SC-900認定資格 & SC-900最新日本語版参考書

学習者の学習条件はさまざまであり、多くの場合、SC-900学習問題を学習するためにインターネットにアクセスできない場合があります。学習者が自宅や会社を離れる場合、インターネットにリンクしてSC-900テストpdf

を学習することはできません。しかし、あなたはオフラインで学ぶことができる私たちのAPPオンライン版を使用しています。初めてオンラインになる環境でSC-900学習質問を使用する場合のみ、後でオフラインで使用できます。したがって、SC-900試験の練習教材をどこでも心配する必要がないため、すべての学習者にとって非常に便利です。

Microsoft SC-900試験は、Microsoftのセキュリティ、コンプライアンス、アイデンティティソリューションの基礎知識をテストする認定試験であり、IT分野、特にサイバーセキュリティとコンプライアンスの分野でキャリアを追求する個人向けに設計されています。この試験は、クラウドセキュリティ、コンプライアンス、アイデンティティとアクセス管理、脅威保護、情報保護などのトピックをカバーしています。

Microsoft Security Compliance and Identity Fundamentals 認定 SC-900 試験 問題 (Q88-Q93):

質問 # 88

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point

| Statements | Yes | No |
|--|-----------------------|-----------------------|
| Microsoft Sentinel data connectors support only Microsoft services. | <input type="radio"/> | <input type="radio"/> |
| You can use Azure Monitor workbooks to monitor data collected by Microsoft Sentinel. | <input type="radio"/> | <input type="radio"/> |
| Hunting provides you with the ability to identify security threats before an alert is triggered. | <input type="radio"/> | <input type="radio"/> |

正解:

解説:

| Statements | Yes | No |
|--|----------------------------------|-----------------------|
| Microsoft Sentinel data connectors support only Microsoft services. | <input checked="" type="radio"/> | <input type="radio"/> |
| You can use Azure Monitor workbooks to monitor data collected by Microsoft Sentinel. | <input checked="" type="radio"/> | <input type="radio"/> |
| Hunting provides you with the ability to identify security threats before an alert is triggered. | <input checked="" type="radio"/> | <input type="radio"/> |

質問 # 89

Which Microsoft 365 compliance center feature can you use to identify all the documents on a Microsoft SharePoint Online site that contain a specific key word?

- A. Alerts
- B. Compliance Manager
- C. Content Search
- D. Audit

正解: C

解説:

Section: Describe the Capabilities of Microsoft Compliance Solutions

Explanation:

The Content Search tool in the Security & Compliance Center can be used to quickly find email in Exchange mailboxes, documents in SharePoint sites and OneDrive locations, and instant messaging conversations in Skype for Business.

The first step is to starting using the Content Search tool to choose content locations to search and configure a keyword query to search for specific items.

<https://docs.microsoft.com/en-us/microsoft-365/compliance/search-for-content?view=o365-worldwide>

質問 #90

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Answer Area | Statements | Yes | No |
|-------------|--|-----------------------|-----------------------|
| | Azure Defender can detect vulnerabilities and threats for Azure Storage. | <input type="radio"/> | <input type="radio"/> |
| | Cloud Security Posture Management (CSPM) is available for all Azure subscriptions. | <input type="radio"/> | <input type="radio"/> |
| | Azure Security Center can evaluate the security of workloads deployed to Azure or on-premises. | <input type="radio"/> | <input type="radio"/> |

正解:

解説:

| Answer Area | Statements | Yes | No |
|-------------|--|----------------------------------|-----------------------|
| | Azure Defender can detect vulnerabilities and threats for Azure Storage. | <input checked="" type="radio"/> | <input type="radio"/> |
| | Cloud Security Posture Management (CSPM) is available for all Azure subscriptions. | <input checked="" type="radio"/> | <input type="radio"/> |
| | Azure Security Center can evaluate the security of workloads deployed to Azure or on-premises. | <input checked="" type="radio"/> | <input type="radio"/> |

Explanation

Graphical user interface, text, application, email Description automatically generated

Answer Area

| Statements | Yes | No |
|--|----------------------------------|-----------------------|
| Azure Defender can detect vulnerabilities and threats for Azure Storage. | <input checked="" type="radio"/> | <input type="radio"/> |
| Cloud Security Posture Management (CSPM) is available for all Azure subscriptions. | <input checked="" type="radio"/> | <input type="radio"/> |
| Azure Security Center can evaluate the security of workloads deployed to Azure or on-premises. | <input checked="" type="radio"/> | <input type="radio"/> |

Box 1: Yes

Azure Defender provides security alerts and advanced threat protection for virtual machines, SQL databases, containers, web applications, your network, your storage, and more. Box 2: Yes Cloud security posture management (CSPM) is available for free to all Azure users.

Box 3: Yes

Azure Security Center is a unified infrastructure security management system that strengthens the security posture of your data centers, and provides advanced threat protection across your hybrid workloads in the cloud - whether they're in Azure or not - as well as on premises.

質問 #91

You have an Azure subscription that contains a Log Analytics workspace.

You need to onboard Microsoft Sentinel.

What should you do first?

- A. Create a hunting query.
- B. Correlate alerts into incidents.
- C. Create a custom detection rule.
- D. Connect to your security sources.

正解: D

解説:

Onboarding Microsoft Sentinel starts by enabling Sentinel on an existing Log Analytics workspace and then connecting data sources so analytics can operate on ingested security data. Microsoft's Sentinel onboarding guidance emphasizes that after you add Sentinel to a workspace, you must "connect Microsoft services, non-Microsoft solutions, and custom sources" using built-in data connectors. Microsoft also states that "you need data in your workspace before you can use Microsoft Sentinel's analytics, hunting, and investigation capabilities." Features such as custom analytics rules, hunting queries, and incident correlation depend on ingested telemetry from sources like Microsoft Entra ID sign-in logs, Microsoft 365, Defender products, firewalls, and other appliances. Because the question already gives you a Log Analytics workspace (the prerequisite for enabling Sentinel), the first action in the onboarding workflow that unlocks Sentinel's value is to connect your security sources. Only after data is flowing should you proceed to create analytics rules, hunting queries, and incident processes. Therefore, the correct first step to onboard Microsoft Sentinel is connect to your security sources.

質問 # 92

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

| Statements | Yes | No |
|--|-----------------------|-----------------------|
| Microsoft Entra Access Review evaluates user and group permissions for Azure resources. | <input type="radio"/> | <input type="radio"/> |
| A user can be removed from a group automatically after a Microsoft Entra Access Review evaluation. | <input type="radio"/> | <input type="radio"/> |
| The Microsoft Entra Access Review feature is available in all Microsoft Entra ID service plans. | <input type="radio"/> | <input type="radio"/> |

正解:

解説:

| Statements | Yes | No |
|--|----------------------------------|----------------------------------|
| Microsoft Entra Access Review evaluates user and group permissions for Azure resources. | <input checked="" type="radio"/> | <input type="radio"/> |
| A user can be removed from a group automatically after a Microsoft Entra Access Review evaluation. | <input checked="" type="radio"/> | <input type="radio"/> |
| The Microsoft Entra Access Review feature is available in all Microsoft Entra ID service plans. | <input type="radio"/> | <input checked="" type="radio"/> |

Explanation:

| Statements | Yes | No |
|--|----------------------------------|----------------------------------|
| Microsoft Entra Access Review evaluates user and group permissions for Azure resources. | <input checked="" type="radio"/> | <input type="radio"/> |
| A user can be removed from a group automatically after a Microsoft Entra Access Review evaluation. | <input checked="" type="radio"/> | <input type="radio"/> |
| The Microsoft Entra Access Review feature is available in all Microsoft Entra ID service plans. | <input type="radio"/> | <input checked="" type="radio"/> |

Microsoft Entra Access Reviews are designed to help organizations regularly validate and right-size access.

Microsoft's documentation explains that access reviews can target group memberships, enterprise app assignments, Azure AD roles, and Azure resource roles (via Privileged Identity Management), allowing reviewers to assess whether users, service principals, or groups should retain access to Azure resources- confirming the first statement. Access Reviews support automation: you can configure a review to "Auto- apply results", so when the review ends, users who were denied or not reviewed are automatically removed from the group, application assignment, or role-validating the second statement. Finally, Access Reviews are a Premium P2 capability (now Microsoft Entra ID P2) alongside PIM and advanced identity governance.

They are not included in all service plans; tenants require the appropriate P2 licenses for reviewers and users in scope-therefore the third statement is No.
