Free PDF SAP - C-BCFIN-2502 - High Hit-Rate SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions Test Dates

Improvement in C-BCFIN-2502 science and technology creates unassailable power in the future construction and progress of society. C-BCFIN-2502 practice test can be your optimum selection and useful tool to deal with the urgent challenge. With over a decade's striving, our C-BCFIN-2502 training materials have become the most widely-lauded and much-anticipated products in industry. We have full technical support from our professional elites in planning and designing C-BCFIN-2502 Practice Test. Do not hesitate anymore. You will never regret buying C-BCFIN-2502 study engine!

SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions Sample Questions (Q33-Q38):

NEW QUESTION # 33

What is one of the key benefits of SAP integrating compliance into real-time operational execution?

- A. It reduces the need for periodic compliance checks.
- B. It focuses on enhancing customer satisfaction.
- C. **It eliminates the need for manual compliance checks.**
- D. It separates compliance from daily finance operations.

Answer: C

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

A major innovation in the SAP S/4HANA environment is the shift from "detective" compliance to "preventative" compliance. By integrating compliance into real-time operational execution, SAP fundamentally changes the role of the auditor and the compliance officer. Traditionally, compliance was a retrospective process where transactions were reviewed in batches after they had occurred. This often led to the discovery of errors or policy violations weeks or months later, necessitating costly and time-consuming manual remediation.

The key benefit of SAP's real-time approach is that it eliminates the need for manual compliance checks.

By embedding automated "guardrails" directly into the business processes-such as automated Sanctioned Party Screening in Sales or Segregation of Duties checks in Procurement-the system prevents non-compliant transactions from being finalized in the first place. This "clean at the core" approach ensures that the data in the Universal Journal is inherently compliant. This not only reduces the risk of fines and reputational damage but also significantly lowers the operational cost of the finance function by removing the labor-intensive

"check-the-checker" tasks that traditionally plagued the period-end close.

NEW QUESTION # 34

What is the primary function of SAP CRM?

- A. To optimize customer relationship management
- B. To automate payroll processing
- C. To enhance supply chain operations
- D. To manage financial operations

Answer: A**NEW QUESTION # 35**

What are key functions of SAP Financial Closing Cockpit?

- A. Generates HR reports
- B. Manages employee benefits
- C. Improves audit compliance
- D. Automates closing tasks

Answer: C,D**NEW QUESTION # 36**

How does SAP Sanctioned Party Screening support compliance?

Note: There are 2 correct answers to this question.

- A. Performs automatic blocking of transactions.
- B. Provides efficient review workflows.
- C. Manages stock requirements and inventory levels.
- D. Analyzes sales data to identify market trends.

Answer: A,B

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP Sanctioned Party Screening, a core component of SAP Global Trade Services (GTS), is designed to ensure that an organization does not conduct business with individuals, companies, or entities listed on international restricted-party lists (such as those from the UN, EU, or US OFAC). It supports compliance primarily through automatic blocking of transactions and providing efficient review workflows.

When a sales order or purchase order is created in the SAP S/4HANA system, the GTS engine instantly checks the names and addresses against current sanctioned party lists. If a potential match is found, the system automatically blocks the transaction,

preventing any further actions such as shipping goods or issuing payments. This real-time intervention is critical for preventing inadvertent violations of international law.

Because screening algorithms can sometimes produce "false positives" (e.g., similar names), SAP provides efficient review workflows. These workflows route the blocked transaction to a designated compliance officer who can quickly investigate, add comments, and either release the block or confirm the violation. This ensures that compliance does not become an unnecessary bottleneck to legitimate business while maintaining a rigorous and auditable trail of all screening activities. Analyzing market trends (D) and managing inventory (B) are entirely different functional areas (Analytics and SCM) and are not related to the legal compliance functions of Sanctioned Party Screening.

NEW QUESTION # 37

Which feature of SAP Business Suite brings transparency to financial issues and unifies data from various sources?

- A. SAP Business Data Cloud
- **B. SAP Datasphere**
- C. Joule
- D. SAP Analytics Cloud Compass

Answer: B

NEW QUESTION # 38

.....
