

# Pass Guaranteed Quiz VMware - 2V0-16.25 Frequent Updates

DOWNLOAD the newest Prep4cram 2V0-16.25 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1QCuE0Lbhnt90dIHgyjAZvWLVcZVfgIqS>

The VMware 2V0-16.25 certification exam is one of the valuable credentials designed to demonstrate a candidate's technical expertise in information technology. They can remain current and competitive in the highly competitive market with the 2V0-16.25 certificate. For novices as well as seasoned professionals, the VMware vSphere Foundation 9.0 Administrator Questions provide an excellent opportunity to not only validate their skills but also advance their careers.

Our windows software and online test engine of the 2V0-16.25 exam questions are suitable for all age groups. At the same time, our operation system is durable and powerful. So you totally can control the 2V0-16.25 study materials flexibly. It is enough to wipe out your doubts now. If you still have suspicions, please directly write your questions and contact our online workers. And we will give you the most professions suggestions on our 2V0-16.25 learning guide.

## Excellent 2V0-16.25 Frequent Updates & Leading Offer in Qualification Exams & Fast Download VMware VMware vSphere Foundation 9.0 Administrator

For the complete VMware vSphere Foundation 9.0 Administrator exam preparation and success, the Prep4cram 2V0-16.25 exam practice test questions are the best choice. With the VMware 2V0-16.25 Exam Questions, you will get everything that you need to learn, prepare and succeed in the VMware vSphere Foundation 9.0 Administrator certification exam. You must add VMware 2V0-16.25 Exam Questions in your preparation and should not ignore them.

## VMware vSphere Foundation 9.0 Administrator Sample Questions (Q57-Q62):

### NEW QUESTION # 57

What is the primary purpose of using VMware vSphere Foundation (VVF) Lifecycle Manager for ESX hosts?

- A. To monitor the performance of ESX hosts
- B. To create and manage virtual machines
- C. To configure network settings for ESX hosts
- **D. To update and maintain the ESX host lifecycle**

**Answer: D**

Explanation:

The primary purpose of vSphere Lifecycle Manager (vLCM) is to:

- \* Update, patch, and upgrade ESXi hosts, firmware, and drivers.
- \* Manage host consistency across clusters with image-based lifecycle management.

Other options are unrelated:

- \* A. Configure network settings# Done through vCenter or host client, not vLCM.
- \* B. Monitor performance# Done in vCenter/VCF Operations, not vLCM.
- \* C. Create/manage VMs# Managed through vCenter, not vLCM.

VMware vSphere Lifecycle Manager Guide - Purpose and Functionality

VMware Docs: Managing ESXi Host Lifecycle

### NEW QUESTION # 58

An administrator is tasked to configure shared storage for a VMware vSphere Foundation (VVF) cluster at a remote location.

The following is available at the remote location:

- \* Two ESX servers.
- \* Two 1GbE network cards per ESX.
- \* One sixteen port 1GbE Switch.
- \* One NVMe per ESX for the Operating System.
- \* One storage system supporting network and fiber channel capabilities.

What storage protocol must the administrator use at the remote location?

- **A. NFS**
- B. Fiber Channel
- C. Local Storage
- D. vSAN

**Answer: A**

Explanation:

The scenario:

- \* Remote site with 2 ESXi servers, 1GbE networking only.
- \* Storage system supports both network (NAS/iSCSI/NFS) and Fiber Channel.
- \* Fiber Channel is not feasible (no FC switches/HBAs).
- \* vSAN requires more than 2 nodes (minimum 3 for standard vSAN, 2+Witness for 2-node), not mentioned here.

The most suitable solution:

- \* Use NFS storage over 1GbE. (D)
- \* Provides shared storage accessible to both ESXi hosts.

Other options:

- \* A. vSAN# Needs 3+ nodes or a witness, not supported in this config.
- \* B. Local storage# Not shared, fails HA/DRS requirements.
- \* C. Fiber Channel# Requires HBAs and FC switch, not available.

VMware Docs: Using NFS with ESXi Hosts

### NEW QUESTION # 59

An administrator is tasked with creating a custom VMware Cloud Foundation (VCF) Operations Web Certificate.

What are three requirements to which the certificate must conform to be used with VCF Operations? (Choose three.)

- **A. In the certificate file, all certificates and the private key must be in PEM format.**
- **B. In the certificate file, the server certificate must be first in the order of certificates.**
- C. In the certificate file, all certificates and the private key must be in PFX format.
- **D. The certificate file must include the server certificate, a private key, and all issuing certificates.**
- E. The VCF Operations certificate cannot use the Subject Alternative Name (SAN) extension.
- F. In the certificate file, the server certificate must be last in the order of certificates.

**Answer: A,B,D**

Explanation:

VCF Operations requires that custom SSL certificates meet these requirements:

- \* Certificates and private key must be in PEM format. (A)
- \* The server certificate must be listed first in the file. (D)
- \* The file must include the server certificate, private key, and full certificate chain (issuing/intermediate/root CA). (E)

Why others are wrong:

- \* B. Server certificate last# Incorrect, it must be first.
- \* C. Cannot use SAN extension# Incorrect, SAN is supported and recommended.
- \* F. PFX format# Not supported for VCF Operations.

VMware Cloud Foundation 9.0.2 -SSL Certificate Requirements for VCF Operations VMware Docs: Replacing vRealize Operations Certificates

### NEW QUESTION # 60

Which component must be added after an initial deployment of VMware vSphere Foundation (VVF) to provide a central location for logs collection?

- A. Fleet Manager
- B. VCF Operations
- **C. VCF Operations for Logs**
- D. VCF Operations for Networks

**Answer: C**

Explanation:

After deploying vSphere Foundation, to centralize log collection and analysis, you must add:

- \* VCF Operations for Logs, which provides log ingestion, alerting, and centralized troubleshooting.

Other options:

- \* B. VCF Operations# Focuses on performance/capacity, not log collection.
- \* C. VCF Operations for Networks# Focuses on networking insights.
- \* D. Fleet Manager# Used for multi-instance management, not logging.

### NEW QUESTION # 61

An administrator needs to ensure that only specific users can manage the virtual machines (VM) in a specific VMware vCenter folder.

Which three steps are required to accomplish this? (Choose three.)

- **A. Create a new role in vCenter with VM management permissions.**
- **B. Assign the new role to the appropriate users/groups.**
- **C. Apply the role to the specific vCenter folder.**
- D. Add the identity source to vCenter.
- E. Create a datastore cluster.

**Answer: A,B,C**

Explanation:

To ensure that only specific users can manage VMs in a specific VMware vCenter folder, the following three steps are required:

- \* Create a new role in vCenter with VM management permissions (Answer B): You must define a custom role tailored to managing VMs, which includes permissions such as powering on/off VMs, editing VM settings, and accessing consoles. This role must include the appropriate privileges under the "Virtual machine" category in vCenter permissions.
- \* Apply the role to the specific vCenter folder (Answer C): The custom role needs to be applied directly to the target vCenter folder. This enables scope-based access control, where permissions are applied only to VMs within that folder.

\* Assign the new role to the appropriate users/groups(Answer A):After creating the role and applying it to the folder, the role must be associated with the correct users or groups. This step uses the vCenter Server's identity source integration to assign roles.

Why the other options are incorrect:

\* D. Add the identity source to vCenter:This is a prerequisite step for any role assignment but is not directly required in this specific scenario if the identity source is already configured.

\* E. Create a datastore cluster:This is unrelated to managing VM access. Datastore clusters pertain to storage management and are not involved in user permissions or role assignments.
