ABPMP International Certified Business Process Associate (CBPA) Exam Sample Questions (Q66-Q71):

NEW QUESTION # 66
What is process redesign?

- A. The initial introduction of business processes in an organization
- B. A sequence of activities to improve a given business process
- C. The creation of process models in a new tool without changing content of the processes
- D. A continuous procedure model for process improvement

Answer: B

Explanation:
Process redesign refers to the planned set of activities aimed at fundamentally improving an existing process. It goes beyond tweaking- it involves re-engineering the way the process works, often to achieve significant performance breakthroughs.
"Process redesign is the act of rethinking and radically altering existing processes to achieve dramatic improvements in performance measures such as cost, quality, service, and speed."
- ABPMP CBOK, Chapter 5 - Process Design
Key aspects:
* Eliminating non-value activities
* Simplifying process steps
* Leveraging new technologies

NEW QUESTION # 67
What is an indication of "process culture" in an organization?

- A. Social events promote "big wins" for improving processes.
- B. There are incentive rewards for process orientation.
- C. The enterprise is structured, organized, managed, and measured around its primary business processes.
- D. KPIs are aligned through the various management layers and across functions.

Answer: C

Explanation:
A strong process culture exists when the organization is structured and managed around its primary business processes, not just its departments. This implies that processes drive accountability, metrics, and improvement.
"Process culture means the organization is aligned around its core business processes, making them visible, managed, and continuously improved by everyone."
- ABPMP CBOK, Chapter 9 - Process Organization

NEW QUESTION # 70
Process analysis is the foundation for

- A. Process organization
- B. Process modeling
- **C. Process design**
- D. Process automation

Answer: C

Explanation:
Process analysisidentifies inefficiencies, waste, and opportunities for improvement in the current ("as-is") state. These insights form thefoundation for designing the "to-be" process, making analysis a prerequisite for effective process design.
"Process analysis delivers insights that become the foundation for process design, ensuring the redesigned process addresses current issues and achieves desired performance."
- ABPMP CBOK, Chapter 4 - Process Analysis
This relationship is critical in theBPM lifecycle, where:
* Analysis precedes design
* Analysis provides data to justify improvements
* Design is aligned with strategic and operational goals
