Our company made these C1000-173 practice materials with accountability. We understand you can have more chances being accepted by other places and getting higher salary or acceptance. Our IBM Cloud Pak for Data v4.7 Architect training materials are made by our responsible company which means you can gain many other benefits as well. We offer C1000-173 free demos for your reference, and send you the new updates if our experts make them freely. If you fail the exam after using our C1000-173 exam prep unfortunately, we will switch other versions for you or return full refund.

IBM C1000-173 Exam Syllabus Topics:

Topic	Details
Topic 1	• Plan for a Cloud Pak for Data Implementation: This section of the exam measures the skills of an Implementation Consultant and covers determining which Cloud Pak for Data services to deploy based on organizational needs. It involves sizing the Kubernetes • OpenShift cluster appropriately for workload demands and planning backup and restore strategies to ensure data protection. Planning for high availability and disaster recovery is essential to maintain uninterrupted service. Multi-tenancy requirements must be understood to support multiple user groups securely on shared infrastructure. Migration requirements need assessment to transition existing data and workloads smoothly.
Topic 2	• Architect with Analytic Services: This domain targets a Data Analytics Architect and focuses on designing solutions using analytic components of Cloud Pak for Data. Architecting with DataStage involves creating data integration and ETL pipelines. Data Refinery architectures prepare and cleanse data for analysis. Db2 Big SQL solutions address querying large distributed data sets with SQL, facilitating analytics across diverse data sources.
Topic 3	• Architect with Data Source Services: This domain measures expertise of a Data Integration Architect and includes architecting solutions with data replication technologies to synchronize data across systems. IBM Data Virtualization architecture enables access to and querying of disparate data sources without data movement. Architecting with watsonx.data focuses on building intelligent data lakes and query engines. Architecting with Db2-related services involves designing scalable data management and processing architectures using IBM's Db2 platforms.

Topic 4	• Architect with Data Governance Services: This section evaluates skills of a Data Governance Specialist, covering the architecture of knowledge catalogs to enable data discovery and management. Data Privacy architectures ensure compliance with regulatory requirements around data protection. Knowledge Accelerators involve designing solutions that speed up data governance processes through predefined policies and templates.

C1000-173 Test Dumps - Pass Guaranteed Quiz 2026 First-grade IBM C1000-173 Real Exam

Our C1000-173 test prep embrace latest information, up-to-date knowledge and fresh ideas, encouraging the practice of thinking out of box rather than treading the same old path following a beaten track. As the industry has been developing more rapidly, our C1000-173 exam dumps have to be updated at irregular intervals in case of keeping pace with changes. To give you a better using environment, our experts have specialized in the technology with the system upgraded to offer you the latest C1000-173 Exam practices. And you can enjoy free updates of our C1000-173 learning prep for one year.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q127-Q132):

NEW QUESTION # 127
In terms of managing security for data stores in Watson Assistant, what practices should be emphasized? (Select two)

- A. Using a public network for easier access
- B. Implementing role-based access control
- C. Encrypting all stored data, both at rest and in transit
- D. Regularly updating access credentials

Answer: C,D

NEW QUESTION # 128
What outcomes can be achieved from Match 360?

- A. Produces statistics and graphs to let users analyze and explore master data.
- B. Produces a AI based dashboard to let users analyze business data.
- C. Connect disparate data sources to provide a virtual view of your data.
- D. Uses a dialog format to talk with your data to get insights.

Answer: A

Explanation:
Match 360 is IBM's master data management (MDM) service integrated into Cloud Pak for Data. It produces master data views along with statistics, graphs, and insights that allow users to explore, analyze, and understand their master data entities (e.g., customers, products). While it does integrate data from disparate sources, its focus is on consolidating and providing master data analysis rather than virtual views (B) or conversational analytics (A).

NEW QUESTION # 129
When upgrading to Cloud Pak for Data v4.7, why must an export/import of governance data be performed?

- A. Catalog data must be relocated to persistent storage.
- B. Containers are ephemeral and cannot persist the data.
- C. The underlying Db2 repository has been altered.
- D. Components of Information Server have been removed from the product.

Answer: C

Explanation:
During the upgrade to Cloud Pak for Data version 4.7, significant changes were made to the underlying metadata repository, which is powered by Db2. These changes affect how governance data is stored and accessed, and an export/import is necessary to ensure compatibility and data integrity. The export step extracts governance metadata using the supported utility, and after the upgrade, it is re-imported into the upgraded structure. This is not due to container ephemerality or storage changes, but because of schema and format changes in Db2.

NEW QUESTION # 130
When granting a user access to the Data Engineer role, which two permissions will the user be associated with as part of this role?

- A. Manage workflows
- B. Create projects
- C. Monitor project workload
- D. Manage data protection rules
- E. Manage platform

Answer: B,D

Explanation:
The Data Engineer role in IBM Cloud Pak for Data includes permissions necessary for managing the data pipeline lifecycle. This includes the ability to create projects, manage data assets, and configure data protection rules, which are critical for ensuring data privacy and governance. The role does not include platform-level administrative privileges like managing the platform or monitoring all workloads. Workflow management is typically assigned to users with broader project or orchestrator roles.

NEW QUESTION # 131
When planning an environment for multiple Cloud Pak deployments, what is crucial?

- A. Ignoring the specific needs and scale of each deployment
- B. Ensuring all deployments share the same resources
- C. Combining all user data into a single deployment for ease of access
- D. Tailoring resource allocation and access controls per deployment

Answer: D

NEW QUESTION # 132
......

Before the clients purchase our C1000-173 study materials, they can have a free trial freely. The clients can log in our company's website and visit the pages of our products. The pages of our products lists many important information about our C1000-173 study materials and they include the price, version and updated time of our products, the exam name and code, the total amount of the questions and answers, the merits of our C1000-173 Study Materials and the discounts. You can have a comprehensive understanding of our C1000-173 study materials after you see this information. Then you can look at the free demos and try to answer them to see the value of our C1000-173 study materials and finally decide to buy them or not.
