Facing all kinds of the JN0-460 learning materials in the market, it's difficult for the candidates to choose the best one. Our JN0-460 learning materials are famous for the high accuracy and high quality. Besides, we provide free update for one year, and pass guarantee and money back guarantee. We have the free demo for you to know more about our JN0-460 Learning Materials. If you have any questions, you can contact our online service staff.

Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.
Topic 2	<ul style="list-style-type: none">Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.
Topic 3	<ul style="list-style-type: none">Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.

Topic 4	<ul style="list-style-type: none"> • Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.
Topic 5	<ul style="list-style-type: none"> • Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.

JN0-460 Test Vce | New JN0-460 Learning Materials

As we all know, good JN0-460 study materials can stand the test of time, our company has existed in the JN0-460 exam dumps for years, we have the most extraordinary specialists who are committed to the study of the JN0-460 study materials for years, they conclude the questions and answers for the candidates to practice. By practicing the JN0-460 Exam Dumps, the candidates can pass the exam successfully. Choose us, and you can make it.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q54-Q59):

NEW QUESTION # 54

Which action would site-level network administrators be able to perform?

- A. create a config template
- B. assign access points to the site
- C. modify an RF template
- D. reboot an access point

Answer: D

Explanation:

In Juniper Mist role-based access control (RBAC), site-level administrators have limited privileges to manage devices within their assigned sites.

They cannot modify organization-level templates or global settings but can perform operational tasks, including rebooting APs or switches and monitoring their status.

This ensures proper delegation of duties while maintaining centralized configuration control.

References: Juniper Mist Role-Based Access Control and Administrator Roles Documentation

NEW QUESTION # 55

Under which hierarchy level would you create a new site configuration?

- A. access points
- B. clients
- C. organization
- D. location

Answer: D

Explanation:

In Mist, sites represent the physical or logical grouping of devices within an organization.

You create and manage a site configuration under the Location hierarchy in the Mist UI.

Each site inherits organization-level settings but can override or customize specific configurations such as VLANs, templates, or switch settings.

NEW QUESTION # 56

In the context of deploying wired assurance, which of the following are considered supported architectures?

- A. Hybrid cloud environments
- B. On-premises data centers
- C. Peer-to-peer networks
- D. Cloud-managed networks
- E. Virtual private networks (VPNs)

Answer: A,B,D

NEW QUESTION # 57

A company is planning to deploy a Juniper Mist campus fabric and wants to implement group-based policy (GBP) for microsegmentation.

Which statement is correct in this scenario?

- A. GBP can be implemented on any Juniper Networks switch that supports EVPN-VXLAN.
- B. GBP configuration must be applied to each individual switch in the fabric using the CLI.
- C. GBP requires access switches to be EX4100 or EX4400 switches.
- D. GBP configuration should be repeated on every individual switch in the fabric.

Answer: C

Explanation:

Group-Based Policy (GBP) is a Juniper EVPN-VXLAN feature that enables microsegmentation without requiring multiple VRFs or VLANs. It is implemented within Juniper Mist's Wired Assurance and Campus Fabric frameworks.

"GBP provides scalable, identity-based segmentation for campus fabrics and is supported on EX4100 and EX4400 Series switches operating in EVPN-VXLAN mode under Mist management." The feature requires hardware and software support for EVPN-VXLAN and GBP tagging, which is currently available on specific EX models managed by Mist Cloud.

Option A: Correct - GBP requires compatible access switches, specifically EX4100 and EX4400 models.

Option B: Incorrect - GBP is centrally managed through Mist Cloud, not configured per switch.

Option C: Incorrect - GBP is provisioned via Mist Cloud, not the CLI.

Option D: Incorrect - GBP is not supported on all EVPN-capable switches; only on defined platforms (EX4100 / EX4400).

NEW QUESTION # 58

The primary benefit of Campus Fabric Core-Distribution model is:

- A. Scalability and high availability
- B. Reduction in network bandwidth
- C. Increased network latency
- D. Simplified cable management

Answer: A

NEW QUESTION # 59

.....

The software creates an Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) exam-like scenario for you which helps to kill anxiety about the Juniper JN0-460 Certification Exams Questions. Customizable JN0-460 practice test software enables you to change settings of practice exam time and questions. Since the ITExamReview software tracks your progress, you can know mistakes and overcome them before the Juniper JN0-460 final test.
