Will you feel nervous in the exam? If you do, just try us 350-801 study materials, we will release your nerves as well build up your confidence for the exam. 350-801 Soft test engine can stimulate the real exam environment, so that you can know the procedure of the real exam, and your nervous will be relieved. In addition, 350-801 Study Materials are high quality, and they can help you pass the exam. They also contain both questions and answers, you can have a quickly check after practicing.

Cisco 350-801 exam is a certification exam that tests an individual's knowledge and skills in implementing and operating Cisco Collaboration Core Technologies. 350-801 exam is designed for network administrators, engineers, and IT professionals who want to advance their careers in the field of collaboration technologies. Implementing and Operating Cisco Collaboration Core Technologies certification exam covers a wide range of topics, including implementing Cisco Unified Communications Manager, implementing Cisco Unity Connection, and implementing Cisco Unified IM and Presence.

Cisco 350-801 exam is a part of the CCNP Collaboration certification track. Implementing and Operating Cisco Collaboration Core Technologies certification is designed to validate the skills and knowledge required to implement and operate Cisco collaboration solutions. Implementing and Operating Cisco Collaboration Core Technologies certification program covers a wide range of topics, including infrastructure, protocols, endpoints, and applications. The CCNP Collaboration certification is a must-have for professionals who want to advance their careers in the field of collaboration technologies.

## Cisco 350-801 Exam and Its Target

The Cisco 350-801 exam is designed mainly for the network engineers, systems engineers, and network administrators who want to improve their professional expertise to move their career forwards.

The IT specialists who are going to pass the Cisco 350-801 exam should first make sure that they possess the requisite knowledge and skills. They must be able to implement and handle basic collaboration technologies that include collaboration applications, QoS, Call Control, media resources, Cisco IOS gateway, and codecs and endpoints. Their skills in implementing and deploying key collaboration technologies will be an added advantage.

Additionally, the students should demonstrate a specializing knowledge of the basic computer networking terms, including routing, switching, LANs, and WANs. Moreover, they must have a thorough understanding of the fundamentals of digital interfaces, Voice over IP (VoIP), and Public Switched Telephone Networks (PSTNs). The applicants should also have the general familiarity with Cisco Unified Communications Manager deployment, data networks, and voice.

## **Cisco 350-801 New Dumps Book: Implementing and Operating Cisco Collaboration Core Technologies - ExamsTorrent Offers you Valid Study Reference**

Do not waste further time and money, get real Cisco 350-801 pdf questions and practice test software, and start Cisco 350-801 test preparation today. ExamsTorrent will also provide you with up to 365 days of free Implementing and Operating Cisco Collaboration Core Technologies exam questions updates, It will just need to take one or two days to practice Cisco 350-801 Test Questions and remember answers. You will free access to our test engine for review after payment.

### **Cisco Implementing and Operating Cisco Collaboration Core Technologies Sample Questions (Q90-Q95):**

#### **NEW QUESTION # 90**

Refer to the exhibit.

What is the reason for this call failure?

- A. The device pool contains more call processing agents in the CMG group than the endpoint can support
- B. The hunt group contains more devices than the endpoint can support
- C. MRGL contains more media groups than the endpoint can support.
- **D. The available location bandwidth between sites is exceeded**

**Answer: D**

#### **NEW QUESTION # 91**

Which configuration on Cisco Unified Communications Manager is required for SIP MWI to work?

- **A. Set the "Enable message waiting indicator" on the part group.**
- B. The line partition must be inside the rerouting CSS assigned to the Cisco Unity Connection SIP trunk.
- C. The line partition must be inside the inbound CSS assigned to the CUC SIP trunk.
- D. Assign a MWI extension on the mailbox.

**Answer: A**

#### **NEW QUESTION # 92**

On a Cisco Catalyst Switch, which command is required to send CDP packets on a switch port that configures a Cisco IP phone to transmit voice traffic in 802.1Q frames, tagged with the voice VLAN ID 221?

- **A. Device(config-if)# switchport voice vlan 221**
- B. Device(config-if)# switchport access vlan 221
- C. Device(config-if)# switchport trunk allowed vlan 221
- D. Device(config-if)# switchport vlan voice 221

**Answer: A**

#### NEW QUESTION # 93

Endpoint A is attempting to call endpoint B.

Endpoint A only supports G.711 ulaw with a packetization rate of 20 ms, and endpoint B supports packetization rate of 30 ms for G.711ulaw.

Which two media resources are allocated to normalize packetization rates through transrating?

- **A. Hardware transcoder on Cisco IOS Software**
- B. Software MTP on Cisco Unified Communication Manager
- **C. Hardware MTP on Cisco IOS Software**
- D. Software MTP on Cisco IOS Software
- E. Software transcoder on Cisco unified Communications manager

**Answer: A,C**

Explanation:

Software MTP - Software-only implementation that does not use a DSP resource for endpoints using the same codec and the same packetization time.

Hardware MTP - Hardware-only implementation that uses a DSP resource for endpoints using the same G.711 codec but a different packetization time. The repacketization requires a DSP resource so it cannot be done by software only. Cisco Unified Communications Manager also uses the term software MTP when referring to a hardware MTP.
