create patients
- D. All incoming patient-based interfaces

**Answer: D**

Explanation:

Patient Validation is a protective step taken during the filing process for all incoming patient-based interfaces . Whether the interface is handling admissions (ADT), clinical results (ORU), or pharmacy orders (RDE), the system must verify that the patient identified by the ID matches the demographic data in the message before any data is written to Chronicles.

### NEW QUESTION # 15

Which information is available in an interface monitor? (SELECT ALL THAT APPLY)

- A. Communication status
- B. Number of messages in the Control Queue
- C. Number of skipped messages
- D. List of errors logged today

**Answer: A,B,C,D**

Explanation:

The Interface Monitor is the primary dashboard for interface administrators. It provides a comprehensive overview of health, including whether the interface is connected ( Communication status ), the volume of traffic waiting to be processed ( Control Queue ), any messages that were manually bypassed ( skipped messages ), and a summary of errors encountered during the day.

### NEW QUESTION # 16

The Interface Specification Audit Report will show changes to which of the following items?

- A. Port and IP Address
- B. Interface Alerts
- C. Message Volume
- D. Profile Variables

**Answer: A,D**

Explanation:

The Specification Audit Report is designed to track configuration changes-the "build " of the interface. It records modifications to critical connectivity settings like the Port and IP Address (Option C) and functional logic changes in Profile Variables (Option D). Operational data like Message Volume (Option A) or active Interface Alerts (Option B) are monitored in real-time activities and are not part of the static specification audit.

### NEW QUESTION # 17

Why does Epic strongly recommend or require Patient Validation on incoming interfaces?

- A. Ensure data files to the correct patient
- B. File data into the system faster
- C. Prevent the creation of duplicate patients
- D. Help maximize revenue

**Answer: A**

Explanation:

Patient Validation is a critical safety feature. Its primary purpose is to cross-reference multiple identifiers (like Name, DOB, and Sex) received in a message against the record found via the ID. If the ID points to "John Doe" but the message text says "Jane Smith," validation will fail and prevent clinical data from filing to the wrong patient record, which is a major patient safety risk.

#### **NEW QUESTION # 18**

When triaging an error, what are the error buckets you might place an error in? (SELECT ALL THAT APPLY)

- **A. Fix**
- B. Suppress
- C. Purge
- **D. Ignore**
- **E. Work**

**Answer: A,D,E**

Explanation:

When using the Error Resolution Planner or triaging logs, analysts categorize errors into three main "buckets" to define the workflow: Fix (the data or configuration needs to be corrected), Ignore (the error is expected or harmless and requires no action), and Work (the error requires further investigation or manual intervention). While "Suppress" is a configuration action and "Purge" is a maintenance task, they are not considered the standard triage buckets for active error management.

#### **NEW QUESTION # 19**
