Unser Zertpruefung setzt sich aus großen Eliteteams zusammen. Wir werden Ihnen die Fortinet NSE6_SDW_AD-7.6 Zertifizierungsprüfung schnell und genau bieten und zugleich rechtzeitig die Fragen und Antworten zur Fortinet NSE6_SDW_AD-7.6 Zertifizierungsprüfung erneuern und bearbeiten. Außerdem verschafft unser Zertpruefung in den Zertifizierungsbranchen große Reputation. Obwohl die Chance für das Bestehen der Fortinet NSE6_SDW_AD-7.6 Zertifizierungsprüfung sehr gering ist, versprechen der glaubwürdige Zertpruefung Ihnen, dass Sie diese Prüfung trotz geringer Chance bestehen können.

Fortinet NSE6_SDW_AD-7.6 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none">SD-WAN troubleshooting: This domain explains how to diagnose and resolve issues related to SD-WAN operation. It includes troubleshooting SD-WAN rules, session behavior, routing problems, and ADVPN connectivity to maintain reliable network performance.

Thema 2	<ul style="list-style-type: none"> Advanced IPsec: This section covers the deployment of advanced IPsec configurations within SD-WAN environments. It includes implementing hub-and-spoke IPsec topologies, configuring ADVPN, and supporting multihub, multiregion, and large-scale secure SD-WAN deployments.
Thema 3	<ul style="list-style-type: none"> Rules and routing: This section explains how to design and apply SD-WAN rules to control traffic steering across multiple WAN links. It also includes configuring SD-WAN routing to ensure proper path selection and connectivity between networks.
Thema 4	<ul style="list-style-type: none"> SD-WAN setup: This domain covers how to deploy an enterprise SD-WAN environment by designing SD-WAN members and zones and configuring them for efficient traffic management. It also focuses on implementing Performance SLAs to monitor link quality and ensure applications use the best available path.
Thema 5	<ul style="list-style-type: none"> Centralized management: This domain focuses on deploying and managing SD-WAN using FortiManager for centralized control. It includes implementing branch configuration deployment and using SD-WAN Manager with overlay orchestration to simplify large-scale network management.

NSE6_SDW_AD-7.6 Probesfragen & NSE6_SDW_AD-7.6 Zertifizierungsantworten

Haben Sie an der Fortinet NSE6_SDW_AD-7.6 Zertifizierungsprüfung teilgenommen? Was kann ich machen, wenn ich die Prüfung ablege, daran ich nicht selbstbewusst bin? Gibt es Abkürzung für die NSE6_SDW_AD-7.6 Prüfung? Es gibt nicht genug Zeit, die Bücher auswendig zu lernen. Sind Sie der ähnlichen Meinungen? Wenn ja, kümmern Sie sich nicht darum, weil Sie immer noch die Chance haben diese NSE6_SDW_AD-7.6 Prüfung gut vorzubereiten, obwohl die Prüfungszeit vor Ihnen schnell auftaucht? Wie kann ich diese Chance finden? Das ist die Fortinet NSE6_SDW_AD-7.6 Dumps von Zertpruefung. Es gibt hocheffektive Prüfungsunterlagen zur Zertifizierung. Es kann Ihnen helfen, in kurzer Zeit die Prüfungsfragen vorzubereiten. Die Hitz-Rate dieser dumps sind sehr hoch. Deshalb können Sie Fortinet NSE6_SDW_AD-7.6 Zertifizierungsprüfung bestehen, wenn Sie die Prüfungsfragen und -antworten gut lernen.

Fortinet NSE 6 - SD-WAN 7.6 Enterprise Administrator NSE6_SDW_AD-7.6 Prüfungsfragen mit Lösungen (Q61-Q66):

61. Frage

(Refer to the exhibit.

Refer to the exhibit.

An SD-WAN zone configuration on the FortiGate GUI is shown.

Interface	Gateway	Cost	Download	Upload	Status
virtual-wan-link					
WAN1					
WAN2					
WAN3					
port4	0.0.0.0	0	3.4 kbps	4.91 kbps	Enable
HUB1					
Test					
B-125	0.0.0.0	0	0 bps	0 bps	Enable

An SD-WAN zone configuration on the FortiGate GUI is shown.

What can you conclude about the zone and member configuration on this device? Choose one answer.)

- A. The WAN2 zone contains no member.
- B. You can delete the virtual-wan-link zone.
- C. You can delete the WAN1 zone.
- D. You can add the member B-125 to the WAN3 zone and keep it as a member of the Test zone.

Antwort: A

Begründung:

From the SD-WAN Zones view in the FortiGate GUI:

* virtual-wan-link is the default SD-WAN zone. This zone is system-defined and cannot be deleted, which makes option A incorrect.

* The WAN2 zone is displayed without any expandable members beneath it, indicating that no SD-WAN members are currently assigned to the WAN2 zone. This directly supports option B.

* A zone can be deleted only if it has no members and is not system-defined, but the exhibit does not indicate that WAN1 is eligible for deletion. Therefore, option C cannot be concluded from the information shown.

* In FortiOS SD-WAN, an SD-WAN member can belong to only one SD-WAN zone at a time. A member such as B-125 cannot be assigned to both the WAN3 zone and the Test zone simultaneously, which makes option D incorrect.

62. Frage

Refer to the exhibits.

SD-WAN zone HUB1 and SD-WAN member configuration

SD-WAN Zones ▾

+ Create New
Edit
Delete
Q Where Used
Search...

<input type="checkbox"/>	ID ▾	Interface ▾	Gateway ▾	Cost ▾	Priority ▾	Status ▾	Installation Target ▾
<input type="checkbox"/>	HUB1						
<input type="checkbox"/>	4	HUB1-VPN1	0.0.0.0	0	1	Enable	
<input type="checkbox"/>	5	HUB1-VPN2	0.0.0.0	0	1	Enable	3 Devices in Total View Details > branch1_fgt[root] branch2_fgt[root] branch3_fgt[root]
<input type="checkbox"/>	6	HUB1-VPN3	0.0.0.0	0	1	Enable	2 Devices in Total View Details > branch2_fgt[root] branch3_fgt[root]

SD-WAN zone HUB2 and SD-WAN member configuration

<input type="checkbox"/>	HUB2						
<input type="checkbox"/>	7	HUB2-VPN1	0.0.0.0	10	1	Enable	3 Devices in Total View Details > branch1_fgt[root] branch2_fgt[root] branch3_fgt[root]
<input type="checkbox"/>	8	HUB2-VPN2	0.0.0.0	10	1	Enable	
<input type="checkbox"/>	9	HUB2-VPN3	0.0.0.0	10	1	Enable	

Output of command diagnose sys sdwan member

```
_fgt # diagnose sys sdwan member
Member (4) : transport-group: 0, interface: HUB1-VPN1, flags=0xd
Member (5) : transport-group: 0, interface: HUB1-VPN2, flags=0xd
Member (7) : transport-group: 0, interface: HUB2-VPN1, flags=0xd
Member (8) : transport-group: 0, interface: HUB2-VPN2, flags=0xd
Member (9) : transport-group: 0, interface: HUB2-VPN3, flags=0xd
```

The first exhibit shows the SD-WAN zone HUB1 and SD-WAN member configuration from an SD-WAN template, and the second exhibit shows the output of command diagnose sys sdwan member collected on a FortiGate device.

Which statement best describes what the diagnose output shows?

- A. The diagnose output shows that HUB1-VPN1 and all HUBx-VPNy members are dead.
- B. The diagnose output does not correspond to a device configured with the SD-WAN template shown in the exhibit.
- C. The diagnose output was collected on the device branch1_fgt
- D. The diagnose output was collected on the device branch2_fgt.

Antwort: C

Begründung:

The diagnose output lists SD-WAN members 4(HUB1-VPN1), 5(HUB1-VPN2), 7(HUB2-VPN1), 8(HUB2-VPN2), and 9(HUB2-VPN3). It does not include member 6 (HUB1-VPN3). From the template, HUB1-VPN3 is installed only on branch2_fgt and branch3_fgt - not on branch1_fgt. Therefore, the output must be from branch1_fgt.

63. Frage

(Refer to the exhibit.)

You configure SD-WAN on a standalone FortiGate device.

You want to create an SD-WAN rule that steers traffic related to Facebook and LinkedIn through the less costly internet link.

What must you do to set Facebook and LinkedIn applications as destinations from the GUI? Choose one answer.)

- A. You cannot configure applications as destinations of an SD-WAN rule on a standalone FortiGate device.
- B. Enable the visibility of the applications field as destinations of the SD-WAN rule.
- C. In the Internet service field, select Facebook and LinkedIn.
- D. Install a license to allow applications as destinations of SD-WAN rules.

Antwort: C

Begründung:

In FortiOS 7.6, SD-WAN rules can steer traffic based on Internet Services, which represent predefined application and service signatures maintained by FortiGuard. Common applications such as Facebook and LinkedIn are included in the Internet Service database.

According to the FCSS SD-WAN 7.6 curriculum, when configuring an SD-WAN rule from the GUI on a standalone FortiGate device, applications are selected as destinations using the Internet service field, not by enabling a separate application destination

field. The exhibit highlights the Internet service option under the Destination section, which is the correct method to match traffic for specific applications.

Option A is incorrect because there is no GUI option to enable application visibility as destinations for SD-WAN rules. Application matching is already abstracted through Internet Services.

Option C is incorrect because standalone FortiGate devices fully support application-based steering using Internet Services in SD-WAN rules.

Option D is incorrect because no additional license is required to use Internet Services in SD-WAN rules.

This functionality is included in FortiOS and relies on the built-in FortiGuard Internet Service database.

Therefore, to steer Facebook and LinkedIn traffic through a specific WAN link, you must select Facebook and LinkedIn in the Internet service field, which corresponds to option B.

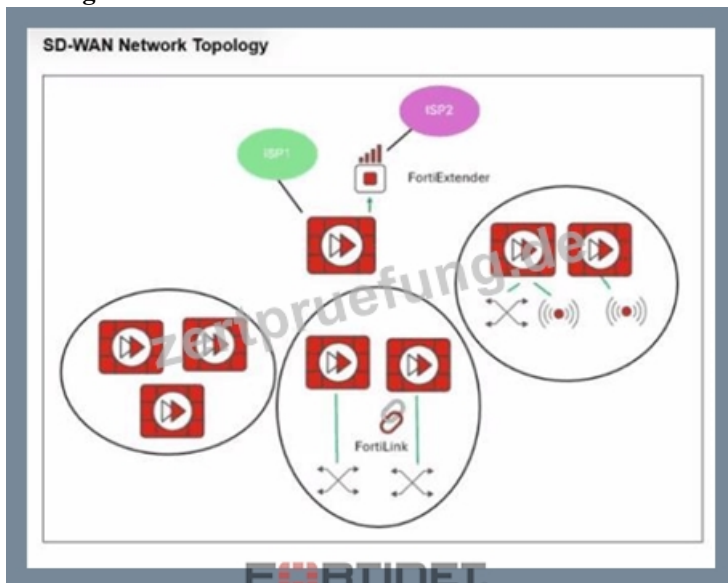

64. Frage

Within the context of SD-WAN, what does SIA correspond to?

- A. Software Internet Access
- B. Secure Internet Authorization
- C. Remote Breakout
- **D. Local Breakout**

Antwort: D

65. Frage

Refer to the exhibit.

You want to configure SD-WAN on a network as shown in the exhibit.

The network contains many FortiGate devices. Some are used as NGFW, and some are installed with extensions such as FortiSwitch, FortiAP, or Forti Extender.

What should you consider when planning your deployment?

- A. You must build multiple SD-WAN topologies. Each topology must contain only one type of extension.
- B. You can build an SD-WAN topology that includes all devices. The hubs must be devices without extensions.
- **C. You can build an SD-WAN topology that includes all devices. The hubs can be FortiGate devices with Forti Extender.**
- D. You must use FortiManager to manage your SD-WAN topology.

Antwort: C

66. Frage

.....

Die Fortinet NSE6_SDW_AD-7.6 Zertifizierungsprüfung ist heutzutage in der konkurrenzfähigen IT-Branche immer beliebter

geworden. Immer mehr Leute haben die Fortinet NSE6_SDW_AD-7.6 Prüfung abgelegt. Aber ihre Schwierigkeit nimmt doch nicht ab. Es ist schwer, die Fortinet NSE6_SDW_AD-7.6 Prüfung zu bestehen, weil sie sowieso eine autoritäre Prüfung ist, die Computerfachkenntnisse und die Fähigkeiten zur Informationstechnik prüft. Viele Leute haben viel Zeit und Energie auf die Fortinet NSE6_SDW_AD-7.6 Zertifizierungsprüfung aufgewendet.
