Don't need a lot of time and money, only 30 hours of special training, and you can easily pass your first time to attend IAPP Certification CIPT Exam. DumpsTests are able to provide you with test exercises which are closely similar with real exam questions.

## Who should take the CIPT exam

The CIPT Exam is ideal for those tech pros that want to accelerate their data privacy career. When looking at the role that a CIPT certified professional would play, it's most relevant to those that develop, engineer, and audit IT services, applications, and devices. Those taking the course will develop an understanding of privacy-related issues and practices in the context of the design and implementation of information and communication technologies and systems.

became successful.

## IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q186-Q191):

### NEW QUESTION # 186

#### SCENARIO

You have just been hired by Ancillary.com, a seller of accessories for everything under the sun, including waterproof stickers for pool floats and decorative bands and cases for sunglasses. The company sells cell phone cases, e-cigarette cases, wine spouts, hanging air fresheners for homes and automobiles, book ends, kitchen implements, visors and shields for computer screens, passport holders, gardening tools and lawn ornaments, and catalogs full of health and beauty products. The list seems endless. As the CEO likes to say, Ancillary offers, without doubt, the widest assortment of low-price consumer products from a single company anywhere.

Ancillary's operations are similarly diverse. The company originated with a team of sales consultants selling home and beauty products at small parties in the homes of customers, and this base business is still thriving.

However, the company now sells online through retail sites designated for industries and demographics, sites such as "My Cool Ride" for automobile-related products or "Zoomer" for gear aimed toward young adults.

The company organization includes a plethora of divisions, units and outrigger operations, as Ancillary has been built along a decentered model rewarding individual initiative and flexibility, while also acquiring key assets. The retail sites seem to all function differently, and you wonder about their compliance with regulations and industry standards. Providing tech support to these sites is also a challenge, partly due to a variety of logins and authentication protocols.

You have been asked to lead three important new projects at Ancillary:

The first is the personal data management and security component of a multi-faceted initiative to unify the company's culture. For this project, you are considering using a series of third-party servers to provide company data and approved applications to employees.

The second project involves providing point of sale technology for the home sales force, allowing them to move beyond paper checks and manual credit card imprinting.

Finally, you are charged with developing privacy protections for a single web store housing all the company's product lines as well as products from affiliates. This new omnibus site will be known, aptly, as "Under the Sun." The Director of Marketing wants the site not only to sell Ancillary's products, but to link to additional products from other retailers through paid advertisements. You need to brief the executive team of security concerns posed by this approach.

What technology is under consideration in the first project in this scenario?

- A. MAC filtering
- **B. Server driven controls.**
- C. Data on demand
- D. Cloud computing

**Answer: B**

### NEW QUESTION # 187

What is the most important requirement to fulfill when transferring data out of an organization?

- A. Ensuring the organization sending the data controls how the data is tagged by the receiver.
- B. Extending the data retention schedule as needed.
- **C. Ensuring the commitments made to the data owner are followed.**
- D. Ensuring the organization receiving the data performs a privacy impact assessment.

**Answer: C**

Explanation:

The most important requirement when transferring data out of an organization is ensuring that the commitments made to the data owner are followed. This includes adhering to any privacy policies, consent agreements, and legal obligations regarding how the data should be handled, protected, and used by the receiving party. Fulfilling these commitments helps maintain trust and compliance with data protection laws (IAPP, Certified Information Privacy Technologist (CIPT) materials).

### NEW QUESTION # 188

Machine-learning based solutions present a privacy risk because?

- A. Training data used during the training phase is compromised.
- B. The decision-making process used by the solution is not documented.
- C. Machine-learning solutions introduce more vulnerabilities than other software.
- D. The solution may contain inherent bias from the developers.

**Answer: A**

Explanation:

Machine-learning solutions present a privacy risk primarily because the training data used during the training phase may contain sensitive information. If this data is compromised, it can lead to privacy breaches.

Machine-learning models can also inadvertently memorize and reproduce sensitive data from the training set.

Reference:IAPP CIPT Study Guide, "Privacy Risks in Machine Learning," which discusses the significance of ensuring the security and privacy of training data.

### NEW QUESTION # 189

Which of the following would be the best method of ensuring that Information Technology projects follow Privacy by Design (PbD) principles?

- A. Utilize Privacy Enhancing Technologies (PETs) as a part of product risk assessment and management.
- B. Identify the privacy requirements as a part of the Privacy Impact Assessment (PIA) process during development and evaluation stages.
- C. Develop training programs that aid the developers in understanding how to turn privacy requirements into actionable code and design level specifications.
- D. Develop a technical privacy framework that integrates with the development lifecycle.

**Answer: C**

### NEW QUESTION # 190

What is the main function of the Amnesic Incognito Live System or TAILS device?

- A. It accesses systems with a credential that leaves no discernable tracks.
- B. It causes a system to suspend its security protocols.
- C. It encrypts data stored on any computer on a network.
- D. It allows the user to run a self-contained computer from a USB device.

**Answer: D**

Explanation:

The Amnesic Incognito Live System (TAILS) is a security-focused, Debian-based Linux distribution aimed at preserving privacy and anonymity. It is designed to be run from a USB stick or a DVD, which ensures that the system does not leave any traces on the computer it is used on. When TAILS is shut down, it leaves no trace of having been run on the machine. This feature makes it particularly useful for users who need to use a secure and private operating system on potentially untrusted machines. References to TAILS and its functions can be found in various privacy and security guidelines.

### NEW QUESTION # 191

.....

Prep4sureGuide's IAPP CIPT exam training materials are bring the greatest success rate to all the candidates who want to pass the exam. IAPP CIPT exam is a challenging Certification Exam. Besides the books, internet is considered to be a treasure house of knowledge. In Prep4sureGuide you can find your treasure house of knowledge. This is a site of great help to you.
