There are multiple choices on the versions of our C_CPI_2506 learning guide to select according to our interests and habits since we have three different versions of our C_CPI_2506 exam questions: the PDF, the Software and the APP online. The Software and APP online versions of our C_CPI_2506 preparation materials can be practiced on computers or phones. They are new developed for the reason that electronics products have been widely applied to our life and work style. The PDF version of our C_CPI_2506 Actual Exam supports printing, and you can practice with papers and take notes on it.

SAP C_CPI_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.

Topic 2	<ul style="list-style-type: none"> • SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.
Topic 3	<ul style="list-style-type: none"> • SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.
Topic 4	<ul style="list-style-type: none"> • Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.

Splendid C_CPI_2506 Exam Braindumps are from High-quality Learning Quiz - Actual4test

Actual4test is a website engaged in the providing customer C_CPI_2506 VCE Dumps and makes sure every candidates passing actual test easily and quickly. We have a team of IT workers who have rich experience in the study of SAP dumps torrent and they check the updating of SAP top questions everyday to ensure the accuracy of exam collection.

SAP Certified Associate - Integration Developer Sample Questions (Q41-Q46):

NEW QUESTION # 41

In which of the following must you call `getBody()` to access the payload in a Groovy script?

- A. property
- B. camelcontext
- C. message
- D. header

Answer: C

Explanation:

To access the payload in a Groovy script, you must use the message object and call the `getBody()` method on it. The message object represents the current message that is being processed in the integration flow. It has methods to get and set the message body, headers, properties, and attachments. The `getBody()` method returns the message body as an object of the specified type, such as `java.lang.String`, `java.io.InputStream`, or `org.w3c.dom.Document`. Reference: General Scripting Guidelines | SAP Help Portal, Message | SAP Help Portal

NEW QUESTION # 42

You want to implement a synchronous call to a remote HTTP API as an integration flow component. Which adapter can you use?

- A. Mail
- B. AMQP
- C. OData
- D. SFTP

Answer: C

Explanation:

For a synchronous call to a remote HTTP API in an integration flow:

The OData adapter (or HTTP adapter) is used to perform synchronous request-reply communication with REST-based services.
AMQP # Messaging protocol, not synchronous.
SFTP # File-based transfer, asynchronous.
Mail # For SMTP/IMAP, not synchronous API calls.
Thus, the correct adapter for a synchronous remote API call is OData (or HTTP adapter, depending on configuration).

NEW QUESTION # 43

You want to integrate a SOAP adapter into an integration process and enable the adapter to send messages to the integration flow. Which user role must you set up in the SOAP adapter?

- A. **ESBMessaging send**
- B. MessagingsendtoCI
- C. MessagingSend

Answer: A

Explanation:

To integrate a SOAP adapter into an integration process and enable the adapter to send messages to the integration flow, you must set up the ESBMessaging send user role in the SOAP adapter. The ESBMessaging send user role grants the permission to send messages to the Enterprise Service Bus (ESB) of the Cloud Integration capability. The ESB is responsible for routing and delivering messages between different integration flows and adapters. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 44

Where can you configure a static payload? Note: There are 2 correct answers to this question.

- A. **In a Data Store Operation component**
- B. In a Content Modifier component of the Message Header tab
- C. In a Groovy script
- D. **In a Content Modifier component of the Message Body tab**

Answer: A,D

Explanation:

You can configure a static payload in a Data Store Operation component or in a Content Modifier component of the Message Body tab. A Data Store Operation component allows you to store or retrieve messages in a data store. You can use the Write operation to store a static payload in a data store entry with a specified key. A Content Modifier component allows you to modify the message content, headers, and properties. You can use the Message Body tab to define a static payload for the message. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 45

Which messaging patterns does SAP Event Mesh support for asynchronous communication?

- A. Point-to-point and multicast messaging
- B. Request/reply messaging and multicast messaging
- C. **Publish/subscribe and point-to-point messaging**
- D. Publish/subscribe and request/reply messaging

Answer: C

Explanation:

SAP Event Mesh supports two key asynchronous messaging patterns:

Publish/Subscribe # Producers publish an event once, multiple subscribers consume independently.

Point-to-Point (Queue-based) # Messages sent from one producer to a single consumer via a queue.

Other options are incorrect:

Request/Reply # Synchronous pattern, not the focus of Event Mesh.

Multicast messaging # Not explicitly supported; handled through Pub-Sub.

Thus, Event Mesh supports Publish/Subscribe and Point-to-Point messaging patterns.

NEW QUESTION # 46

.....

Possessing SAP certification will be a standard to test IT workers' qualifications. C_CPI_2506 reliable exam preparation will be a key to a certification. If you want to apply for a senior management position, one certification will be an outstanding advantage.
