on all smart devices saves your time. Because of this, the portability of WGUSecure Software Design (KEO1) Exam (Secure-Software-Design) dumps PDF aids in your preparation regardless of place and time restrictions.

WGUSecure Software Design (KEO1) Exam Sample Questions (Q105-Q110):

NEW QUESTION # 105

Which type of security analysis is performed by injecting malformed data into open interfaces of an executable or running application and is most commonly executed during the testing or deployment phases of the SDLC?

- A. Dynamic Analysis
- B. Static Analysis
- C. Manual Code Review
- **D. Fuzz Testing**

Answer: D

NEW QUESTION # 106

Which secure coding best practice says to use a single application-level authorization component that will lock down the application if it cannot access its configuration information?

- A. Data protection
- B. Communication security
- **C. Access control**
- D. Session management

Answer: C

NEW QUESTION # 107

Which threat modeling approach concentrates on things the organization wants to protect?

- **A. Asset-centric**
- B. Application-centric
- C. Attacker-centric
- D. Server-centric

Answer: A

Explanation:

The Asset-centric approach to threat modeling focuses on identifying and protecting the assets that are most valuable to an organization. This method prioritizes the assets themselves, assessing their sensitivity, value, and the impact on the business should they be compromised. It is a strategic approach that aims to safeguard the confidentiality, integrity, and availability of the organization's key assets.
