Answer: A,B

NEW QUESTION # 22

Which of the following statements about ImpEx are true?
There are two correct answers.

- A. ImpEx can be used to create backups
- B. It is closely related to database
- C. ImpEx is an out-of-the-box XML-based import and export framework
- D. You can use ImpEx to create, update, export, and remove items

Answer: A,D

NEW QUESTION # 23

How do you compare the classification approach with the type system approach?
There are three correct answers.

- A. They are both defined in *-items.xml. Yet, the type system approach is more efficient, while classification is not easily accessible through SAP Commerce API
- B. Changes based on the type system approach require build, restart, and deployment
- C. Type system approach can be used for attributes that belong to most items
- D. Classification approach can be used for situations where the available attributes change frequently or for attributes that are shared by a small range of products
- E. The performance cost is higher for the type system due to its greater usage of system resources, whereas the classification system involves little cost

Answer: B,C,D
