New Trend Deep-Security-Professional Exam Question | Valid Test Deep-Security-Professional Braindumps

These Trend Deep-Security-Professional exam questions give you an idea about the final Trend Deep-Security-Professional exam questions formats, exam question structures, and best possible answers, and you will also enhance your exam time management skills. Finally, at the end of Deep-Security-Professional Exam Practice test you will be ready to pass the final Deep-Security-

Professional exam easily. Best of luck in Trend Micro Certified Professional for Deep Security (Deep-Security-Professional) exam and professional career!!!

Trend Micro Certified Professional for Deep Security Sample Questions (Q81-Q86):

NEW QUESTION # 81
What is the default priority assigned to Firewall rules using the Allow action?

- A. Firewall rules using the Allow action can be assigned a priority between 1 and 3.
- B. Firewall rules using the Allow action always have a priority of 4.
- C. Firewall rules using the Allow action always have a priority of 0.
- D. Firewall rules using the Allow action can be assigned a priority between 0 and 4.

Answer: D

Explanation:
Firewall rules in Deep Security can be assigned a priority value between 0 (lowest) and 4 (highest), regardless of whether the action is Allow or Deny. The priority determines the order in which rules are evaluated.

NEW QUESTION # 82
How does Smart Scan vary from conventional pattern-based anti-malware scanning?

- A. Smart Scan is performed in real time, where conventional scanning must be triggered manually, or run on a schedule.
- B. Smart Scan identifies files to be scanned based on the content of the file, not the extension.
- C. Smart Scan improves the capture rate for malware scanning by sending features of suspicious files to a cloud-based server where the features are compared to known malware samples.
- D. Smart Scan shifts much of the malware scanning functionality to an external Smart Protection Server.

Answer: D

Explanation:
Smart Scan offloads much of the malware scanning workload to a dedicated external Smart Protection Server (can be Trend Micro-hosted or on-premise), rather than performing all scanning and pattern lookups locally.
The endpoint performs a lightweight initial scan and then queries the Smart Protection Server for advanced analysis, improving performance and reducing pattern update frequency on endpoints.
From the official documentation:
"With Smart Scan, the agent sends file or process attributes to a Smart Protection Server, which then performs the pattern matching and returns the result. This allows agents to use a smaller local pattern file and offloads the majority of scanning to the Smart Protection infrastructure." Option B is correct.
Option A is misleading; although file features are checked externally, the main difference is offloading, not capture rate.
Option C is incorrect; both methods can scan in real-time.
Option D describes IntelliScan, not Smart Scan.

NEW QUESTION # 83
Based on the details of event displayed in the exhibit, which of the following statements is false?

- A. You can instruct the Deep Security Agents and Appliances to block traffic from the source IP address for a period of time.
- B. The scan may be generated from an IP address which may be known to you. If so, the source IP address can be added to the reconnaissance whitelist.
- C. The Intrusion Prevention Protection Modules must be enabled to detect reconnaissance scans.
- D. You can create a firewall rule to permanently block traffic from the originating IP ad-dress.

Answer: B

NEW QUESTION # 84
What is the purpose of the override.properties file?

- A. This file allows Deep Security Agents to override enforced behavior by providing new policy configuration details.
- B. This file allows properties to be tested on Deep Security Manager without affecting the original configuration.
- C. This file contains the original out-of-the-box configuration properties for Deep Security Manager. This file is renamed to dsm.properties upon initialization of Deep Security Manager.
- D. This file is used to transfer policy settings from one installation of Deep Security Man-ager to another

Answer: B

Explanation:
The properties specified in this configuration file override the properties specified in the dsm.properties file.
This file can be created manually by a support engineer to modify product be-havior without affecting the original configuration.
Explication: Study Guide - page (42)

NEW QUESTION # 85
As the administrator in a multi-tenant environment, you would like to monitor the usage of security services by tenants? Which of the following are valid methods for monitoring the usage of the system by the tenants?

- A. Use the Representational State Transfer (REST) API to collect usage data from the tenants.
- B. Generate a Chargeback report in Deep Security manager Web console.
- C. Monitor usage by the tenants from the Statistics tab in the tenant Properties window.
- D. All the choices listed here are valid.

Answer: D

Explanation:
Deep Security Manager records data about tenant usage. This information is displayed in the Ten-ant Protection Activity widget on the Dashboard, the Statistics tab in tenant Properties, and the Chargeback report.
This information can also be accessed through the Status Monitoring REST API which can be enabled or disabled from the Administration > Advanced > System Settings > Advanced > Status Monitoring API.
multi-tenancy
Explication: Study Guide - page (422)

NEW QUESTION # 86
......

In fact, a number of qualifying exams and qualifications will improve your confidence and sense of accomplishment to some extent, so our Deep-Security-Professional test practice question can be your new target. When we get into the job, our Deep-Security-Professional training materials may bring you a bright career prospect. Companies need employees who can create more value for the company, but your ability to work directly proves your value. Our Deep-Security-Professional Certification guide can help you improve your ability to work in the shortest amount of time, thereby surpassing other colleagues in your company, for more promotion opportunities and space for development. Believe it or not that up to you, our Deep-Security-Professional training materials are powerful and useful, it can solve all your stress and difficulties in reviewing the Deep-Security-Professional exams.
