VMware Cloud Management and Automation Advanced Design Sample

Questions (Q24-Q29):

NEW QUESTION # 24
An architect is designing an Aria Automation Config (SaltStack Config) for configuration management and looking to integrate with Aria Automation to meet the following conditions:
Multi-Tenancy in Aria Automation
Automated SaltStack Minion agent installation via Cloud Templates resource type What two aspects does the architect need to include? (Choose two.)

- A. Verify Aria Automation administrator credentials and SaltStack Config root-level access.
- B. The Aria Automation Config (SaltStack Config) can be associated with multi-tenancy.
- C. The integration process will install & enable the SaltStack config service.
- D. The Aria Automation Config (SaltStack Config) service installed via standalone method can be accessed via Aria Automation Service Console.
- E. The Aria Automation Config (SaltStack Config) can be only associated with a single tenancy.

Answer: B,C

Explanation:
The integration process ensures SaltStack Config is installed and enabled for configuration management.
SaltStack Config supports multi-tenancy, allowing use within multi-tenant Aria Automation environments and automated agent installation via Cloud Templates.
