Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q33-Q38):

NEW QUESTION # 33

An installment for \$2,000 USD is due for payment on July 31, 2022. The installment has two discounts: the first discount date is June 15, 2022 for \$150 USD and the second discount date is June 30, 2022 for \$50 USD.

You submit a Payment Process Request with the following criteria:

Payment Date = June 20, 2022

Pay Through Date = July 30, 2022

Date Basis = Due Date

What will be the resulting status of the installment and discount?

- A. The installment is not selected because the due date is after the Pay Through Date.
- B. The installment is not selected because the discount dates are before the Pay Through Date.
- C. The installment is selected and no discount is applied.
- D. The installment is selected and a discount of \$50 USD is applied.
- E. The installment is selected and a discount of \$150 USD is applied.

Answer: A

NEW QUESTION # 34

As an Oracle Payables Subject Matter Expert, you are familiarizing yourself with Intelligent Document Recognition (IDR). After detailed review, you consider Adaptive Learning one of the most beneficial features of IDR. Adaptive learning increases the accuracy of invoice scanning and improves touchless processing. When users make corrections in the interactive viewer, each invoice edit trains the algorithms and improves future recognition.

Which is NOT a key consideration for Adaptive Learning?

- A. Adaptive Learning for Routing Attributes
- B. Adaptive Learning for Invoice Lines
- C. Sharing Adaptive Learning Between Environments
- D. Bill-To Recognition from Invoice Document
- E. Legal Entity Recognition from Invoice Document

Answer: D

NEW QUESTION # 35

You have enabled Payment Approval for your Payment Process Requests (PPR). At what stage of the PPR is the payment approval process automatically triggered?

- A. Review Proposed Payments
- B. Build Payments
- C. Create Payment Files
- D. Review Installments

Answer: A

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, the Payment Process Request (PPR) undergoes several stages, each with specific functions and potential user interventions. When Payment Approval is enabled, the system incorporates an approval workflow to ensure that payments are reviewed and authorized before disbursement.

Stages of Payment Process Request:

Installment Selection:

Description: The system selects invoice installments based on predefined criteria such as due dates, payment methods, and supplier information.

User Action: Optional review if the "Review Installments" option is selected.

Document Validation:

Description: Validates the selected installments for completeness and correctness, ensuring all necessary information is present.

User Action: Required if there are validation errors or missing information.

Build Payments:

Description: Groups validated installments into payments based on attributes like payment date, disbursement bank account, and payment method.

User Action: None, this is an automated process.

Review Proposed Payments:

Description: Allows users to review and, if necessary, modify the proposed payments before finalizing them.

User Action: Required if the "Review Proposed Payments" option is selected.

Payment Approval:

Description: If enabled, this stage involves routing the proposed payments to designated approvers for authorization before disbursement.

User Action: Approvers must review and approve or reject the payments.

Create Payment Files:

Description: Generates the necessary payment files for disbursement, such as electronic funds transfer (EFT) files or check print files.

User Action: None, unless issues arise during file creation.

Trigger Point for Payment Approval:

The Payment Approval process is automatically triggered at the Review Proposed Payments stage. At this point, the system pauses to allow approvers to review the proposed payments and make decisions regarding their authorization. This control mechanism ensures that all payments are vetted before funds are disbursed, aligning with organizational policies and financial controls.

According to Oracle's documentation:

"If enabled, the payment process stops at the Review Proposed Payments stage. Approvers can then optionally remove payments directly from a payment process request and approve it." docs.oracle.com Analysis of Options:

A . Review Proposed Payments: Correct. This is the stage where the payment approval process is triggered, allowing approvers to review and authorize payments.

B . Create Payment Files: Incorrect. This stage occurs after payment approval and involves generating the actual payment files for disbursement.

C . Review Installments: Incorrect. This is an earlier stage where selected installments are reviewed before payments are built, but it does not involve the payment approval workflow.

D . Build Payments: Incorrect. This stage involves grouping validated installments into payments and occurs before the Review Proposed Payments stage.

Conclusion:

Enabling Payment Approval in Oracle Financials Cloud introduces a critical control point at the Review Proposed Payments stage of the Payment Process Request. This setup ensures that all proposed payments undergo managerial review and authorization before the creation of payment files and the actual disbursement of funds. Implementing this approval process helps maintain robust financial oversight and compliance within the organization's payment workflows.

NEW QUESTION # 36

Previously, cash advances were applied automatically to expenses when the auditor ran the expense reimbursement process. Now, Oracle Expenses allows employees to have the ability to manually apply their cash advances to the relevant expense report. As an Application Implementation Consultant, you advise your client to enable this feature and allow employees to perform manual application of cash advances to their expense reports for the US Business Unit.

Which statement is NOT true about this feature?

- A. Unused cash advance amounts are applied to the next expense report or refunded to the company by the employee.
- B. If approvers or auditors reject expense reports, the cash advances that are applied to the reports are automatically removed and returned to the employee's available cash advances.
- C. **Auditors can make changes to cash advances that are applied to an expense report.**
- D. Employees need to include a justification if they don't apply an available cash advance when submitting an expense report.

Answer: C

NEW QUESTION # 37

Your company will be utilizing the Campaign Management for Early Payment Discount Offers feature to maximize early payment discounts. This feature allows companies to send email-based campaigns offering suppliers the opportunity to enroll in an early payment discounts program. There is a predefined list of response options that suppliers can choose from, and such supplier responses are then automatically processed and applied in the system.

Which two are predefined response options available to suppliers?

- A. **Decline the Offer**
- B. Subscribe
- C. **Enroll in a Standing Offer**
- D. Accept All Offers

Answer: A,C

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, the Campaign Management for Early Payment Discount Offers feature enables organizations to send email campaigns to suppliers, inviting them to participate in early payment discount programs. Suppliers receiving these offers have predefined response options that are automatically processed by the system.

Predefined Supplier Response Options:

Accept a One-Time Offer:

Suppliers can choose to accept a discount offer for specific invoices that are currently eligible for early payment. This action applies the discount to the selected invoices, and they are processed for early payment accordingly.

Enroll in a Standing Offer:

By selecting this option, suppliers agree to participate in an ongoing early payment discount program. All future invoices that meet the agreed-upon criteria will automatically be eligible for early payment discounts without the need for individual acceptances.

Decline the Offer:

Suppliers may opt to decline the current early payment discount offer. Declining does not prevent them from receiving future offers; it simply indicates that they are not interested in the present offer.

Unsubscribe:

If a supplier chooses to unsubscribe, they will no longer receive email notifications regarding early payment discount offers from the campaign. This action effectively removes them from the current and any future campaigns.

Analysis of the Provided Options:

A . Accept All Offers:

There is no predefined response option that allows suppliers to accept all past and future offers in a single action. Acceptance is either for a specific one-time offer or through enrollment in a standing offer for future invoices.

B . Decline the Offer:

This is a valid predefined response. Suppliers can choose to decline the current offer, indicating they are not interested in the proposed early payment discount for the specified invoices.

C . Subscribe:

While suppliers can unsubscribe from receiving future offers, there isn't a specific "Subscribe" option. Suppliers are considered participants by default and can choose to enroll in standing offers or accept individual offers.

D . Enroll in a Standing Offer:

This is a valid predefined response. Suppliers can enroll in a standing offer, agreeing to early payment discounts on all future eligible invoices automatically.

Conclusion:

The correct predefined response options available to suppliers are B. Decline the Offer and D. Enroll in a Standing Offer. These options provide suppliers with the flexibility to manage their participation in early payment discount programs effectively.
