It also discusses those tools which ensure outstanding presales engagements. Moreover, the topic focuses on the demo platforms and their application in SMB scenarios. Lastly, it measures skills to use odCloud, Topology Builder.

Cisco Small and Medium Business Engineer Sample Questions (Q66-Q71):

NEW QUESTION # 66

Which Cisco product is essential for SMBs to manage hybrid workforces effectively?

- A. Cisco DNA Center
- **B. Cisco Meraki**
- C. Cisco Umbrella
- D. Cisco Webex

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation: Cisco Meraki is a cloud-managed IT solution that is particularly essential for small and medium businesses (SMBs) to manage hybrid workforces effectively.

Hybrid workforces require flexible, secure, and scalable networking solutions that can support employees working from various locations-home, office, or on the go. Meraki's portfolio, including wireless access points, switches, and security appliances, is managed through a centralized cloud dashboard, allowing SMBs to monitor and manage their networks remotely with ease. This is critical for ensuring connectivity, security, and operational efficiency in a hybrid work environment, where traditional on-premises management might be impractical due to limited IT resources.

Cisco DNA Center, while powerful for network automation and analytics, is more suited for larger enterprises with complex campus networks, not typically the primary need for SMBs managing hybrid workforces. Cisco Umbrella provides cloud-delivered security (DNS-layer protection), which is valuable but not comprehensive enough alone to manage a hybrid workforce's networking needs. Cisco Webex is a collaboration tool focused on communication (video conferencing, messaging), not a complete solution for managing the underlying network infrastructure of a hybrid workforce. Meraki's cloud-managed approach directly addresses the agility and simplicity SMBs need for hybrid work.

References: Cisco's Small and Medium Business Technology Solutions documentation (cisco.com) highlights Meraki's role in providing secure, cloud-managed networking for hybrid workforces, as seen in case studies like Mike's Bikes, which improved employee and customer experiences using Meraki across multiple locations.

NEW QUESTION # 67

How is Cisco leveling the playing field between virtual and in-person workers?

- A. cloud security
D smart cameras
- **B. inclusive collaboration suite**
- C. device cloud management

Answer: B

Explanation:

Cisco is leveling the playing field between virtual and in-person workers by providing an inclusive collaboration suite. This suite includes technologies and tools that support work from anywhere, which is essential for a hybrid workforce. The suite enables employees to participate fully, regardless of their location, language preference, personality type, or familiarity with technology. By focusing on inclusivity and connectedness, Cisco ensures that all employees, whether remote or in-person, have equal opportunities to engage and contribute to their teams¹. NEW QUESTION # 68

Which Cisco product is a solution offered for SMB experiences?

- A. Stealthwatch
- B. Catalyst IR Router
- **C. Meraki**
- D. DNA Center

Answer: C

Explanation:

Cisco Meraki is a comprehensive solution designed for SMBs that offers simple, secure, and scalable networking. It is a cloud-managed IT solution that provides wireless, switching, security, and devices that can be centrally managed from the web. This allows SMBs to streamline their operations and manage their network with ease, without needing extensive IT expertise². NEW QUESTION # 69

What is Cisco Networking Cloud?

- **A. integrated platform for on-premises and cloud operating models**
- B. web-based platform for network engineers to store, track, and collaborate on network projects
- C. cloud storage for network configurations
- D. cloud storage for holding authentication keys

Answer: A

Explanation:

Cisco Networking Cloud is an integrated platform designed to provide connectivity to and between applications and workloads across various environments, including clouds, cloud services, on-premises data centers, and edge networks. It is crucial for the performance, security, and efficient management of hybrid cloud and multicloud environments. This platform facilitates the simplification of lifecycle management, assures user-experience, reduces time to market for service rollout, lowers operational costs,

References: = You can find more details about Cisco Networking Cloud and its benefits on Cisco's official page on cloud networking¹.

Partners must understand one another's purpose and goal. What does Cisco consider its purpose?

- Answer: C**

Cisco's purpose is centered around creating a more inclusive future for all. This is reflected in their commitment to leveraging technology to address societal challenges, close the digital divide, and promote equality and social justice. Cisco actively works towards a sustainable and regenerative planet, emphasizing the importance of diversity, equity, and inclusion within and beyond the company. Their purpose goes beyond profit maximization or market dominance; it is about using their resources and influence to make a positive impact on society and the environment.
