Our AZ-700 test questions provide free trial services for all customers so that you can better understand our products. You can experience the effects of outside products in advance by downloading clue versions of our AZ-700 exam torrent. In addition, it has simple procedure to buy our learning materials. After your payment is successful, you will receive an e-mail from our company within 10 minutes. In a matter of seconds, you will receive an assessment report based on each question you have practiced on our AZ-700 test material. The final result will show you the correct and wrong answers so that you can understand your learning ability so that you can arrange the learning tasks properly and focus on the targeted learning tasks with AZ-700 test questions. So you can understand the wrong places and deepen the impression of them to avoid making the same mistake again.

Microsoft AZ-700 Professional Salary

The average salary of a Microsoft AZ-700 Professional in different countries, defined in **Microsoft AZ-700 Dumps**, is as follow:

- Canada - \$134,000 CAD
- France - €100,000 EUR
- United States - \$125,000 USD
- Australia - \$133,000 AUD

The AZ-700 exam is ideal for professionals who work with Azure Networking solutions, such as network engineers, architects, and administrators. AZ-700 exam validates the candidate's skills in designing and implementing complex Azure Networking solutions, which are critical for organizations that rely on Azure for their IT infrastructure. Passing the AZ-700 Exam demonstrates the

candidate's ability to design and implement secure, scalable, and efficient networking solutions, which are essential for delivering high-quality services and applications in the cloud.

Microsoft AZ-700 exam is a certification exam that can help professionals advance their careers. It is a new exam that was recently released by Microsoft and is part of the company's efforts to provide more specialized certifications in Azure. AZ-700 exam is intended for professionals who want to demonstrate their expertise in Azure networking and want to differentiate themselves in the job market.

Valid AZ-700 Exam Materials & Valid AZ-700 Test Duration

There are many benefits both personally and professionally to having the AZ-700 test certification. Higher salaries and extended career path options. The Microsoft AZ-700 test certification will make big difference in your life. Now, you may find the fast and efficiency way to get your AZ-700 exam certification. Do not be afraid, the Microsoft AZ-700 will give you helps and directions. AZ-700 questions & answers almost cover all the important points which will be occurred in the actual test. You just need to take little time to study and prepare, and passing the AZ-700 actual test will be a little case.

Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q13-Q18):

NEW QUESTION # 13

Task 11

You need to ensure that only hosts on VNET1 can access the slcnage42150372 storage account. The solution must ensure that access occurs over the Azure backbone network.

Answer:

Explanation:

See the Explanation below for step by step instructions.

Explanation:

To ensure that only hosts on VNET1 can access the slcnage42150372 storage account and that access occurs over the Azure backbone network, you can use Azure Private Endpoints. This method secures the connection by assigning a private IP address from your virtual network to the storage account, ensuring that traffic does not traverse the public internet.

Step-by-Step Solution

Step 1: Create a Private Endpoint for the Storage Account

- * Navigate to the Azure Portal.
- * Search for "Storage accounts" and select the slcnage42150372 storage account.
- * In the storage account blade, select "Networking" under the "Security + networking" section.
- * Under "Private endpoint connections", click on "Add private endpoint".
- * Enter the following details:
 - * Name: Enter a name for the private endpoint (e.g., PrivateEndpoint-VNET1).
 - * Region: Select the same region as your virtual network (VNET1).
 - * Click on "Next: Resource".

Step 2: Configure the Resource

- * Select "Target sub-resource": Choose the storage service you want to connect to (e.g., blob, file, queue, table).
- * Click on "Next: Virtual network".

Step 3: Select the Virtual Network and Subnet

- * Select the virtual network: Choose VNET1.
- * Select the subnet: Choose the appropriate subnet within VNET1.
- * Click on "Next: Configuration".

Step 4: Configure DNS Integration (Optional)

- * Configure DNS settings if needed to ensure proper name resolution within your virtual network.
- * Click on "Next: Tags", add any tags if necessary, and then click on "Review + create".
- * Review your settings and click on "Create".

Step 5: Restrict Public Network Access

- * Navigate back to the storage account.
- * Select "Networking" under the "Security + networking" section.

- * Under "Firewalls and virtual networks", select "Selected networks".
- * Ensure that only VNET1 is listed under the virtual networks section.
- * Click on "Save".

Explanation:

* Private Endpoints: These provide secure connectivity to Azure services by assigning a private IP address from your VNet to the service, ensuring that traffic stays within the Azure backbone network¹².

* Firewall and Virtual Networks: Configuring the storage account to allow access only from selected networks (VNET1) ensures that no other network can access the storage account³.

By following these steps, you can ensure that only hosts on VNET1 can access the sknag42150372 storage account, and that all access occurs over the secure Azure backbone network.

NEW QUESTION # 14

You have an Azure subscription that contains a virtual network named VNet1.

You need to deploy an instance of Azure Application Gateway v2 named AppGw1 to VNet1. AppGw1 will include one basic listener and two multi-site listeners. The listeners will be accessible only from VNet1.

What is the minimum number of IP addresses required for AppGw1? To answer, select the appropriate options in the answer area

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 15

You need to connect an on-premises network and an Azure environment. The solution must use ExpressRoute and support failing over to a Site-to-Site VPN connection if there is an ExpressRoute failure.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/expressroute/expressroute-howto-coexist-resource-manager>

NEW QUESTION # 16

You have two Azure virtual networks in the East US Azure region as shown in the following table.

The virtual networks are peered to one another. Each virtual network contains four subnets.

You plan to deploy a virtual machine named VM1 that will inspect and route traffic between all the subnets on both the virtual networks.

What is the minimum number of IP addresses that you must assign to VM1?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

The question asks about setting up a VM to perform this traffic inspection, not an Azure Firewall.

The VM would function as a Network Virtual Appliance (NVA). NVAs are frequently configured as Firewalls using third party OS (Barracuda, Palo Alto, Cisco, etc), but this doesn't make it an Azure Firewall.

This should be easily doable with a single IP on the NIC attached to the VM that will be configured as an NVA.

NEW QUESTION # 17

You have an Azure subscription that contains a single virtual network and a virtual network gateway.

You need to ensure that administrators can use Point-to-Site (P2S) VPN connections to access resources in the virtual network.

The connections must be authenticated by Azure Active Directory (Azure AD).

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 18

.....

Questions remain unsuccessful in the AZ-700 test and lose their resources. That's why DumpsTorrent is offering real Microsoft AZ-700 Questions that are real and can save you from wasting time and money. Hundreds of applicants have studied successfully from our AZ-700 latest questions in one go. We have launched our AZ-700 Practice Test after consulting with experts who have years of experience in this field. People who have used our AZ-700 exam preparation material rated it as the best option to study for the AZ-700 exam in a short time.
