It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q83-Q88):

NEW QUESTION # 83

Which of the following describes the practice by which the enterprise architecture is managed and controlled at an enterprise-wide level?

- A. IT governance
- B. Corporate governance
- C. Architecture governance
- D. Technology governance

Answer: C

Explanation:

According to the TOGAF Standard, 10th Edition, architecture governance is "the practice by which enterprise architectures and other architectures are managed and controlled at an enterprise-wide level" 1. Architecture governance ensures that the architecture development and implementation are aligned with the strategic objectives, principles, standards, and requirements of the enterprise, and that they deliver the expected value and outcomes. Architecture governance also involves establishing and maintaining the architecture framework, repository, board, contracts, and compliance reviews 1. The other options are not correct, as they are not the term used by the TOGAF Standard to describe the practice by which the enterprise architecture is managed and controlled at an enterprise-wide level. Corporate governance is "the system by which an organization is directed and controlled" 2, and it covers aspects such as leadership, strategy, performance, accountability, and ethics. IT governance is "the system by which the current and future use of IT is directed and controlled" 2, and it covers aspects such as IT strategy, policies, standards, and services. Technology governance is "the system by which the technology decisions and investments are directed and controlled" 3, and it covers aspects such as technology selection, acquisition, deployment, and maintenance. NEW QUESTION # 84

In the ADM, what is the name for documents that are not finished and not approved?

- A. interim
- **B. draft**
- C. version 0.1
- D. incomplete

Answer: B

Explanation:

* In TOGAF, draft deliverables are those that are not yet finished or approved. They are work-in-progress versions that may have version numbers like 0.1, 0.5, or 0.9.

* Once reviewed and approved, they become final deliverables.

Reference: TOGAF Standard, Version 9.2, Deliverables, Artifacts, and Building Blocks.

NEW QUESTION # 85

Consider the following statements:

1. Groups of countries, governments, or governmental organizations (such as militaries) working together to create common or shareable deliverables or infrastructures
2. Partnerships and alliances of businesses working together, such as a consortium or supply chain What are those examples of according to the TOGAF Standard?

- A. Organizations
- B. Enterprises
- C. Business Units
- **D. Architectures Scopes**

Answer: D

Explanation:

According to the TOGAF standard, the two statements provided refer to different scopes within which architecture can be developed:

Groups of countries, governments, or governmental organizations working together typically align with broader, often international, scopes of architecture that transcend individual enterprise boundaries.

Partnerships and alliances of businesses working together, such as a consortium or supply chain, refer to collaborative efforts that can define architecture at a scope involving multiple enterprises.

In both cases, the term "Architectures Scopes" is appropriate because it reflects the varying levels and contexts in which architectures can be defined, ranging from single business units to collaborative inter-organizational efforts.

NEW QUESTION # 86

Complete the sentence. Risks are identified as part of

- A. Preliminary Phase, Gap Analysis
- B. Phase B, assessing readiness for change
- **C. A Business Scenario, understanding business requirements**
- D. Phase A, Business Transformation Readiness Assessment

Answer: C

Explanation:

(ADM Inputs/Outputs for early phases include Business Scenario/Architecture Vision content, with "Risks and issues" explicitly listed.) - "Business Scenario / Architecture Vision... Risks and issues ..." www.opengroup.org

[opengroup.org](http://www.opengroup.org)

Reference: The Open Group (archived TOGAF materials), ADM Input and Output Descriptions.

NEW QUESTION # 87

Consider the following statements.

1. All processes, decision-making, and mechanisms used will be established so as to minimize or avoid potential conflicts of interest.
2. More effective strategic decision-making will be made by C-Level executives and business leaders.
3. All actions implemented and their decision support will be available for inspection by authorized organization and provider parties.

4. Digital Transformation and operations will be more effective and efficient.

Which statements highlight the value and necessity for Architecture Governance to be adopted within organizations?

- A. 2& 3
- B. 2 & 4
- C. 1 & 4
- **D. 1 & 3**

Answer: D

Explanation:

Statements 1 and 3 highlight the value and necessity for Architecture Governance to be adopted within organizations. Architecture Governance is the practice and orientation by which Enterprise Architectures and other architectures are managed and controlled at an enterprise-wide level². It ensures that architectural decisions are aligned with the organization's strategy, objectives, and standards. Architecture Governance also involves establishing and maintaining processes, decision-making, and mechanisms to avoid or minimize potential conflicts of interest, such as between different stakeholders, business units, or projects³⁴. Moreover, Architecture Governance requires transparency and accountability for all actions implemented and their decision support, so that they can be inspected and evaluated by authorized parties, such as auditors, regulators, or customers⁵.
