NEW QUESTION # 295

You have an Azure subscription.

You plan to deploy an SAP production landscape in Azure that will use a Pacemaker cluster for SAP HANA system replication and an Azure fence agent. You need to recommend an authentication method and a HANA system replication load-balancing method for the Pacemaker cluster.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Authentication method:
A user-assigned managed identity
* system-assigned managed identity
A user-assigned managed identity
A delegated Managed Service Account (dmsa)

Load-balancing method:
Gateway Load Balancer
Azure Application Gateway
Gateway Load Balancer
Azure Standard Load Balancer

Answer:

Explanation:

Answer Area

Authentication method:
 A user-assigned managed identity
 A system-assigned managed identity
A user-assigned managed identity
 A delegated Managed Service Account (dMSA)

Load-balancing method:
 Gateway Load Balancer
Azure Application Gateway
 Gateway Load Balancer
 Azure Standard Load Balancer

NEW QUESTION # 296

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Azure AD Connect is required to sign into Linux virtual machines hosted in Azure.	<input type="checkbox"/>	<input type="checkbox"/>
An SAP application server that runs on a Linux virtual machine in Azure must be joined to Active Directory.	<input type="checkbox"/>	<input type="checkbox"/>
Before you can sign into an SAP application server that runs on a Linux virtual machine in Azure, you must create a Managed Service Identity (MSI).	<input type="checkbox"/>	<input type="checkbox"/>

Answer:

Explanation:

Statements	Yes	No
Azure AD Connect is required to sign into Linux virtual machines hosted in Azure.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
An SAP application server that runs on a Linux virtual machine in Azure must be joined to Active Directory.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Before you can sign into an SAP application server that runs on a Linux virtual machine in Azure, you must create a Managed Service Identity (MSI).	<input type="checkbox"/>	<input checked="" type="checkbox"/>
