100% Pass Quiz Unparalleled Salesforce - Valid Mule-101 Test Discount

On one hand, we adopt a reasonable price for you, ensures people whoever is rich or poor would have the equal access to buy our useful Mule-101 real study dumps. On the other hand, we provide you the responsible 24/7 service. Our candidates might meet so problems during purchasing and using our Mule-101 prep guide, you can contact with us through the email, and we will give you respond and solution as quick as possible. With the commitment of helping candidates to Pass Mule-101 Exam, we have won wide approvals by our clients. We always take our candidates' benefits as the priority, so you can trust us without any hesitation.

Salesforce Certified MuleSoft Integration Foundations Sample Questions (Q32-Q37):

NEW QUESTION # 32

Which role is primarily responsible for building API implementations as part of a typical MuleSoft integration project?

- A. Operations
- **B. API Developer**
- C. API Designer
- D. Integration Architect

Answer: B

Explanation:

API Developer: This role is responsible for the actual coding and implementation of the API. They use Anypoint Studio to build the Mule flows, configure connectors, write DataWeave transformations, and ensure the API functions according to the design specification¹.

Why others are incorrect:

API Designer: Responsible for writing the RAML/OAS contract (specification) in Design Center, usually before implementation begins².

Integration Architect: Responsible for high-level design, pattern selection, and governance, not the day-to-day coding of flows³.

Operations: Responsible for deployment, monitoring, and maintenance after the application is built⁴.

NEW QUESTION # 33

CloudHub is an example of which cloud computing service model?

- A. Platform as a Service (PaaS)
- B. Monitoring as a Service (MaaS)
- C. Software as a Service (SaaS)
- D. Infrastructure as a Service (IaaS)

Answer: A

Explanation:

PaaS (Platform as a Service): CloudHub is MuleSoft's managed integration platform. In the NIST cloud model, it falls under iPaaS, which is a specialized form of PaaS.

The Model:

MuleSoft manages: The underlying infrastructure (AWS EC2 instances), operating systems, updates, security patching, and the Java/Mule Runtime environment.

Customer manages: The application code (Mule apps) and data.

Why it is not IaaS: In IaaS (like raw AWS EC2), the customer would be responsible for installing the OS, Java, and patching the server. In CloudHub, this is abstracted away.

NEW QUESTION # 34

According to MuleSoft, which deployment characteristic applies to a microservices application architecture?

- A. All services of an application can be deployed together as single Java WAR file
- B. A deployment to enhance one capability requires a redeployment of all capabilities
- C. Services exist as independent deployment artifacts and can be scaled independently of other services
- D. Core business capabilities are encapsulated in a single, deployable application

Answer: C

Explanation:

Microservices Architecture: This approach structures an application as a collection of loosely coupled services¹⁰.

Independent Scalability: A defining characteristic is that each microservice is a separate deployment unit. If one service (e.g., "Order Processing") receives high load, you can scale only that service without having to scale the entire application¹¹.

Independent Deployment: You can update and redeploy a single microservice without impacting or redeploying the others.

Why others are incorrect:

Single Java WAR / Single deployable application (A, B): These describe a Monolithic architecture¹².

Redeployment of all (D): This is a major downside of Monoliths, not Microservices¹³.

NEW QUESTION # 35

What are two reasons why a typical Mulesoft customer favors a Mulesoft-hosted Anypoint platform runtime plane over a customer-hosted runtime for its Mule application deployments?

- A. Increased application throughput
- B. Reduced IT operations effort
- C. Increased application isolation
- D. Reduced time-to-market for the first application

- E. Reduced application latency

Answer: B,D

Explanation:

MuleSoft-Hosted Runtime (CloudHub): This is an Integration Platform as a Service (iPaaS) model where MuleSoft manages the infrastructure.

Reduced IT Operations Effort (Option A): Because MuleSoft manages the physical servers, operating system updates, and patching, the customer's IT team does not need to maintain the hardware or VM infrastructure.

Reduced Time-to-Market (Option D): With a pre-configured environment ready for deployment, teams can deploy applications immediately without waiting for the provisioning of on-premises servers, load balancers, or network configurations.

NEW QUESTION # 36

According to MuleSoft, what action should an IT organization take regarding its technology assets in order to close the IT delivery gap?

- A. Focus project delivery efforts on custom assets that meet the specific requirements of each individual line of business
- B. Create weekly meetings that all members of IT attend to present justification and request approval to use existing assets
- **C. Make assets easily discoverable via a central repository**
- D. Hire additional staff to meet the demand for asset creation required for approved projects and timelines

Answer: C

Explanation:

The Key to Speed: You cannot close the delivery gap by working harder (hiring more staff) or by creating custom code for every project (custom assets). You must leverage Reuse.

Discoverability is Critical: Reuse is impossible if developers don't know that an asset exists.

Anypoint Exchange: By publishing assets (APIs, connectors, fragments) to a central repository (Exchange) and making them searchable and documented, organizations enable "Self-Service." Developers can find what they need instantly, drastically reducing the time to deliver new projects.

NEW QUESTION # 37

.....

We have an authoritative production team, after you purchase Mule-101 study materials, our professions can consolidate important knowledge points for you, and we guarantee that your Mule-101 practice quiz is tailor-made. The last but not least, we can provide you with a free trial service, so that customers can fully understand our format before purchasing our Mule-101 training guide, which can be an unparalleled trial experience compared to other counterparts.
