There are a lot of the advantages for you to buy our H35-211_V2.5 exam questions safely. First, our H35-211_V2.5 study braindumps are free from computer virus. You can download or install our H35-211_V2.5 study material without hesitation. Second, we will protect your private information. No other person or company will get your information from us. You won't get any telephone harassment or receiving junk E-mails after purchasing our H35-211_V2.5 training guide. You don't have to worry about anything with our H35-211_V2.5 learning quiz.

The Huawei H35-211_V2.5 exam covers a wide range of topics, including access network principles, access network construction, access network maintenance, access network security, and access network troubleshooting. It also includes practical exercises and scenarios that test a candidate's ability to apply their knowledge to real-world situations. H35-211_V2.5 Exam is designed to ensure that candidates have a deep understanding of access network technologies and can design, deploy, and manage access networks effectively.

Reliable H35-211_V2.5 Exam Simulator | H35-211_V2.5 Hot Spot Questions

If you are curious or doubtful about the proficiency of our H35-211_V2.5 practice materials, we can explain the painstakingly word we did behind the light. By abstracting most useful content into the H35-211_V2.5 practice materials, they have help former customers gain success easily and smoothly. The most important part is that all contents were being sifted with diligent attention. No errors or mistakes will be found within our H35-211_V2.5 practice materials. We stress the primacy of customers' interests, and make all the preoccupation based on your needs.

Huawei HCIP-Access V2.5 Sample Questions (Q24-Q29):

NEW QUESTION # 24

When ONT fails or the hardware needs to be replaced, the ONT needs to be removed on the OLT and then a new ONT needs to be registered.

- A. Right
- B. wrong

Answer: B

Explanation:

Huawei OLTs support ONT replacement without deleting the original service profile by using ONT replace /auto-find mechanisms. The OLT can bind the new ONT (new SN) to the existing ONT configuration template (service-port, VLAN, QoS, multicast profile, etc.), achieving a smooth replacement without manually removing and re-creating the ONT and services. The statement that you must remove the ONT and re-register from scratch is therefore wrong.

References: HCIP-Access V2.5 Study Guide - ONT Lifecycle Ops (Discovery, Authentication, Replacement); Huawei OLT Configuration Guide - ONT Replace Procedure.

NEW QUESTION # 25

What can cause erratic display in IPTV programs?

- A. A rate limit is configured on the device.
- B. Some key frames are lost during line transmission.
- C. The receive or transmit optical power of the device is at a critical value.
- D. Some key frames are lost during program compression.

Answer: A,B,C,D

Explanation:

In Huawei IPTV troubleshooting, mosaic/flash/jerky or intermittent picture typically results from packet loss or bit errors. Common causes include: optical power near the receiver sensitivity threshold causing FEC/BER spikes (A); loss of I-frames (key frames) either in the encoder/compression stage (B) or due to line transmission loss/jitter (D); and device rate-limit (CAR/policing) misconfiguration that drops packets under burst traffic (C). Any of these can yield unstable display.

References: HCIP-Access V2.5 Study Guide - IPTV Service Principles and Fault Location (video artifacts vs. packet loss; optical power thresholds; rate-limit effects); OLT/ONT Video Maintenance Guide - causes of mosaic and black screen.

NEW QUESTION # 26

(Radio) When using the siP protocol, you need to use a local number graph for matching, if you use the default matching mode to match a 7-digit number beginning with 7727, then the following options are available?

The figure is

- A. Local-bitmap add huawei normal 7727xxx/7726.
- B. Local-digi tmap add huawei normal 772. /7727xxx
- C. Local-di gi tmap add huawei normal 7727
- D. Local-digitmap add huawei normal 7727xxx/7727

Answer: D

NEW QUESTION # 27

After the anti-IP attack function is enabled on an OLT, the OLT cannot be remotely managed through Telnet.

- A. FALSE
- B. TRUE

Answer: A

NEW QUESTION # 28

(Multiple choice) When the OLT main control board CPU is detected to be continuously high, the following are possible causes:

- A. Cyber attacks
- B. Rogue ONU
- C. The user logged in illegally
- D. Network loops

Answer: A,B,C,D

Explanation:

A persistently high CPU on the OLT main control board is typically driven by excessive control-plane load or abnormal traffic patterns. Common causes include:

Illegal login attempts generating authentication and logging overhead (A) Layer-2 loops leading to storms and protocol churn (B) DoS/scan/attack traffic stressing control/management processing (C) Rogue/misbehaving ONUs causing frequent state changes, registration flaps, or abnormal report traffic (D) All listed factors are recognized contributors to elevated CPU on access OLTs. References: HCIP-Access V2.5 Study Guide (OLT Maintenance and Fault Location); Huawei OLT Maintenance Guide (High-CPU Causes and Handling: Loops, Attacks, Unauthorized Access, and ONU Abnormalities).

NEW QUESTION # 29

.....

To make sure your situation of passing the certificate efficiently, our H35-211_V2.5 practice materials are compiled by first-rank experts. So the proficiency of our team is unquestionable. They help you review and stay on track without wasting your precious time on useless things. They handpicked what the H35-211_V2.5 Study Guide usually tested in exam recent years and devoted their knowledge accumulated into these H35-211_V2.5 actual tests.
