## Excellect Google Associate-Google-Workspace-Administrator Pass Rate & Associate-Google-Workspace-Administrator Pdf Exam Dump

Every year, countless Google aspirants face challenges to prove their skills and knowledge by attempting the Google Associate-Google-Workspace-Administrator certification exam. Once they pass this examination, lucrative job opportunities in the tech industry await them. But fear not! Test4Cram has got you covered with their collection of real and updated Associate-Google-Workspace-Administrator Exam Questions. These affordable Associate-Google-Workspace-Administrator questions are available in three user-friendly formats, ensuring a smooth and efficient preparation experience for the Associate-Google-Workspace-Administrator exam.

## Google Associate Google Workspace Administrator Sample Questions (Q48-Q53):

### NEW QUESTION # 48

An employee is leaving your company and has numerous files stored in My Drive. Their manager wants to retain access to these files. You need to offboard the departing employee's Google Workspace account while ensuring that the manager can still access the files while following Google-recommended practices. What should you do?

- A. Instruct the departing employee to share their My Drive folder with the manager before leaving. Delete the Google Workspace account on the departing employee's last day.
- **B. Transfer ownership of the departing employee's files to the manager during the user deletion process.**
- C. Download the departing employee's Drive data by using Google Takeout. Upload the data to the manager's Drive before deleting the departing employee's Google Workspace account.
- D. Use Google Vault to establish a retention policy for the organizational unit (OU) of the departing employee. Assign the Google Archived User license.

**Answer: B**

Explanation:

Transferring ownership of the departing employee's files to the manager ensures that the manager retains access to all the files, including those stored in My Drive, without requiring additional steps like downloading or sharing files. This method follows Google-recommended practices and ensures that the files remain under proper management even after the employee's account is deleted. This process can be done efficiently during the offboarding process to ensure continuity of access.

**NEW QUESTION # 49**

An end user has thousands of files stored in Google Drive. Their files are well organized with Drive labels. You need to advise the end user on how to quickly identify all files that are contracts. What should you do?

- A. Advise the user to search in Drive for files with the keyword "contracts", and use the "modified by me" filter.
- **B. Advise the user to search for files that are labeled as "contracts".**
- C. Advise the user to use the Google Drive API to search for files with the keyword "contracts"
- D. Advise the user to use the Investigation tool to search for files with the keyword "contracts" and updated by you.

**Answer: B**

Explanation:

Since the files are already organized with labels in Google Drive, the most efficient way for the user to quickly identify all files that are contracts is to search for files with the "contracts" label. This will filter and display only the files labeled as contracts, making it the quickest and most straightforward method for locating the required files.

**NEW QUESTION # 50**

Your organization wants to ensure that all employees who use Chrome browsers for work adhere to specific security and configuration settings. You need to manage and control the Chrome browsers used within the company while using the least expensive solution. What should you do?

- A. Use a third-party software deployment solution to manage the Chrome browser.
- B. Remotely wipe all employee devices to ensure that they are using the latest Chrome browser version.
- **C. Enroll the Chrome browsers in your organization's domain and apply Chrome browser policies.**
- D. Disable all extensions on employee Chrome browsers to prevent any potential security risks.

**Answer: C**

Explanation:

Google Workspace (specifically Chrome Enterprise Core, which is often included or available for free with Google Workspace editions) provides built-in capabilities to manage Chrome browsers across an organization. By enrolling Chrome browsers in your domain, you can apply policies centrally from the Google Admin console, controlling security settings, extensions, updates, and more. This is a first-party, cloud-based solution that doesn't require additional software or licensing costs beyond your existing Google Workspace subscription, making it the "least expensive solution." Here's why the other options are less suitable for managing Chrome browsers with the least expense:

A . Use a third-party software deployment solution to manage the Chrome browser. While possible, this would incur additional costs for the third-party software, its licensing, and potentially its maintenance. Google Workspace offers native browser management, so a third-party solution is not the "least expensive."

B . Remotely wipe all employee devices to ensure that they are using the latest Chrome browser version. Remotely wiping devices is a drastic and disruptive measure, typically used for lost/stolen devices or offboarding. It's not a standard or appropriate method for managing browser versions or applying configuration settings. It would also be highly expensive in terms of lost productivity and IT effort.

D . Disable all extensions on employee Chrome browsers to prevent any potential security risks. While disabling extensions can mitigate some risks, it's an overly broad and potentially disruptive action that could hinder employee productivity if legitimate and

necessary extensions are disabled. More importantly, it's just one potential policy you might apply, not the method for managing the browsers centrally and cost-effectively. Chrome browser policies allow for granular control, including allowing/blocking specific extensions.

Reference from Google Workspace Administrator:

Set Chrome policies for users or browsers: This is the key administrative function that allows you to manage Chrome browsers. It describes how to apply policies to Chrome browsers enrolled in your organization's domain.

Reference:

Chrome Enterprise Core: This outlines the free cloud-based management features available for Chrome browsers, which are often integrated with Google Workspace. It explicitly states that "cloud-based management and reporting for \$0" are available with Chrome Enterprise Core.

Maximizing Google Chrome Management in Google Workspace: This article further emphasizes that "the basic policies for Google Chrome management are available for free with Google Workspace." By leveraging the built-in Chrome browser management capabilities within the Google Workspace Admin console, organizations can centrally control Chrome settings and security with no additional software cost, fitting the "least expensive solution" requirement.

## NEW QUESTION # 51

Your company recently installed a free email marketing platform from the Google Workspace Marketplace. The marketing team is unable to access customer contact information or send emails through the platform. You need to identify the cause of the problem. What should you do first?

- A. Use the security investigation tool to review Gmail logs.
- B. **Check the OAuth scopes that are granted to the email marketing platform and ensure the platform has access to Contacts and Gmail.**
- C. Confirm that the "Manage Third-Party App Access" setting in the Admin console is enabled.
- D. Verify that the email marketing platform's subscription is active and up-to-date.

**Answer: B**

Explanation:

When a third-party application from the Google Workspace Marketplace is installed, it requests specific permissions (OAuth scopes) to access Google Workspace data and services. If the marketing team is unable to access customer contact information or send emails, the most likely cause is that the installed email marketing platform was not granted the necessary OAuth scopes for Contacts and Gmail during the installation or approval process.

Here's why other options are less likely to be the first step:

A . Verify that the email marketing platform's subscription is active and up-to-date. While important for continued use, a "free" platform from the Marketplace generally doesn't have a subscription that would prevent initial access to basic functions like contacts and sending emails unless it's a trial that expired, which isn't indicated as the primary problem. This would be a later troubleshooting step if scope issues are ruled out.

C . Confirm that the "Manage Third-Party App Access" setting in the Admin console is enabled. This setting controls whether users can install any third-party apps from the Marketplace. If it were disabled, the app likely wouldn't have been installed in the first place. If it was enabled and then disabled, the app would stop working, but the specific problem points to data access, not app disablement.

D . Use the security investigation tool to review Gmail logs. The security investigation tool is excellent for reviewing security events, but it's more for post-incident analysis or suspicious activity. In this scenario, the problem is a lack of functionality for a newly installed app, not a security breach or misconfiguration that would necessarily show up in Gmail logs immediately as an access issue for the app itself. The OAuth scopes are the more direct and initial point of failure.

Reference from Google Workspace Administrator:

Manage third-party app access to data: Google Workspace administrators can control which third-party apps can access their organization's data. This includes reviewing and managing OAuth API access for configured apps.

Reference:

Understanding OAuth scopes: When an application requests access to Google data, it does so by requesting specific "scopes." These scopes define the particular resources and operations that the application is allowed to perform. For an email marketing platform, scopes for <https://www.googleapis.com/auth/contacts> (or a more specific contact scope) and <https://www.googleapis.com/auth/gmail.send> (or a broader Gmail scope) would be crucial.

Controlling which third-party & internal apps can access Google Workspace data: This section in the Admin console specifically allows administrators to review "Configured apps" and check their "OAuth API access." This is where you would see the scopes granted to the email marketing platform.

## NEW QUESTION # 52

You need to ensure that data owned by former employees remains available in Google Vault. You want to use the most cost-effective solution.

What should you do?

- A. Migrate the former employees' Gmail to their manager(s) by using the data migration service during the deletion process.  
Transfer the former employees' Google Drive files to a new owner.
- B. Assign an Archived User license to the former employees' Google accounts.
- C. Change the Google account passwords of the former employees.
- D. **Suspend the former employees' Google accounts. Create an organizational unit (OU). Move the former employees into that OU.**

**Answer: D**

Explanation:

Suspending the accounts of former employees while moving them to a dedicated organizational unit (OU) ensures that their data remains in Google Vault and accessible without the need for additional licenses. This is a cost-effective solution because suspending the account keeps the data intact but prevents the employees from accessing their accounts.

## NEW QUESTION # 53

.....

All these three Google Associate-Google-Workspace-Administrator exam dumps formats contain the real and Associate Google Workspace Administrator (Associate-Google-Workspace-Administrator) certification exam trainers. So rest assured that you will get top-notch and easy-to-use Associate Google Workspace Administrator (Associate-Google-Workspace-Administrator) practice questions. The Associate-Google-Workspace-Administrator PDF dumps file is the PDF version of real Google Associate-Google-Workspace-Administrator exam questions that work with all devices and operating systems.

**Excellect Associate-Google-Workspace-Administrator Pass Rate:** [https://www.test4cram.com/Associate-Google-Workspace-Administrator\\_real-exam-dumps.html](https://www.test4cram.com/Associate-Google-Workspace-Administrator_real-exam-dumps.html)

Fortunately, App version of our Google Cloud Certified Associate-Google-Workspace-Administrator actual vce pdf happens to offer you the simulation test so as to make you more familiar with the mode of test, Our system will automatically send the updates of the Associate-Google-Workspace-Administrator learning file to the clients as soon as the updates are available, Instant access to Associate-Google-Workspace-Administrator practice PDF downloads, Google Latest Associate-Google-Workspace-Administrator Test Simulator It is one of the best ways to prepare for the real exam so you don't have to face any trouble later on.

Consumers will have to pay their prices, The Associate-Google-Workspace-Administrator WS- Family of Security Specifications, Fortunately, App version of our Google Cloud Certified Associate-Google-Workspace-Administrator actual vce pdf happens to offer you the simulation test so as to make you more familiar with the mode of test.
